## DIAMOND DAKOTA

The Silver Stallion John Benjamins Publishing

This book describes Brief Strategic Family Therapy, a strengths-based model for diagnosing and correcting interaction patterns that are linked to troublesome symptoms in children ages 6 to 18.

*Re-Authoring the World* SAGE

Was können Manager von Abenteurern lernen und wie unterscheidet sich Führung indoor und outdoor? Auf diese und viele weitere Fragen gibt der Band zum "7. Kongress für Outdoor und Adventure" spannende Antworten. 13 Expertinnen und Experten stellen ihre interdisziplinäre Expertise zu Leadership und Guiding unter Beweis. Dabei gehen sie auf die Themen nachhaltige Führung und emotionale Intelligenz als Erfolgsfaktoren ein und erläutern, wie Führung und Beratung in einer zunehmend unsicheren und unberechenbaren Welt funktioniert. Dass Führung in der Natur nur im Hier und Jetzt gelingt und folglich nur analog funktionieren kann, stellen die Expertinnen und Experten ebenso heraus wie geeignete Cheftypen und Führungsaufgaben, die Teams zum Erfolg verhelfen. Die Parallelen zwischen dem Führen outdoor und in der Wirtschaft verlieren sie dabei nicht aus den Augen und illustrieren eindrucksvoll die Komplexität des Führungsthemas. Sie zeigen darüber hinaus die vielen Gemeinsamkeiten auf, die zwischen dem Führen von Gruppen in der Natur und im Büro bestehen. Die Notwendigkeit, Erlerntes in die Praxis zu transferieren, wird abschließend thematisiert, ebenso wie richtiges Führen in Krisenzeiten. Denn von Expeditionsleitern vergangener Tage können Führungskräfte auch heute immer noch viel über einen nachweislich funktionierenden Führungsstil auf Augenhöhe lernen. Band zum 7. Kongress

für Outdoor und Adventure: Leadership und Guiding.

Dieses Buch zeigt neue und spannende Wege auf, wie mit Sandspieltherapie systemisch gearbeitet werden kann. Die Herausgeber führen in die Narrative Sandspieltherapie und die Kinderorientierte Familientherapie ein; weitere Autoren ergänzen dies durch Sandspielkonzepte auf der Grundlage von Hypnotherapie, Ego-State-Therapie, Bindungstheorie und Traumatherapie. So entsteht ein Eindruck von den vielfältigen Möglichkeiten, die das Sandspiel Kindern, Jugendlichen, Paaren, Gruppen und Familien eröffnet. Fallschilderungen aus der Arbeit mit Kindern im Frauenhaus, mit Flüchtlingskindern, aus Schule und Heimkontext bieten Einblick in die Praxis auch außerhalb des klassischen therapeutischen Settings. Dabei zeigt sich, wie Sandspieltherapie auch in schwierigen Konstellationen eine Atmosphäre von Leichtigkeit und Spielfreude entstehen lassen kann. Vorgestellt wird u. a. die Anwendung bei Störungen aus dem Autismus-Spektrum, bei blockierten Trauerprozessen, Kindeswohlgefährdung, destruktiven inneren Anteilen und mehrgenerationaler Traumatisierung. In der Summe bietet der Band eine Fülle wertvoller Anregungen, wie das Sandspiel in die tägliche Praxis einbezogen werden kann und diese bereichert. Mit Beiträgen von: Hiltrud Bierbaum-Luttermann • Silvia Eberhardt • Monika Heinzl-Junger • Thea Korten-Giesen • Annette Giesler • Jörn de Haen • Caroline Schmidt • Birte Tomeit • Christine Utecht • Lisa Weise • Silvia Zanotta.

