Autoethnography for Librarians and Information Scientists illustrates that autoethnography is a rich qualitative research method that can enhance understanding of one's own work experiences, whilst also facilitating the design of tailored experiences for a variety of audiences. Starting with the position that librarians and information scientists require deep insight into people's experiences, needs and information behaviour in order to design appropriate services and information interventions, this book shows that using only conventional methods, such as questionnaires and focus groups, is insufficient. Arguing that autoethnography can provide unique insights into users' cultural experiences and needs, contributors to this volume introduce the reader to different types of autoethnography. Highlighting common challenges and clarifying how autoethnography can be combined with other research methods, this book will empower librarians and information scientists to conceptualise topics for autoethnographic research, whilst also ensuring that they adhere to strict ethical guidelines. Chapters within the volume also demonstrate how to produce autoethnographic writing and stress the need to analyse autoethnographies produced by others. Autoethnography for Librarians and Information Scientists is essential reading for any librarian, information scientist or student looking to deepen their understanding of their own experiences. It will be particularly useful to those engaged in the study of service provision, user studies and information behaviour.

In the mid-sixteenth century, at almost 60 years of age, Titian invented a new way of painting: the paint was applied to the canvas rapidly and freely and overlaid with brushstrokes that were both light and dense: the forms broke up and a great sensuality and profound spirituality became evident. Titian used an extraordinarily prescient technique to create engaging, stirring painting that in some ways seems to relate to the literary work of the poet Torquato Tasso and even take up the imaginary writings of Ludovico Ariosto published in Venice in the 1530s. Such a painting style had never previously been imagined and was so revolutionary that it was to influence many artists of subsequent centuries through to the modern age. Late Titian became the yardstick not only for younger contemporary painters like Tintoretto, Veronese and Bassano, but also great artists of subseqent cewnturies like Rubens, Rembrandt, Velazquez, Gericault and Delacroix and on to the Expressionists.

Kids and teachers can build their own science projects based on exhibits from San Francisco's premiere science museum This revised and updated edition offers instructions for building junior versions, or "snacks," of the famed Exploratorium's exhibits. The snacks, designed by science teachers, can be used as demonstrations, labs, or as student science projects and all 100 projects are easy to build from common materials. The Exploratorium, a renowned hands-on science museum founded by physicist and educator Frank Oppenheimer, is noted for its interactive exhibits that richly illustrate scientific concepts and stimulate learning. Offers a step-by-step guide for building dynamic science projects and exhibits Includes tips for creating projects made from easy-to-assembly items Thoroughly revised and updated, including new "snacks," images, and references

**Accrual Practices and Reform Experiences in OECD Countries** Springer-Verlag

The book consists of five parts and a concluding chapter. Part 1 covers general problems and presents solutions for the harmonisation of data from different national and/or cultural contexts. In the second part EUROSTAT and ESOMAR present their established standard instruments. Tested instruments each covering one variable (i.e. occupation, education) are presented in the third part. The fourth part again includes suggested tools for the harmonisation of single variables for which standardised instruments are not yet available (i.e. age, religion, ethnicity, household, family, income). The last part presents selected empirical analyses demonstrating the use and fruitfulness of instruments presented before. This book is mainly written for two groups. First, researchers and practitioners involved in comparative research in Europe. Second, researchers working with data of the statistical offices of European countries and data from institutions of the European Union.

Christine Snowdon is an Author, a Columnist with Magna Intuitum, a Spiritual Angelic Reiki Master Teacher, a Clairaudient Channeller, and a Clairsentient and Clairvoyant Communicator; who has worked for Russell Grant's team of psychics. Her photos of real angels in the sky have been published by the Daily Mail and Sun national newspapers, Croydon Advertiser, MU Magazine Japan and Magna Intuitum. On 25 August 2015, COLIN FRY, Britain's leading psychic medium died of lung cancer and a short time after he joined Christine as her spirit guide. She states: 'ANGELS' LOVE published in 2017 includes conversations with the sometimes irreverent COLIN FRY, my new spirit guide and GEORGE MICHAEL who both connect with me with much gaiety and laughter! There are no tears in Heaven! I record everything they say to me and with a huge input from the colourful Colin

Fry are the heartbreaking stories that were unveiled to me during readings with clients at a crossroads in their lives. I was visited in the middle of night by my own "Uncle Albert" who died, "aged 18," on board the infamous sinking of Britain's biggest battleship "HMS Hood" by the "Bismarck" in 1941. Why did "Tara" forgive her abusive father, now in spirit? What stopped "Peter" believing in the existence of spirit life even though his deceased mother had been a spiritual medium all her life? I believe it's never too late to contact deceased loved ones and you will not have to look very far in these stories to find evidence that our spirit continues to live on in another world. 'Angels' Love' also delivers strong messages of inspirational guidance from Archangel Michael, White Eagle and for benefit of all mankind God channels many new spiritual truths to uplift and teach us all." "Christine is a most dedicated medium and psychic; for two years now we have made a good spirit team..." COLIN FRY. "'Angels' Love' is written from the heart ..." THERESA CHEUNG, Sunday Times best selling Angels Author.

