A dazzling debut that is at once a lightly erudite novel of ideas and a darkly charming love story set on an island off the coast of Maine—the perfect sophisticated summer read. By turns funny, charming, and tragic, Rosecrans Baldwin's debut novel takes us inside the heart and mind of Dr. Victor Aaron, a leading Alzheimer's researcher at the Soborg Institute on Mount Desert Island in Maine. Victor spends his days alternating between long hours in the sterile lab and running through memories of his late wife, Sara. He has preserved their marriage as a sort of

perfect, if tumultuous, duet between two opposite but precisely compatible souls. But one day, in the midst of organizing his already hyperorganized life, Victor discovers a series of index cards covered in Sara's handwriting. They chronicle the major "changes in direction" of their marriage, written as part of a brief fling with couples counseling. Sara's version of their great love story is markedly different from his own, which, for the eminent memory specialist, is a startling revelation. Victor is forced to reevaluate and relive each moment of their marriage, never knowing if the revisions will hurt or hearten. Meanwhile, as Victor's faith in

memory itself unravels, so too does his precisely balanced support network, a group of strong women—from his lab assistant to Aunt Betsy, doddering doyenne of the island—that had, so far, allowed him to avoid grieving. Rosecrans Baldwin shows himself here to be a young writer bursting with talent and imagination who deftly handles this aching love story with sensitivity and unexpected maturity. You Lost Me There is a treasure of a book filled with beautiful, intelligent prose, a book that wears its smarts lightly and probes its emotions deeply. Watch a Video

While Haiti established

the second independent nation in the Western Hemisphere and was the first black country to gain independence from European colonizers, its history is not well known in the Anglophone world. The Haiti Reader introduces readers to Haiti's dynamic history and culture from the viewpoint of Haitians from all walks of life. Its dozens of selections—most of which appear here in English for the first time—are representative of Haiti's scholarly, literary, religious, visual, musical, and political cultures, and range from poems, novels, and political tracts to essays, legislation, songs, and folk tales. Spanning the centuries between

precontact indigenous Haiti and the aftermath of the 2010 earthquake, the Reader covers widely known episodes in Haiti's history, such as the U.S. military occupation and the Duvalier dictatorship, as well as overlooked periods such as the decades immediately following Haiti's "second independence" in 1934. Whether examining issues of political upheaval, the environment, or modernization, The Haiti Reader provides an unparalleled look at Haiti's history, culture, and politics.

How did cranes come to symbolize matrimonial happiness? Why were magpies the only creatures that would not go inside Noah's

Ark? Birds and bird imagery are integral parts of our language and culture. With her remarkable ability to dig up curious and captivating facts, Diana Wells hatches a treat for active birders and armchair enthusiasts alike. Meet the intrepid adventurers and naturalists who risked their lives to describe and name new birds. Learn the mythical stories of the gods and goddess associated with bird names. Explore the avian emblems used by our greatest writers--from Coleridge's albatross in "The Ancient Mariner" to Poe's raven. A sampling of the bird lore you'll find inside: Benjamin Franklin didn't want the bald eagle on our National Seal because of its

"bad moral character," (it steals from other birds); he lobbied for the turkey instead. Chaffinches, whose Latin name means "unmarried," are called "bachelor birds" because they congregate in flocks of one gender. Since mockingbirds mimic speech, some Native American tribes fed mockingbird hearts to their children, believing it helped them learn language. A group of starlings is called a murmuration because they chatter so when they roost in the thousands. Organized alphabetically, each of these bird tales is accompanied by a two-color line drawing. Dip into 100 Birds and you'll never look at a sparrow, an ostrich, or a wren in quite the same way.
