BEATRICE WESTON

Tuck Everlasting UNM Press

An exquisite, lovingly crafted meditation on plants, trees, and our place in the natural world, in the tradition of Robin Wall Kimmerer's *Braiding Sweetgrass* and Annie Dillard's *Pilgrim at Tinker Creek* "I was tired of speed. I wanted to live tree time." So writes Sumana Roy at the start of *How I Became a Tree*, her captivating, adventurous, and self-reflective vision of what it means to be human in the natural world. Drawn to trees' wisdom, their nonviolent way of being, their ability to cope with loneliness and pain, Roy movingly explores the lessons that writers, painters, photographers, scientists, and spiritual figures have gleaned through their engagement with trees—from Rabindranath Tagore to Tomas Tranströmer, Ovid to Octavio Paz, William Shakespeare to Margaret Atwood. Her stunning meditations on forests, plant life, time, self, and the exhaustion of being human evoke the spacious, relaxed rhythms of the trees themselves. Hailed upon its original publication in India as "a love song to plants and trees" and "an ode to all that is unnoticed, ill, neglected, and yet resilient," *How I Became a Tree* blends literary history, theology, philosophy, botany, and more, and ultimately prompts readers to slow down and to imagine a reenchanting world in which humans live more like trees.

The Biggest Christmas Tree Ever Crown

Publisher Description

The Giving Tree Harper Collins

Augustus Caesar was Rome's first emperor, but exactly how he came to claim that title is a long and exciting story. It begins in Rome in 63 BCE when a baby boy named Gaius Octavius Thurinus is born. During his lifetime he would be known by several other names, but none so celebrated as Augustus. The nephew of Julius Caesar, Augustus inherited his role as leader of Rome. But blood would not be enough to retain the title. He would have to fight for it—and fight he did. Emerging victorious against all those who tried to usurp his power, Augustus became one of the most powerful men in not just Rome, but the Juvenile Nonfiction / History / General [BISAC] of the world.

Mr. Willowby's Christmas Tree Harper Collins

In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

[The Education of Little Tree](#) Anchor

Tall Tall Tree is a tribute to the last remaining old-growth

redwood forests that stand along the northern Californian coast. The perfect forest book for kids, *Tall Tall Tree* includes accurate scientific information about redwood trees and the habitat they create, making this book important for young readers at home and in the classroom. *Tall Tall Tree* is the perfect California book for kids eager to learn about the state and its surrounding environment. With its counting format and rhyming text, this book doubles as a counting book for kids and young readers. There's a world teeming with life that very few people ever see. Take a peek at some of the animals that make their home in a *Tall Tall Tree*—a magnificent coast redwood. Count the animals, one through ten—chipmunks chattering, bats roosting, slugs sliding, and many more. Tony Frederick's playful rhyme makes this a book young children will want to look at and listen to again and again, while early readers will enjoy reading it on their own. The turn of every page reveals a unique perspective on the redwood's many moods, illustrated with Chad Wallace's stunning colors. Enriching STEAM activities complement the content. Come discover and explore this wild and magic world! Parents, teachers, gift givers, and many others will find: backmatter includes further information about redwood trees and the animals that live there An explore more section for teachers & parents includes STEAM activities and further learning websites A book for young readers learning how to count!

Legacy of Luna Knopf

Winner of the Pulitzer Prize in Fiction Shortlisted for the Man Booker Prize New York Times Bestseller A New York Times Notable Book and a Washington Post, Time, Oprah Magazine, Newsweek, Chicago Tribune, and Kirkus Reviews Best Book of 2018 "The best novel ever written about trees, and really just one of the best novels, period." —Ann Patchett *The Overstory*, winner of the 2019 Pulitzer Prize in Fiction, is a sweeping, impassioned work of activism and resistance that is also a stunning evocation of—and paean to—the natural world. From the roots to the crown and back to the seeds, Richard Powers's twelfth novel unfolds in concentric rings of interlocking fables that range from antebellum New York to the late twentieth-century Timber Wars of the Pacific Northwest and beyond. There is a world alongside ours—vast, slow, interconnected, resourceful, magnificently inventive, and almost invisible to us. This is the story of a handful of people who learn how to see that world and who are drawn up into its unfolding catastrophe.