Winner of the Eisner Award for Talent Deserving Wider Recognition, the International Comics Festival Award for Best Debut Graphic Novel (Angouleme, France), and voted by Wizard Magazine as the best indie graphic novel of all time. "A convincing, absorbing and satisfying fictional portrait of post-college life in New York City."-- Publishers Weekly "A salute to comics, an exploration of the human condition, and a solid, absorbing, and riotously snide tale about at least half of the things that make life important."-- Tasha Robinson, The AV Club "Box Office Poison is a novel complex enough to provoke Book Talk. I even marked panels with post-it notes as I was reading so that I'd remember to show them to my friends."-- Kelly Sue DeConnick, Artbomb.com "The comic book equivalent of the world's best pineapple upside-down cake: layer upon layer of rich dramatic goodness."-- Matthew Craig, Robotfist.com "Box Office Poison is to the comic book culture as Almost Famous is to that of rock and roll."-- Chris Tamarri, The Daily Targum This 608-page epic story of Sherman, Dorothy, Ed, Stephen, Jane, and Mr. Flavor is a true comics masterpiece. Alex Robinson's completely natural and inspiring knack for dialogue makes this story of dreary jobs, comic books, love, sex, messy apartments, girlfriends (and the lack thereof), undisclosed pasts, and crusty old professionals one of the most delightful and whimsical graphic novels to hit the stands in years.

**Frogs Jump** Marsilio

Howard Rheingold tours the "virtual community" of online networking. Howard Rheingold has been called the First Citizen of the Internet. In this book he tours the "virtual community" of online networking. He describes a community that is as real and as much a mixed bag as any physical community—one where people talk, argue, seek information, organize politically, fall in love, and dupe others. At the same time that he tells moving stories about people who have received online emotional support during devastating illnesses, he acknowledges a darker side to people's behavior in cyberspace. Indeed, contends Rheingold, people relate to each other online much the same as they do in physical communities. Originally published in 1993, The Virtual Community is more timely than ever. This edition contains a new chapter, in which the author revisits his ideas about online social communication now that so much more of the world's population is wired. It also contains an extended bibliography.

[Late Titian and the Sensuality of Painting](#) University of Chicago Press

This publication examines Austrian multimedia artist Heimo Zobernig's (born 1958) work with painting, sculpture, architecture, graphic and furniture design, video, performance and music. Focusing on simple, geometric forms of abstraction, Zobernig uses everyday materials such as cardboard, styrofoam, pressboard, linen and fluorescent lights.

**Zeitschriften Deutschland, Österreich, Schweiz** University of Chicago Press

This study looks at accounting and budgeting practices at the national government level in OECD countries. It discusses the challenges and benefits of accruals reforms and considers what steps countries are taking to make better use of accrual information in the future.

The Body Impolitic is a critical study of tradition, not merely as an ornament of local and national heritage, but also as a millstone around the necks of those who are condemned to produce it. Michael Herzfeld takes us inside a rich variety of small-town Cretan artisans' workshops to show how apprentices are systematically thwarted into learning by stealth and guile. This harsh training reinforces a stereotype of artisans as rude and uncultured. Moreover, the same stereotypes that marginalize artisans locally also operate to marginalize Cretans within the Greek nation and Greece itself within the international community. What Herzfeld identifies as "the global hierarchy of value" thus frames the nation's ancient monuments and traditional handicrafts as evidence of incurable "backwardness." Herzfeld's sensitive observations offer an intimately grounded way of understanding the effects of globalization and of one of its most visible offshoots, the heritage industry, on the lives of ordinary people in many parts of the world today.

Our intuition on how the world works could well be wrong. We are surprised when new competitors burst on the scene, or businesses protected by large and deep moats find their defenses easily breached, or vast new markets are conjured from nothing. Trend lines resemble saw-tooth mountain ridges. The world not only feels different. The data tell us it is different. Based on years of research by the directors of the McKinsey Global Institute, No Ordinary Disruption: The Four Forces Breaking all the Trends is a timely and important analysis of how we need to reset our intuition as a result of

four forces colliding and transforming the global economy: the rise of emerging markets, the accelerating impact of technology on the natural forces of market competition, an aging world population, and accelerating flows of trade, capital and people. Our intuitions formed during a uniquely benign period for the world economy—often termed the Great Moderation. Asset prices were rising, cost of capital was falling, labour and resources were abundant, and generation after generation was growing up more prosperous than their parents. But the Great Moderation has gone. The cost of capital may rise. The price of everything from grain to steel may become more volatile. The world's labor force could shrink. Individuals, particularly those with low job skills, are at risk of growing up poorer than their parents. What sets No Ordinary Disruption apart is depth of analysis combined with lively writing informed by surprising, memorable insights that enable us to quickly grasp the disruptive forces at work. For evidence of the shift to emerging markets, consider the startling fact that, by 2025, a single regional city in China—Tianjin—will have a GDP equal to that of the Sweden, of that, in the decades ahead, half of the world's economic growth will come from 440 cities including Kumasi in Ghana or Santa Carina in Brazil that most executives today would be hard-pressed to locate on a map. What we are now seeing is no ordinary disruption but the new facts of business life— facts that require executives and leaders at all levels to reset their operating assumptions and management intuition.