"Boje does not reflect trends, he is among those who set them" - Hervé Corvellec, Department of Service Management, Lund University "How can I know what I think

until I see what David Boje says? What he says about storytelling will forever change what we thought we knew about stories. With remarkable control over a complex argument, Boje recovers, re-punctuates, and re-animates a world of narrative and sensemaking that we have previously taken for granted!" - Karl E. Weick, Rensis Likert Distinguished University Professor of Organizational Behavior and Psychology, Stephen M. Ross School of Business at the University of Michigan "Few people understand stories and storytelling as well as David Boje. It is a measure of Boje's success as a theorist that the word story can never reclaim the innocence and simplicity it once enjoyed. Nor, with the benefit of his work, can organizations be viewed as spaces which occasionally or incidentally spawn stories. Boje's eagerly awaited book forces us to question many of our assumptions about storytelling; it also demands that we revise several of our assumptions about what organizations are" - Yiannis Gabriel, The School of Management, Royal Holloway University of London "Our company is made up of lots of stories. We've found that 'stories' get told and retold and become the fabric of an organization. 'Policies' lay unread in the company handbook or training manual. David Boje taught me the value of stories in an organization. Stories are the 'oil' that makes the gears work. How do you get your message heard in an organization with thousands of people? David Boje taught me the value of telling stories at Stew Leonard's!" - Stew Leonard Jr., Stew Leonard Organization "David Boje is one of the world's leading authorities on storytelling. His work has influenced a generation of organizational theorists and students. He not only provides new ways of understanding organizations but also provides fresh insights into the way in which stories function to provide meanings" - Heather Höpfl, University of Essex The idea of organizations using 'storytelling' to make sense of themselves

and their environment has generated a lot of excitement. Written by the leading scholar in this field, David Boje explores how narrative and storytelling is an important part of an organization's strategy, development and learning processes. With excellent examples from Nike, McDonald's and Disney, readers are shown how the theory that underpins organizational storytelling connects with storytelling in everyday organizational life. David Boje's theories and ideas in relation to the study of storytelling in organizations are highly influential and this book will be a 'must have' for any student or scholar interested in the area.

**Eating Disorders and Obesity in Children and Adolescents** Vandenhoeck & Ruprecht Bernd Reiners' Kinderorientierte Familientherapie jetzt in zweiter aktualisierter Auflage. Die Kinderorientierte Familientherapie (KOF) wurde vom norwegischen Psychologen Martin Soltvedt entwickelt und führt die Kinderperspektive in die familientherapeutische Arbeit ein. KOF eignet sich für Familien mit Kindern von bis zu zehn Jahren, die in Familiengesprächen oft aus dem Blick geraten. Das neue schulenübergreifende Verfahren vereint Elemente klassischer Spieltherapie und systemischer Familientherapie. Zunächst spielt der Therapeut allein mit dem Kind, zeichnet die Spielsequenz auf Video auf und bespricht sie mit den Eltern, um Parallelen zum Alltag der Familie erkennen zu können. Anschließend spielen Eltern und Kind gemeinsam. So zeigen sich familiäre Interaktionsmuster ebenso wie die innere Welt des Kindes. Im Gespräch werden alternative Handlungsmöglichkeiten mit den Eltern entwickelt, die in der nächsten Spielsituation ausprobiert werden können. Zur Unterstützung steigt die Therapeutin mit ihrer Alter-Ego-Figur in das Spiel ein. Die Kinderorientierte Familientherapie ist eine hilfreiche Ergänzung für systemische Therapeuten, die mit Kindern arbeiten – oder für Kindertherapeutinnen, die Eltern unmittelbar einbeziehen möchten.

**FF Südtiroler illustrierte** Vandenhoeck & Ruprecht

A single coherent source of information on the various interlinking domains of patient safety, litigation and ethical behaviour, based on accounts of real-life situations and intended for all healthcare students, specialists and administrators.

**Brief Strategic Family Therapy** M. C. Holiday

This collection of work from many of the foremost experts in the field offers new information and ideas covering the current state of research in the field, new tools

and approaches in the social sciences, decision-making techniques for business, and the application of simulation and gaming methods in education. The authors also examine the growing popularity of video games and assess both their positive and negative influences on society and learning. The overall thrust of the book is that the use of techniques such as agent-based modeling in fields as diverse as psychology and economics has tremendous potential to help both research and practice advance radically. Consequently, it is a work of groundbreaking originality.

