It also addresses the challenges of teaching in the context of globalization, pervasive social media, and increasing standards and accountability. "A pioneer in multicultural/social justice education for young children, this book reflects Patty Ramsey's life-long commitment to, and ever-deepening understanding of the issues, challenges, and hopes of inclusive, equitable early childhood programs. At a time when our country seems increasingly polarized over the value and meaning of justice for all, her insights and suggestions are as needed as ever." —Louise Derman-Sparks, international consultant on anti-bias education with children and adults, and co-author of *Leading Anti-Bias Early Childhood Programs: A Guide for Change* "This book is a timely, relevant resource for anyone who works with young children in any capacity. It supports practitioners to develop an individualized approach to infusing multicultural education—broadly defined—into their world views and work. Ramsey makes a clear and convincing case that multicultural education is not an 'add-on'; it is a vehicle for shaping children's lives and creating a more just society." —Takiema Bunche Smith, Director of the Early Education Leadership Institute at SCO/FirstStepNYC

Educational Metamorphoses Teachers College Press

Despite decades of effort to create fair classrooms and schools, gender bias is alive and well, and in some ways growing. School practices continue to send boys and girls down different life paths, too often treating them not as different genders but as different species. Teachers and parents often miss the subtle signs of sexism in classrooms. Through firsthand observations and up-to-the-minute research, *Still Failing at Fairness* brings the gender issue into focus. The authors provide an in-depth account of how girls' and boys' educations are compromised from elementary school through college, and offer practical advice for teachers and parents who want to make a positive difference. The authors examine today's pressing issues -- the lack of enforcement for Title IX, the impact of the backlash against gender equity, the much-hyped "boys' crisis," hardwired brain differences, and the recent growth of singlesex public schools. This book documents how teaching, current testing practices, and subtle cultural attitudes continue to short-circuit both girls and boys of every race, social class, and ethnicity. Hard-hitting and remarkably informative, *Still Failing at Fairness* is "a fascinating look into America's classrooms" (National Association of School Psychologists).

Handbook of Urban Education McGraw-Hill Education

Failing at Fairness, the result of two decades of research, shows how gender bias makes it impossible for girls to receive an education equal to that given to boys. Girls' learning problems are not identified as often as boys' are. Boys receive more of their teachers' attention. Girls start school testing higher in every academic subject, yet graduate from high school scoring 50 points lower than boys on the SAT. Hard-hitting and eye-opening, Failing at Fairness should be read by every parent, especially those with daughters.

Teachers, School and Society Routledge

The Handbook of Gender and Education brings together leading scholars on gender and education to provide an up-to-date and broad-ranging guide to the field. It is a comprehensive overview of different theoretical positions on equity issues in schools. The contributions cover all sectors of education from early years to higher education; curriculum subjects; methodological and theoretical perspectives; and gender identities in education. Each chapter reviews, synthesises and provides a critical interrogation of key contemporary themes in education. This approach ensures that the book will be an indispensable source of reference for a wide range of readers: students, academics and practitioners. The first section of the Handbook, Gender Theory and Methodology, outlines the various (feminist) perspectives on researching and exploring gender and education. The section critiques the notion of gender as a category in educational research and considers recent trends, evident especially in the gender and underachievement debates, to locate gender difference solely within biology. This section provides the broad background upon which the issues and debates in the other sections can be situated. Section two, Gender and Education, considers the differing ways in which gender has been shown to impact upon the opportunities and experiences of pupils/students, teachers and other adults in the different sectors of education. It also includes a chapter on single-sex schooling. Section three, Gender and School Subjects, comprises chapters that cover gender issues within the teaching and learning of particular school subjects (for example, maths, literacy, and science). It also includes topics such as sex education and assessment. The chapters in section four, Gender, identity and educational sites, address up-to-date issues which have a long history in terms of explorations into gender and educational opportunities. More recent inclusions in the debates, such as disability, sexuality, and masculinities are discussed alongside the more traditional concerns of 'race', social class and femininities. The final section, Working in Schools and Colleges,

illuminates the working lives of teachers and academics. The chapters cover such topics as school culture, career progression and development, and the gendered identities of professionals within educational institutions. The contributors to this book have been selected by the editors as authorities in their specific area of gender and education and are drawn from the international scholarly community.

The Politics of Education Waveland Press

An insider's account of the infamous Atlanta Public Schools cheating scandal that scapegoated black employees for problems rooted in the education reform movement. In March of 2013, 35 educators in the Atlanta Public Schools were charged with racketeering and conspiracy—the same charges used to bring down the American mafia—for allegedly changing students' answers on standardized tests. All but one was black. The youngest of the accused, Shani Robinson, had taught for only 3 years and was a new mother when she was wrongfully convicted and faced up to 25 years in prison. She and her coauthor, journalist Anna Simonton, look back to show how black children in Atlanta were being deprived long before some teachers allegedly changed the answers on their students' tests. Stretching all the way back to Brown v. Board of Education, the landmark 1954 Supreme Court ruling that outlawed segregation in public schools, to examining the corporate-led education reform movement, the policing of black and brown citizens, and widening racial and economic disparities in Atlanta, Robinson and Simonton reveal how real estate moguls and financiers were lining their pockets with the education dollars that should have been going to the classroom.

Still Failing at Fairness McGraw-Hill Humanities, Social Sciences & World Languages

'The Politics of Education' provides an introduction to both the political dimensions of schooling and the politics of recent educational reform debates. The book offers both undergraduates and starting graduate students in education an understanding of numerous dimensions of the contested field of education, addressing questions of political economy and class, cultural politics, race, gender, globalisation, neoliberalism, and biopolitics. Discussions work through contemporary reform debates that include some of the most widely discussed reform topics such as school privatisation, standardised testing, common core curriculum, discipline, and technology. The book covers contemporary educational debates and seriously considers views across the political spectrum from the vantage point of critical education, emphasising schooling for broader social equality and justice.