The Great Kapok Tree Penguin

The neem tree, one of the most promising of all plants, may eventually benefit every person on the planet. Probably no other plant yields as many varied products or has as many exploitable by-products. Indeed, as foreseen by some scientists, this tree may usher in a new era in pest control; provide millions with inexpensive medicines; cut the rate of population growth; and perhaps even reduce erosion, deforestation, and the excessive temperature of an overheated globe. On the other hand, although the enthusiasm may be justified, it is largely founded on exploratory investigations and empirical and anecdotal evidence. The purpose of this book is to marshal the various facts about

this little-known species, to help illuminate its future promise, and to speed realization of its potential.

Wishtree University of North Texas Press

Visited by millions of people every year, the Grand Canyon is one of the Seven Natural Wonders of the World. It is also a multi-story home to all kinds of animals and plants. The award-winning team of "The Ever-Living Tree brings to life the awesome story of one of our country's greatest national treasures, with breathtaking illustrations and illuminating prose. The Ever-Living Tree National Academies Press

DIVPerhaps the world's most distinctive tree, ginkgo has remained stubbornly unchanged for more than two hundred million years. A living link to the age of dinosaurs, it survived the great ice ages as a relic in China, but it earned its reprieve when people first found it useful about a thousand years ago. Today ginkgo is beloved for the elegance of its leaves, prized for its edible nuts, and revered for its longevity. This engaging book tells the full and fascinating story of a tree that people saved from extinction—a story that offers hope for other botanical biographies that are still being written./divDIV /divDIVInspired by the historic ginkgo that has thrived in London's Kew Gardens since the 1760s, renowned botanist Peter Crane explores the evolutionary history of the species from its mysterious origin through its proliferation, drastic decline, and ultimate resurgence. Crane also highlights the cultural and social significance of the ginkgo: its medicinal and nutritional uses, its power as a source of artistic and religious inspiration, and its importance as one of the world's most popular street trees. Readers of this extraordinarily interesting book will be drawn to the nearest ginkgo, where they can experience firsthand the timeless beauty of the oldest tree on Earth./div

The many different animals that live in a great kapok tree in the Brazilian rainforest try to convince a man with an ax of the importance of not cutting down their home.

Living in the Woods in a Tree Yale University Press

Critically acclaimed when it was first published, Tuck Everlasting has become a much-loved, well-studied modern-day classic. This anniversary edition features an in-depth interview conducted by Betsy Hearne in which Natalie Babbitt takes a look at Tuck Everlasting twenty-five years later. What if you could live forever? Is eternal life a blessing or a curse? That is what young Winnie Foster must decide when she discovers a spring on her family's property whose waters grant immortality. Members of the Tuck family, having drunk from the spring, tell Winnie of their experiences watching life go by and never growing older. But then Winnie must decide whether or not to keep the Tucks' secret—and whether or not to join them on their never-ending journey. Praise for Tuck Everlasting by Natalie Babbitt: "A fearsome and beautifully written book that can't be put down or forgotten." —The New York Times "Exciting and excellently written." —The New York Times Book Review "With its serious intentions and light touch the story is, like the Tucks, timeless." —Chicago Sun-Times "Probably the best work of our best children's novelist." —Harper's "Natalie Babbitt's great skill is spinning fantasy with the lilt and sense of timeless wisdom of the old fairy tales. . . . It lingers on, haunting your waking hours, making you ponder." —The Boston Globe "This book is as shapely, crisp, sweet, and tangy as a summer-ripe pear." —Entertainment Weekly This title has Common Core connections.

A Tree Grows in Brooklyn HarperCollins UK

The beloved American classic about a young girl's coming-of-age at the turn of the century, Betty Smith's A Tree Grows in Brooklyn is a poignant and moving tale filled with compassion and cruelty,

laughter and heartache, crowded with life and people and incident. The story of young, sensitive, and idealistic Francie Nolan and her bittersweet formative years in the slums of Williamsburg has enchanted and inspired millions of readers for more than sixty years. By turns overwhelming, sublime, heartbreaking, and uplifting, the daily experiences of the unforgettable Nolans are raw with honesty and tenderly threaded with family connectedness -- in a work of literary art that brilliantly captures a unique time and place as well as incredibly rich moments of universal experience.

Augustus Caesar Pantheon

This delightful book shows children the life cycle of trees, showing that trees are a renewable resource as their seeds can be planted to make new trees grow. It also discusses the need to remove sick, flammable and other dangerous trees as well as the various uses for wood from cut trees. All of it is so beautifully illustrated in full color that the lessons come alive for adults and children alike. Ideal for parents, teachers and children. By Roberta Burzynski. Illustrations by Juliette Watts.