**Einfach systemisch!** Thieme

This volume provides the most current research on smart cities. Specifically, it focuses on the economic development and sustainability of smart cities and examines how to transform older industrial cities into sustainable smart cities. It aims to identify the role of the following elements in the creation and management of smart cities: • Citizen participation and empowerment • Value creation mechanisms • Public administration • Quality of life and sustainability • Democracy • ICT • Private initiatives and entrepreneurship Regardless of their size, all cities are ultimately agglomerations of people and institutions. Agglomeration economies make it possible to attain minimum efficiencies of scale in the organization and delivery of services. However, the economic benefits do not constitute the main advantage of a city. A city's status rests on three dimensions: (1) political impetus, which is the result of citizens' participation and the public administration's agenda; (2) applications derived from technological advances (especially in ICT); and (3) cooperation between public and private initiatives in business development and entrepreneurship. These three dimensions determine which resources are necessary to create smart cities. But a smart city, ideal in the way it channels and resolves technological, social and economic-growth issues, requires many additional elements to function at a high-performance level, such as culture (an environment that empowers and engages citizens) and physical infrastructure designed to foster competition and collaboration, encourage new ideas and actions, and set the stage for new business creation. Featuring contributions with models, tools and cases from around the world, this book will be a valuable resource for researchers, students, academics, professionals and policymakers interested in smart cities.

**"Modernisierungen" methodischen Handelns in der Sozialen Arbeit**

Vandenhoeck & Ruprecht

Learn how to read the optic fundus:- What tests are indicated?- How do I interpret the findings?- What is the next step?This book guides you quickly and confidently from finding to diagnosis.Practice-oriented- Organized by presentation- Systematic listing of diagnoses for each presentation- Sidebars with a brief summary of the signs and symptoms for each diagnosis- Quick reference and study guide in oneComprehensive- Describes various examination methods- Covers even rare findings- Differential diagnosis- Figures to illustrate each diagnosis- Notes on appropriate treatmentConfidence- Learn to take prompt, goal-directed action.- Apply various diagnostic options appropriately and economically.- Gain confidence in dealing with equivocal findings.

**The Trinity of Trauma: Ignorance, Fragility, and Control** Springer Science & Business Media

Jan V. Wirth und Heiko Kleve plädieren dafür, Lebensführung in den Fokus des professionellen Handelns von Beratung und Therapie zu nehmen. Als Schnittpunkt sozialer und individueller Vorstellungen bietet das Thema Lebensführung den Vorteil, voreilige Zuschreibungen zu verhindern. Probleme der Lebensführung sind in erster Linie diffus, miteinander verknüpft oder vermengt. Um sie auf eine sinnstiftende und kreative Weise zu ordnen und zu bearbeiten, vermitteln die Autoren Einsichten, Möglichkeiten des Herangehens und verschiedene Instrumente aus dem Bereich der postmodernen Beratung, aus Gesprächsführung, Therapie und Coaching. Handlungsleitend wirkt die grundlegende Überzeugung, jedes Leben positiv verändern und gestalten zu können. Das Buch vereint in praktischer Zielsetzung philosophische, soziologische und praxisbewährte systemische Verfahren und Tools.

*Free, Fair, and Alive* Carl-Auer Verlag

"Translation Studies" presents an integrated concept based on the theory and practice of translation. The author adapts linguistic approaches and methods in such a way that they may be usefully employed in the theory, practice, and analysis of literary translation. The author develops a more cultural approach through text analysis and cross-cultural communication studies. The book is a contribution to the development of translation studies as a discipline in its own right.

*Deutsche Gärtnerbörse* Elsevier Health Sciences

A TINY THREE PAGE BOOK Ask yourself; ask your friends: "How is wisdom

found?" Here are the steps. Lead the way to wisdom, love, joy and peace. WISDOM IS FROM EXPERIENCE A library is knowledge – apart from experience. A soul separated from good experience cannot verify the message of wisdom, purpose and virtue. Good is known through transforming power. ≪ ≪ ≪ The kingdom is not in words – but in power. ENTER THE KINGDOM 1 2 3 Learn the steps. Lead experience.

