The educational system is

society's best ally and

should not be allowed to

break down. Our objective

in this study was to

identify the causes of high

dropout rates and low

passion for learning

among college students.

The common view that

students are lazy or

lacking interest in

education is unfounded.

On the contrary, we found

that, but for factors

beyond their control, most

students would work hard

to achieve their

educational objectives. To

avoid the judgmental

trap, students were asked

to identify the factors that

would unlock their passion

for learning. The factors

identified by the students

are analyzed in this book.

It is hoped that students,

parents, teachers, and

school authorities will find

this book a light to their

path. -- Udom Elijah Udom "Students lose interest in education and drop out of school for a number of reasons. Dr. Udom rightly turned to us, the students, to find out the factors that would restore our confidence in the education system and make us enroll and remain in school till graduation. I strongly recommend this book to my fellow students." -- Joseph J. Brown, Student "Our school system has experienced dramatic developments in recent decades, including low

motivation to learn among college students. Dr. Udom's book highlights the causes of students' lack of passion for learning and offers recommendations for a sustainable recruitment and retention of students. This book is one of the best that has been written on this topic and is strongly recommended as a reference material." -- Dr. William H. Kraus, associate professor, Argosy University, Nashville campus The Code of Federal Regulations of the United

States of America Xlibris Corporation This publication is the third in a series of annual reports giving a comparative analysis of business regulations and their enforcement across 155 countries and over time. Comparable data indicators are given for 10 topics: starting a business, dealing with licences, hiring and firing workers, registering property, getting credit, investment protection, paying taxes, trading across borders, enforcing contracts, and closing a

business. These indicators are used to assess socio-economic outcomes including levels of unemployment and poverty, productivity, investment and corruption; and to identify which regulatory measures enhance business activity and those that work to constrain it. This is a co-publication of the World Bank and the International Finance Corporation. *Patent Practice* Springer Tanzania aims to reach middle income status by

2025. Since the country's economic growth will increasingly require workforce with postsecondary training and skills, the education system needs to close systemic gaps and inefficiencies at the root of its current underperformance.

Corporations intending to do business in states other than their home state must first determine whether they need to qualify to do business there, and if so, fulfill the qualification requirements. But qualification can be a complex and time-consuming task. Also, the consequences of making the wrong decision can be

harsh, ranging from monetary penalties for a corporation to jail time for its officers and directors. To aid corporations in navigating these foreign waters, CSC developed *Qualifying to Do Business in Another State: The CSC 50-State Guide to Qualification*, a comprehensive toolbox to help you make the important decisions about qualifying in states where you plan to do business, complete with the documents required to implement that decision. This essential resource

includes: Case illustrations and discussion of business activities that do or do not trigger qualification requirements updated for the 2021 Edition. Insight into whether certain Internet activities require qualification. Annotated qualification statutes for all 50 states and the District of Columbia updated for the 2021 Edition.  Leaders are appointed by God. He does not usually call the qualified, but he qualifies the called—the ones he has called. In this book, you will discover how unpredictable God's ways are in relation to whom he calls for a particular assignment. Man could call to suit self, but God calls to suit all. The condition, circumstances, and demands of every call depends on the need of the moment. There is no doubt that His Excellency

Udom Emmanuel is a man of destiny, with a unique call for a unique service, especially when he sacrificed a highly rewarding career in banking as an executive director to answer the 'call'. There is a hint of good parenting, self-motivation, hard work, loyalty, divine orchestration, and the people's overwhelming support for a noble cause—which makes this publication an interesting read and a complete package for the inspiration of future

leaders.

Obi Okonkwo is an idealistic young man who, thanks to the privileges of an education in Britain, has now returned to Nigeria for a job in the civil service. However in

his new role he finds that the way of government seems to be backhanders and corruption. Obi manages to resist the bribes that are offered to him, but when he falls in love with an unsuitable girl - to the disapproval of his parents - he sinks further into emotional and financial turmoil. The lure of easy money becomes harder to refuse, and Obi becomes caught in a trap he cannot escape. Showing a man lost in cultural limbo, and a Nigeria entering a new age of disillusionment, No

This book explores different statistical quality technologies including recent advances and applications. Statistical

process control, acceptance sample plans and reliability assessment are some of the essential statistical techniques in quality technologies to ensure high quality products and to reduce consumer and producer risks. Numerous statistical techniques and methodologies for quality

control and improvement have been developed in recent years to help resolve current product quality issues in today's fast changing environment. Featuring contributions from top experts in the field, this book covers three major topics: statistical process

control, acceptance sampling plans, and reliability testing and designs. The topics covered in the book are timely and have a high potential impact and influence to academics, scholars, students and professionals in statistics, engineering, manufacturing and health.
