From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in *A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice*. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Foundations of Interpersonal Practice in Social Work Transaction Publishers

Dr David Wilkins is a Senior Lecturer at the University of Bedfordshire, UK. Dr Godfred Boahen is a Policy and Research Officer at the British Association of Social Workers (BASW), UK. How can social workers develop their critical analysis skills? What role does critical analysis play in the day-to-day activities of a social worker? And can we critically analyse in isolation? The ability to analyse contexts, scenarios and service users through a critical lens is vital to effective social work practice. Despite this, many social workers attempt to analyse situations alone, missing marks of significance. This book, written by two senior academics and practitioners who, at the time, were in the midst of their PhDs, offers a basis step-by-step model that busy social workers can use to develop a more critical and analytical mindset. It shows how analysis can be woven throughout the whole process of social work engagement, resulting in more effective decision-making, more efficient ways of working and, ultimately, better outcomes for social work service users. This is achieved by ways of handy tools, case studies and dilemmas, research summaries, and exercises and reflections points to tackle alone or with a colleague. Topics covered include: What analysis is, and why it is such an

important skill in social work practice. The skills that underpin critical analysis, such as time management, planning, critical understanding, logical thinking, research-mindedness, creativity, communication, reflection and hypothesising. The role of emotion and intuition in critical analysis. The importance of supervision and team or supervised analysis. *** This book forms part of the Social Work Skills in Practice series. The series focuses on key social work skills required for working with children and adult service users, families and carers. The books offer both theoretical and evidence-informed knowledge, alongside the application of skills relevant for day-to-day social work practice. They are an invaluable resource for pre-qualifying students, newly-qualified social workers, academics teaching and researching in the field, as well as social work practitioners, including practice educators, pursuing continuous professional development. *** 'A timely and appropriate post-Munro book for social workers at all levels of experience. The chapter on emotion, intuition and critical analysis is a particularly welcome addition to the subject. A really useful book.' The book has two principal purposes: To provide an introduction to interpersonal helping in the context of social work practice, and to develop a conceptual framework for interpersonal helping -- called social treatment--that will enable the social worker and members of other helping professions effectively to use all the various methods and strategies currently practiced. The book offers an orderly and systematic way of proceeding through a complex and often confused area of practice; in it, large issues--such as remediation versus prevention--are explored along with concrete suggestions for intervention with individuals, families, and small groups. Theoretical systems are considered not merely for the techniques they suggest but also for the values and views of man inherent in them. The helping process itself is analyzed from the point of view of the consumer as well as the worker. A conceptual framework for practice is developed that allows for systematic eclecticism in theory and technique, providing a framework for evaluating and comparing different methods of social treatment. The author defines social treatment as "an approach to interpersonal helping which utilizes direct and indirect strategies of intervention to aid individuals, families, and small groups in improving social functioning and coping with social problems." Beginning with a discussion of the concept of remediation within the context of the larger contemporary issues of social reform and environmental protection, Professor Whittaker proceeds to consider several critical issues in present social work practice, such as client advocacy, service delivery systems, and professionalization. Subsequent chapters discuss the multiple roles that social work practitioners perform, the major theoretical bases of social treatment, the treatment sequence from intake to after care, and the full range of helping activities that practitioners undertake indirectly on behalf of their clients. The final chapter explores current trends and future directions in social treatment. In the Appendix, a framework for evaluating methods of interpersonal helping is developed and 21 approaches to social treatment are described and resource bibliographies are provided. This book--brief, lucid, and systematic--is a major step toward that redefinition, and will be invaluable to beginning students and advanced practitioners in social work and in all the other professional and paraprofessional fields engaged in providing human services. James K. Whittaker is Charles O.

Reports of mistreated children, domestic violence, and abuse of elderly persons continue to strain the capacity of police, courts, social services agencies, and medical centers. At the same time, myriad treatment and prevention programs are providing services to victims and offenders. Although limited research knowledge exists regarding the effectiveness of these programs, such information is often scattered, inaccessible, and difficult to obtain. *Violence in Families* takes the first hard look at the successes and failures of family violence interventions. It offers recommendations to guide services, programs, policy, and research on victim support and assistance, treatments and penalties for offenders, and law enforcement. Included is an analysis of more than 100 evaluation studies on the outcomes of different kinds of programs and services. *Violence in Families* provides the most comprehensive review on the topic to date. It explores the scope and complexity of family violence, including identification of the multiple types of victims and offenders, who require different approaches to intervention. The book outlines new strategies that offer promising approaches for service providers and researchers and for improving the evaluation of prevention and treatment services. *Violence in Families* discusses issues that underlie all types of family violence, such as the

tension between family support and the protection of children, risk factors that contribute to violent behavior in families, and the balance between family privacy and community interventions. The core of the book is a research-based review of interventions used in three institutional sectors--social services, health, and law enforcement settings--and how to measure their effectiveness in combating maltreatment of children, domestic violence, and abuse of the elderly. Among the questions explored by the committee: Does the child protective services system work? Does the threat of arrest deter batterers? The volume discusses the strength of the evidence and highlights emerging links among interventions in different institutional settings. Thorough, readable, and well organized, *Violence in Families* synthesizes what is known and outlines what needs to be discovered. This volume will be of great interest to policymakers, social services providers, health care professionals, police and court officials, victim advocates, researchers, and concerned individuals.

Social work educators and practitioners are grappling with many difficulties confronting the profession in the context of an increasingly neoliberal world. The contributors of this book examine how neoliberalism — and the modes with which it structures the world — has an impact on, and shapes, social work as a disciplinary 'field'. Drawing on new empirical work, the chapters in this book highlight how neoliberalism is affecting social work practices 'on the ground'. The book seeks to stimulate international debate on the totalizing effects of neoliberalism, and in so doing, also identify various ways through which it can be resisted both locally and globally. The chapters in this book were originally published as a special issue of the European Journal of Social Work.