**Neue Wege im Sand** Springer-Verlag Enactive trauma therapy is grounded in so-called enactivism, which holds that, like anyone else, traumatized individuals are (1) embodied, and environmentally embedded; (2) constitute biopsychological organism-environment systems that are essentially interested in preserving their existence; (3) are primarily affective and oriented toward making sense of things. Individuals exhibit a phenomenal self, world, and self-of-the-world through self- and world-oriented actions. They do not act on the basis of knowledge, but possess knowledge on the basis of world-engaged sensorimotor, affect-laden, and goal-oriented actions. Whenever interpersonal traumatization by significant others occurs, individuals may get caught up in affective and relational conflicts they cannot resolve on their own. Their generation and maintenance of a trauma-related dissociation of the personality involves a kind of sense-making that supports their continued existence when their capacity to integrate traumatic experiences is still too low. However, what starts as a courageous effort to navigate a traumatizing life may at some point in time become a serious problem. Enactive trauma therapy comprises the collaboration of two organism-environment systems: the patient and the therapist. Together they spawn new meaning and adequate actions – an interaction that resembles dancing: It takes pacing, mutual attunement, good timing, a sensitivity to balance, movement and rhythm, courage, as well as the ability and willingness to follow and lead. *Kinderorientierte Familientherapie* Vandenhoeck & Ruprecht Der Sozialstaat unterliegt seit Jahren Veränderungsprozessen mit erheblichen Auswirkungen auf Soziale Arbeit. Ökonomisierungsdruck, zunehmende Standardisierungen und Kontrollorientierung verengen den Rahmen für methodisches Handeln. Die Beiträge ausgewiesener FachwissenschaftlerInnen in diesem Buch liefern Reflexionen und gehen den Anpassungszwängen, aber auch Gestaltungsmöglichkeiten in

unterschiedlichen Arbeitsfeldern der Sozialen Arbeit nach.

**Translation Studies** Carl-Auer Verlag Psychotherapie mit Kindern und Jugendlichen ist eine komplexe Angelegenheit, die auch erfahrenen Therapeuten immer wieder alles abverlangt. Wilhelm Rotthaus hat für diesen Band 16 Fallberichte namhafter Kolleginnen und Kollegen zusammengestellt, die das Vorgehen und die Besonderheiten systemischer Kinder- und Jugendlichentherapie vermitteln und helfen, eigene Fälle erfolgreich zu beurteilen. Die Beiträge decken alle Altersgruppen und gängigen Therapieanlässe ab, von Angststörungen über Traumafolgestörungen, Anorexia nervosa, Autismus bis zu spezifischen Phobien. Die Autorinnen und Autoren schildern charakteristische Aspekte ihres therapeutischen Vorgehens in der Arbeit mit Kindern bzw. Jugendlichen und deren Familien. Besonderer Wert wurde darauf gelegt, auch für Nichtsystemiker jeweils nachvollziehbar zu machen, welche Überlegungen den Therapieprozess geleitet haben und welche Therapiefaktoren – Haltung/Einstellung, Setting, Methoden – für besonders wesentlich erachtet wurden. So entsteht ein anschauliches und lehrreiches Bild systemtherapeutischen Handelns. Mit Beiträgen von: Corina Ahlers, Mathias Berg, Wiltrud Brächter, Barbara Bräutigam, Michael Buscher, Andrea Caby, Filip Caby, Björn Enno Hermans, Alexander Korittko, Maren Krüger, Simone Lamerz, Christoph Möller, Bernd Reiners, Ingo Spitzcok von Brisinski, Manfred Vogt, Livia Voneschen, Claudia Wach, Anne Wichtmann, Charlotte Wirl. *Einfach managen* Carl-Auer Verlag What you should know about systemic interventions.

