A monumental retelling of world history through the lens of the sea—revealing in breathtaking depth how people first came into contact with one another by ocean and river, lake and stream, and how goods, languages, religions, and entire cultures spread across and along the world's waterways, bringing together civilizations and defining what makes us most human. The Sea and Civilization is a mesmerizing, rhapsodic narrative of maritime enterprise, from the origins of long-distance migration to the great seafaring cultures of antiquity; from Song Dynasty human-powered paddle-boats to aircraft carriers and container ships. Lincoln Paine takes the reader on an intellectual adventure casting the world in a new light, in which the sea reigns supreme. Above all, Paine makes clear how the rise and fall of civilizations can be linked to the sea. An accomplishment of both great sweep and illuminating detail, *The Sea and Civilization* is a stunning work of history.

"Thrillingly tells the story of an Eastern European Jew's flight from the Holocaust and the years he spent fighting in the French underground." —USA Today An American Library in Paris Book Award "Coups de Coeur" Selection The Art of Resistance is unlike any World War II memoir before it. Its author, Justus Rosenberg, has spent the past seventy years teaching the classics of literature to American college students. Hidden within him, however, was a remarkable true story of wartime courage and romance worthy of a great novel. Here is Professor Rosenberg's elegant and gripping chronicle of his youth in Nazi-occupied Europe, when he risked everything to stand against evil. In 1937, after witnessing a violent Nazi mob in his hometown of Danzig, a majority German city on the Baltic Sea, sixteen-year-old Justus Rosenberg was sent by his Jewish parents to Paris to finish his education in safety. Three years later, the Nazis came again, as France fell to the Germans. Alone and in danger, Justus fled Paris, heading south. A chance meeting led him to Varian Fry, an American journalist in Marseille who led a clandestine network helping thousands of men and women—including many legendary artists and intellectuals, among them Hannah Arendt, Marc Chagall, Andre Breton, and Max Ernst—escape the Nazis. With his intimate understanding of French and German culture, and fluency in several languages, including English, Justus became an invaluable member of Fry's operation as a spy and scout. After the Vichy government expelled Fry from France, Justus worked in Grenoble, recruiting young men and women for the Underground Army. For the next four years, he would be an essential component of the Resistance, relying on his wits and skills to survive several close calls with death. Once, he found himself in a Nazi internment camp, with his next stop Auschwitz—and yet Justus found an ingenious way to escape. He two years during the war gathering intelligence, surveying German installations and troop movements on the Mediterranean. Then, after the allied invasion at Normandy in 1944, Justus became a guerrilla fighter, participating in and leading commando raids to disrupt the German retreat across France. At the end of the Second World War, Justus emigrated to America, and built a new life. For the past fifty years, he has taught literature at Bard College, shaping the inner lives of generations of students. Now he adds his own story to the library of great coming-of-age memoirs: *The Art of Resistance* is a powerful saga of bravery and defiance, a true-life spy thriller touched throughout by a professor's wisdom.

Although usually associated with the 1920s and the '30s, in fact the Art Deco style had begun to emerge in France prior to the advent of the First World War. But it was during the interwar years that the style, reaching full maturity, was adopted by the international elite as the perfect expression of modern opulence and elegance, and to this day Art Deco designs are redolent of the age of Jazz, cocktails, the Charleston, speakeasies, Hollywood glamour, New York skyscrapers and, above all, style. The '20s was also a period of great technological advances in engineering and transportation, and the perpetual modernity and futuristic aura of Art Deco are evocative of this too. Here, BBC Antiques Roadshow expert Eric Knowles provides a lavishly illustrated guide to this most alluring and timeless of styles.

A physician who applied his knowledge of chemistry to the manufacture of a widely used antiseptic, Albert Barnes is best remembered as one of the great American art collectors. The Barnes Foundation, which houses his treasures, is a fabled repository of Impressionist, post-Impressionist, and early modern paintings. Less well known is the fact that Barnes attributed his passion for collecting art to his youthful experience of African-American culture, especially music. *Art, Education, and African-American Culture* is both a biography of an iconoclastic and innovative figure and a study of the often-conflicted efforts of an emergent liberalism to seek out and showcase African American contributions to the American aesthetic tradition. Mary Ann Meyers examines Barnes's background and career and the development and evolution of his enthusiasm for collecting pictures and sculpture. She shows how Barnes's commitment to breaking down invidious distinctions and his use of the uniquely arranged works in his collection as textbooks for his school, created a milieu where masterpieces of European and American late-nineteenth and early-twentieth century painting, along with rare and beautiful African art objects, became a backdrop for endless feuding. A gallery requiring renovation, a trust prohibiting the loan or sale of a single picture, and the efforts of Lincoln University, known as the "black Princeton," to balance conflicting needs and obligations all conspired to create a legacy of legal entanglement and disputes that remain in contention. This volume is neither an idealized account of a quixotic do-gooder nor is it a critique of a crank. While fully documenting Barnes's notorious eccentricities along with the clashing interests of the main personalities associated with his Foundation, Meyers eschews moral posturing in favor of a rich mosaic of peoples and institutions that illustrate many of the larger themes of American culture in general and African-American culture in particular. *Art + Paris Impressionist North of Paris and Normandy* Courier Dover Publications