Luna & Me W. W. Norton & Company

In accordance with prophecy, Avalon's existence is threatened in the year that stars stop shining and at the time when both the dark child and Merlin's heir are to be revealed.

American Chestnut Houghton Mifflin Harcourt

A REESE'S BOOK CLUB PICK Winner of the 2022 BookTube Silver Medal in Fiction * Shortlisted for the Women's Prize for Fiction "A wise novel of love and grief, roots and branches, displacement and home, faith and belief. Balm for our bruised times." -David Mitchell, author of Utopia Avenue A rich, magical new novel on belonging and identity, love and trauma, nature and renewal, from the Booker-shortlisted author of 10 Minutes 38 Seconds in This Strange World. Two teenagers, a Greek Cypriot and a Turkish Cypriot, meet at a taverna on the island they both call home. In the taverna, hidden beneath garlands of garlic, chili peppers and creeping honeysuckle, Kostas and Defne grow in their forbidden love for each other. A fig tree stretches through a cavity in the roof, and this tree bears witness to their hushed, happy meetings and eventually, to their silent, surreptitious departures. The tree is there when war breaks out, when the capital is reduced to ashes and rubble, and when the teenagers vanish. Decades later, Kostas returns. He is a botanist looking for native species, but really, he's searching for lost love. Years later a Ficus carica grows in the back garden of a house in London where Ada Kazantzakis lives. This tree is her only connection to an island she has never visited--- her only connection to her family's troubled history and her complex identity as she seeks to untangle years of secrets to find her place in the world. A moving, beautifully written, and delicately constructed story of love, division, transcendence, history, and eco-consciousness, The Island of Missing Trees is Elif Shafak's best work yet.

Dellia Hardie Grant Publishing

A blend of history, science, philosophy, and environmentalism, The Tree is an engaging and elegant look at the life of the tree and what modern research tells us about their future. There are redwoods in California that were ancient by the time Columbus first landed, and pines still alive that germinated around the time humans invented writing. There are Douglas firs as tall as skyscrapers, and a banyan tree in Calcutta as big as a football field. From the tallest to the smallest, trees inspire wonder in all of us, and in The Tree, Colin Tudge travels around the world—throughout the United States, the Costa Rican rain forest, Panama and Brazil, India, New Zealand, China, and most of Europe—bringing to life stories and facts about the trees around us: how they grow old, how they eat and reproduce, how they talk to one another (and they do), and why they came to exist in

the first place. He considers the pitfalls of being tall; the things that trees produce, from nuts and rubber to wood; and even the complicated debt that we as humans owe them. Tudge takes us to the Amazon in flood, when the water is deep enough to submerge the forest entirely and fish feed on fruit while river dolphins race through the canopy. He explains the “memory” of a tree: how those that have been shaken by wind grow thicker and sturdier, while those attacked by pests grow smaller leaves the following year; and reveals how it is that the same trees found in the United States are also native to China (but not Europe). From tiny saplings to centuries-old redwoods and desert palms, from the backyards of the American heartland to the rain forests of the Amazon and the bamboo forests, Colin Tudge takes the reader on a journey through history and illuminates our ever-present but often ignored companions.

This ultimate insider's guide reveals the secrets that none dare admit, told by a show biz veteran who's proven that you can sell your script if you can save the cat!

How I Became a Tree Harper Collins

“The Bean Trees is the work of a visionary. . . . It leaves you open-mouthed and smiling.” — Los Angeles Times A bestseller that has come to be regarded as an American classic, *The Bean*

Trees is the novel that launched Barbara Kingsolver’s remarkable literary career. It is the charming, engrossing tale of rural Kentucky native Taylor Greer, who only wants to get away from her roots and avoid getting pregnant. She succeeds, but inherits a three-year-old Native American girl named Turtle along the way, and together, from Oklahoma to Arizona, half-Cherokee Taylor and her charge search for a new life in the West. Hers is a story about love and friendship, abandonment and belonging, and the discovery of surprising resources in seemingly empty places. This edition includes a P.S. section with additional insights from the author, background material, suggestions for further reading, and more.

Fish in a Tree Doubleday Books for Young Readers

Examines the Mayan, Aztec, and other related cultures from the perspective of each region's shifting understanding of the human soul. The author shows that despite their amazing achievements, these civilisations eventually crumbled because they lost touch with their sense of community, their true natures and their environments.

The Journey of Oliver K. Woodman Yale University Press

"Social activism combines with environmentalism in this picture book bio of Julia Butterfly Hill and Luna, the thousand-year-old redwood tree whose life she saved"--