**Residue Reviews / Rückstands-Berichte** Ashgate Publishing, Ltd. Get a quick, expert overview of best practices for diagnosis and treatment of eating disorders in children and adolescents. This concise resource by Drs. Johannes Hebebrand and Beate Herpertz-Dahlmann provides psychiatrists and pediatricians with current information in this increasingly important field, including practical sections on developmental aspects of eating disorders, symptomology, epidemiology, etiology and pathophysiology, treatment and outcomes, and prevention. Discusses general concepts for feeding, eating, and weight disorders; body weight and composition, appetite regulation, and the emergence of body perception and image. Covers genetics of eating and weight disorders,

influence of hormones, intergenerational effects, and food addiction. Includes information on cognitive behavioral therapy, family-based therapies, early intervention, pharmacotherapy, bariatric surgery, and other treatments. Consolidates today's available information on this timely topic into a single convenient resource.

**How to Find Wisdom** Böhlau Verlag Wien

The domain of nonlinear dynamical systems and its mathematical underpinnings has been developing exponentially for a century, the last 35 years seeing an outpouring of new ideas and applications and a concomitant confluence with ideas of complex systems and their applications from irreversible thermodynamics. A few examples are in meteorology, ecological dynamics, and social and economic dynamics. These new ideas have profound implications for our understanding and practice in domains involving complexity, predictability and determinism, equilibrium, control, planning, individuality, responsibility and so on. Our intention is to draw together in this volume, we believe for the first time, a comprehensive picture of the manifold philosophically interesting impacts of recent developments in understanding nonlinear systems and the unique aspects of their complexity. The book will focus specifically on the philosophical concepts, principles, judgments and problems distinctly raised by work in the domain of complex nonlinear dynamical systems, especially in recent years. -Comprehensive coverage of all main theories in the philosophy of Complex Systems -Clearly written expositions of fundamental ideas and concepts -Definitive discussions by leading researchers in the field - Summaries of leading-edge research in related fields are also included **Sustainable Smart Cities** eBook Partnership Business networks consist of several independent businesses that enter into interrelated contracts, conferring on the parties many of the benefits of co-ordination achieved through vertical integration in a single firm, without creating a single integrated business such as a corporation or partnership. Retail franchises are one such example of a network, but the most common instance is a credit card transaction between a customer, retailer, and the issuer of the card. How should the law analyse this hybrid economic phenomenon? It is neither exactly a market relationship - because that overlooks the co-ordination, relational qualities and interdependence of

the contracts - nor is it a type of business association or company, since it lacks a centralised co-ordinating authority that receives the residual profits. This book is a translation of Gunther Teubner's classic work on networks, setting out his novel legal concept of 'connected contracts'. In it he explains how this concept addresses the problems posed by networks, such as the question whether the network as a whole can be held legally responsible for damage that it causes to third parties such as customers. A substantial introduction by Hugh Collins explains the analysis of networks in the context of German law and the systems theory from which Teubner approaches the topic. The introduction also explores how far the concept of connected contracts might assist in the common law world, including the UK and the USA, to address the same problems that arise in cases involving networks. As well as making a contribution

to comparative law and legal theory, the book will be of interest to scholars interested in contract law, commercial law and the law of business associations.

**Safety and Ethics in Healthcare: A Guide to Getting it Right**

American Psychological Association (APA)  
Residues of pesticides and other "foreign" chemicals in foodstuffs are of concern to everyone everywhere; they are essential to food production and manufacture, yet without surveillance and intelligent control some of those that persist could at times conceivably endanger the public health. The object of "Residue Reviews" is to provide concise, critical reviews of timely advances, philosophy, and significant areas of accomplished or needed endeavor in the total field of residues of these chemicals in foods, in feeds, and in transformed food products. These reviews are either general or specific, but properly they may lie in the domains of analytical chemistry and its methodology,

biochemistry, human and animal medicine, legislation, pharmacology, physiology, regulation, and toxicology; certain affairs in the realm of food technology that are concerned specifically with pesticide and other food-additive problems are also appropriate subject matter. The justification for the preparation of any review for this book series is that it deals with some aspect of the many real problems arising from the presence of residues of foreign chemicals in foodstuffs. The scope of "Residue Reviews" is international. It encompasses those matters, in any country, which are involved in allowing pesticide and other plant-protecting chemicals to be used safely in producing, storing, and shipping crops. Added plant or animal pest-control chemicals or their metabolites that may persist into meat and other edible animal products (milk and milk products, eggs, etc.
