A Footprint in Time Causey Enterprises, LLC

The motor scooter, so familiar a sight on the streets of cities throughout the world, can trace its ancestry back to the early years of the Twentieth century, but it really came into its own after the Second World War. In Italy the Piaggio company launched the Vespa that quickly became a byword for quick, cheap and chic urban personal transport. The Lambretta soon followed, along with dozens of rival scooters from manufacturers all over Europe, North America and Japan, including some famous names as Ducati, Heinkel, Triumph, Puch, Honda and Harley-Davidson.

The interest and fascination these novel vehicles generate have made tiny cars and trucks significant collectibles over the past decade, and yet information on micro trucks has been almost non-existent. Old brochures printed by numerous micro car builders depict various truck versions: in the case of Iso, everything from hook (crane) and ladder to vans to pickups were featured, but few, if any, examples were thought to have been built beyond the prototype stage. Full colour photography, text and specs describe virtually unknown production micro trucks. Featured are rare Iso utility vehicles and Topolino Fiat vans, as well as more common production micro trucks from Autobianchi, Moto Guzzi, Vespa Ape, New Map Solyto and Diahatsu. 98 colour photos show many rare and extraordinary micro trucks.

"Let us talk about destiny," the stranger began to speak confidently; "the word destiny is one of the most misunderstood concept and people like you have apprehension about its implied meaning to the point of fear. Such fear is a natural reaction to the philosophical insinuation that our lives are predestined to a specific outcome.". Sudhir closed his eyes trying to listen to Baba who was chanting some mantras, but instead of the mantras heard something different in his voice that echoed ears. The experience was wondrous; when he opened eyes and looked at Baba, Baba was chanting mantras, which was clear. But the moment he closed eyes, Baba was saying something into his ears that was quite different unrelated to the hymn.." The book is the recount of meeting of Sudhir with the stranger and unfolds consequent upon his tryst with the mystic. ".Sanjana said, marrying outside the caste is a sin in our society. They would never accept our relationship, even at the cost of our lives." "If that was so then why did we do it?" Sudhir asked. She smiled, running her hand over the back of his head she said, "this was our vengeful act against them and the society. If the society could impose on us the rules that are against our will and affect our lives then we are entitled to

break the rules and that is what we did." Without a single word further on the subject he understood what she was trying to tell him.

Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.

WALNECK'S CLASSIC CYCLE TRADER, MARCH 1996

This is an encapsulation of one person's travel through time, not necessarily meaningful in its portrayal or its outcomes but in its own small way leaving an imprint in the sands of time. It is a personal record of one who has lived through and, in some small way, participated in a few of the events that have shaped our history. It also encapsulates events that embrace family, friends, and acquaintances. At the same time, it touches on those events and locations that have also had both major and minor impacts on the world stage, in an age in which we have witnessed incredible changes in technology across a wide area of human endeavours. Developments that have seen man leave his own environment for the first time to venture into the space that lies beyond—something that our predecessors could never have dreamed possible. Changes that have also brought economic and social improvements and yet have not resolved the issues of human conflict or our responsibilities as custodians of the planet.
