The Independent Man: Or, an Essay on the Formation and Development of Those Principles and Faculties of the Human Mind which Constitute Moral and Intellectual Excellence BRILL

Environ 200 millions de personnes (soit 5 % de la population mondiale âgée de 15 à 64 ans) ont consommé des drogues illicites au moins une fois au cours des 12 derniers mois. Presque tous les pays de la planète sont représentés parmi ces consommateurs. Plus de personnes participent à la production et au trafic de drogues illicites, et plus encore en subissent les conséquences socioéconomiques dévastatrices. En raison d'une part de l'étendue du problème, et d'autre part de sa nature illicite et dissimulée, les analyses et les statistiques fiables sur la production, le trafic et la consommation des drogues illicites sont rares. Le Rapport mondial sur les drogues de 2006 tente de combler cette lacune. Il offre l'un des aperçus les plus complets qui soient des tendances en matière de drogues illicites au niveau international. On y trouve en outre un chapitre thématique spécial sur le cannabis, qui est de loin la drogue la plus produite, trafiquée et consommée dans le monde. L'analyse des tendances (qui remontent parfois à 10 ans et plus) est présentée dans le volume 1. Les statistiques détaillées figurent dans le volume 2. Ensemble, ces deux volumes représentent la synthèse la plus complète à ce jour de la situation des drogues illicites dans le monde.

The importance of the discipline of textual criticism received an enormous boost from the discovery of the Dead Sea Scrolls showing that the study of these ancient documents is absolutely necessary for the exegesis of the Biblical literature. Textus covers that area as well as many additional ones, pertaining to all the fields that are traditionally studied by textual critics.

Designed for one-semester intermediate French courses, SUR LE VIF offers a contextualized review of the fundamentals, adding just enough new material to expand the language skills of students without overwhelming them. The text is divided into an in-class conversation manual and an out-of-class grammar reference, giving instructors the flexibility to choose among readings, activities, and grammar practice to meet the varied needs of intermediate students. In nine short chapters, SUR LE VIF encompasses a full-length intermediate course with its provocative readings, active grammar review, and updated cultural notes. The program also takes into account the importance of audio and visual elements: the Prelude (before Chapter 1), two Interludes (after Chapters 3 and 6), and Postlude (after Chapter 9) contain new songs and follow-up activities. By skillfully weaving grammar review into thought-provoking chapter themes, SUR LE VIF provides a solid review of first-year French while adding refinements for improved skills in reading, listening, composition, and conversation. "Following on the successes of two previous dictionary projects, the CRC World Dictionary of Plant Names and the CRC World Dictionary of the Grasses, Umberto Quattrocchi has undertaken this dictionary of economically important plants.... He has done for these plants what was so admirably done in his other

works—brought the vast and scattered literature on plant names, and in this case, too, their uses, into coherent order so that the inquisitive scholar can get a foothold." —From the Foreword, Donald H. Pfister, Harvard University and Harvard University Herbaria, Cambridge, Massachusetts
The CRC World Dictionary of Medicinal and Poisonous Plants: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology provides the starting point for better access to data on plants used around the world in medicine, food, and cultural practices. The material found in the five volumes has been painstakingly gathered from papers of general interest, reports and records, taxonomic revisions, field studies, herbaria and herbarium collections, notes, monographs, pamphlets, botanical literature, and literature tout court. It includes sources available at various natural history libraries, floras and standard flora works, local floras and local histories, nomenclatural histories, and the International Code of Botanical Nomenclature. Much more than a dictionary, the book provides the names of thousands of genera and species of economically important plants, concise summaries of plant properties, and appropriate observations about medicinal uses. Drawing from a tremendous range of primary and secondary sources, it is an indispensable time-saving guide for all those involved with botany, herbal medicine, pharmacognosy, toxicology, medicinal and natural product chemistry, and agriculture.