The dean of ocean-liner historians brings to life one of the last transatlantic liners: the legendary France, later renamed Norway. As a dedicated passenger during both the vessel's lives, John Maxtone-Graham is in a perfect position to give us this rich, profusely illustrated history of France/Norway. The French Line's dazzling ocean liner S.S. France was alone in her class until the arrival of the QE2 in 1967. She was fast, chic, lavishly manned, and offered sumptuous catering. For a dozen years she was a star on the North Atlantic. However, in the summer of 1974, with jet airliners dominating transatlantic travel, France was withdrawn and allowed to molder for five years. Then a miraculous reprieve: the head of Norwegian Cruise Line decided to buy France; the vessel was revamped for warm weather and rechristened Norway. One of the last North Atlantic liners became the Caribbean's first megaship. The singularity of this incredible hull that sailed in two contrasting modes demands remembrance—she was the

pioneering big ship, popularizing a scale of cruising then unknown.

A magnificent tribute to the illustrious and ill-fated steamship. Normandiewas unquestionably the most beautiful ocean liner ever built. The centuries-long history of the Louvre, from humble fortress to Royal palace to the world's greatest art museum—with photos and building maps. Some ten million people from all over the world flock to the Louvre each year to enjoy its incomparable art collection. Yet few of them are aware of the remarkable history of the site and buildings themselves—a fascinating story that historian James Gardner elegantly chronicles in this authoritative history. More than seven thousand years ago, men and women camped on a spot called le Louvre for reasons unknown.

Centuries later, King Philippe Auguste of France constructed a fortress there, just outside the walls of a nascent Paris. Intended to protect the capital against English soldiers stationed in Normandy, the fortress became a royal residence under Charles V two centuries later, and then the monarchy's principal residence under the great Renaissance king François I. In 1682, when Louis XIV moved his court to Versailles, the Louvre languished until the French Revolution when, during the Reign of Terror in 1793, it first opened its doors to display the nation's treasures. Ever since—through the Napoleonic era, the Commune, two World Wars, to the present—the Louvre has been a witness to French

history, and expanded to become home to a legendary art collection that includes the Mona Lisa and Venus de Milo. Includes sixteen pages of full-color photos illustrating the history of the Louvre, a full-color map detailing its evolution from fortress to museum, and black-and-white images throughout the narrative. *Titanic Tragedy: A New Look at the Lost Liner* HarperCollins In an engaging and anecdotal social history, Siân Evans's *Maiden Voyages* explores how women's lives were transformed by the Golden Age of ocean liner travel between Europe and North America. During the early twentieth century, transatlantic travel was the province of the great ocean liners. It was an extraordinary undertaking made by many women, whose lives were changed forever by their journeys between the Old World and the New. Some traveled for leisure, some for work; others to reinvent themselves or find new opportunities. They were celebrities, migrants and millionaires, refugees, aristocrats and crew members whose stories have mostly remained untold—until now. *Maiden Voyages* is a fascinating portrait of the era, the ships themselves, and these women as they crossed the Atlantic. The ocean liner was a microcosm of contemporary society, divided by class: from the luxury of the upper deck, playground for the rich and famous, to the cramped conditions of steerage or third class travel. In first class you'll meet A-listers like Marlene Dietrich, Wallis Simpson, and Josephine Baker; the second class carried a new generation of professional and independent women, like pioneering interior designer Sibyl Colefax. Down in steerage, you'll follow the journey of émigré Maria Riffelmacher as she escapes poverty in Europe. Bustling between decks is a crew of female workers, including Violet "The Unsinkable Stewardess" Jessop, who survived the Titanic disaster. Entertaining and informative, *Maiden Voyages* captures the golden age of ocean liners through the stories of the women whose transatlantic journeys changed the shape of society on both sides of the globe. *The Mariner's Mirror* Bibliography for ...