A number of years ago, Douglas Harper moved to northern New York to teach in a small college. Upon his arrival there his department chairman noted his eight-year-old Saab and said, "You'll be meeting Willie." Harper spent the next years establishing not only a working relationship but a friendship with Willie. In *Working Knowledge*, he introduces us to Willie, a mechanic and jack-of-all-trades. With this engaging and insightful profile—part biography, part ethnography, and part photo essay—Harper documents what Willie does and how he does it. Harper's dignified portrait captures a disappearing feature of modern life—the essential human factor in the world of work.

*Poopology* Springer-Verlag

Illustrations provide humorous interpretations of the actions of animals from one frog to twelve whales.

**Angels' Love** Vandenhoeck & Ruprecht

This book is a legal practice guide for the collection, storage and analysis of personal and other data in Big Data applications. It contains numerous guidelines and graphic illustrations/graphics to offer well-founded, practice-oriented support. The book illuminates the legal scope of Big Data and at

the same time closes a gap in the legal literature on the subject. Its content goes beyond the purely data protection law view and combines questions in the Big Data environment, among others, from the legal sources, the protection of industrial property rights and data protection. In addition to personal data, the book also looks at non-personal data (technical data or anonymous data), which is often mixed together for Big Data analyses. These different types of data may originate from different rightholders, may be subject to different national laws, may require different legal bases and/or may be used for different analysis purposes.

DIE REIHE: LITERATUR- UND NATURWISSENSCHAFTEN entsteht unter Federführung des Erlanger Forschungszentrums für Literatur- und Naturwissenschaften (ELINAS). Experten unterschiedlicher Fachkulturen führen darin ihre Methoden zusammen und fragen sowohl nach den Funktionen der Sprache in der naturwissenschaftlichen Forschung als auch nach den Verfahren der Modellierung naturwissenschaftlicher Erkenntnisse in der Literatur. Die Reihe versteht sich als ein interdisziplinäres Forum zur Reflexion der kulturellen Bedeutung natur- und literaturwissenschaftlicher Forschung sowie zur Ethik und Rhetorik wissenschaftlicher Argumentation.

**Admiralty List of Radio Signals** Top Shelf Productions

The Nuremberg Miscellany [Germanisches Nationalmuseum Nürnberg, Bibliothek, 8° Hs. 7058 (RI. 203)] is a unique work of scribal art and illumination. Its costly parchment leaves are richly adorned and illustrated with multicolour paint and powdered gold. It was penned and illustrated in southern Germany – probably Swabia – in 1589 and is signed by a certain Eliezer b. Mordechai the Martyr. The Miscellany is a relatively thin manuscript. In its present state, it holds a total of 46 folios, 44 of which are part of the original codex and an additional bifolio that was attached to it immediately or soon after its production. The book is a compilation of various Hebrew texts, most of which pertain to religious life. Others are home liturgies, Biblical exegeses, comments on rites and customs, moralistic texts, homiletic and ethical discourses, and an extensive collection of home liturgies, its major part being dedicated to the life cycle. The unparalleled text compilation of the Nuremberg Miscellany on the one hand, and the naïve, untrained illustrations on the other hand, are puzzling. Its illustrations are hardly mindful of volume, depth or perspective, and their folk-art nature suggests that an unprofessional artist, possibly even the scribe himself, may have executed them. Whoever the illustrator was, his vast knowledge of Jewish lore unfolds layer after layer in a most intricate way. His sharp eye for detail renders the images he executed a valid representation of contemporary visual culture. The iconography of the Nuremberg Miscellany, with its 55 decorated leaves, featuring 25 text illustrations, falls into two main categories: biblical themes, and depictions of daily life, both sacred and mundane. While the biblical illustrations rely largely on artistic rendering and interpretation of texts, the depictions of daily life are founded mainly on current furnishings and accoutrements in Jewish homes. The customs and rituals portrayed in the miscellany attest not only to the local Jewish Minhag, but also to the influence and adaptation of local Germanic or Christian rites. They thus offer first-hand insights to the interrelations between the Jews and their neighbors. Examined as historical documents, the images in the Nuremberg Miscellany are an invaluable resource for reconstructing Jewish daily life in Ashkenaz in the early modern period. In a period from which only scanty relics of Jewish material culture have survived, retrieving the pictorial data from images incorporated in literary sources is of vital importance in providing the missing link. Corroborated by similar objects from the host society and with descriptions in contemporary Jewish and Christian written sources, the household objects, as well as the ceremonial implements depicted in the manuscript can serve as effective mirrors for the material culture of an affluent German Jewish family in the Early Modern period. The complete Nuremberg Miscellany is reproduced in the appendix of this book.
