The Last Fish Swimming: The Global Crime of Illegal Fishing
Routledge

This book contains short and concise exercises for use in a warm-up before practice or performance, and for general technical advancement. The book is divided into four sections: I Arpeggios, II Scales, III Tremolo, and IV Slurs. Each section contains a description of the exercises and general instructions on how to play them. The exercises are intended for guitarists who are looking for a simple warm-up that does not require learning many complicated etudes, exercises or routines. In this book, only one etude is used for a variety of arpeggio and tremolo patterns. The scale warm-ups are based on a two-octave, one-position scale that is shifted up and down the fretboard, and a simple one-position chromatic scale. The pull-off and hammer-on slurs are combined into one exercise to save time. This same routine,

when practiced with the metronome gradually increasing the tempo, can also double for technical work. With the exception of one chromatic scale exercise, the rest are on closed strings. Besides being able to move the scale up and down the fretboard, the first finger can be barred. This will increase the left hand difficulty and improve the left hand position and strength. There is close to an hour's worth of material if all the exercises are played with all of their variations at different tempos. Not everything needs to be played everyday, so the warm-up session can be as long as desired or as short as time allows.

The book *Islam-Its Beauty & Wisdom* is a novel presentation of Islam, interweaving traditional Islamic material with well-documented contemporary research from the physical and behavioral sciences. This book provides an understanding of the wisdom of Islamic teachings from a religious-scientific perspective. This is a refreshingly different approach to a classic subject of the wisdom behind Islamic acts of worship. It has meanings and relevance to both Muslim and non-Muslim readers. "This book first explains what the five pillars of Islam are in such a way any person, Muslim and non-Muslim, can understand and appreciate. It then heads in a direction I have never personally seen before in any religious manuscript. By this, I mean it provides us with an effective scientific reasoning to explain health benefits associated with Islamic acts of worship..... If one really wants to understand Islam, then I can think of no better

place to start than this book by Dr. Mushtaq."-Jeffrey Ira Bernstein (Molecular Biologist, U.S.A.)

A Western-trained psychoanalyst returns to her homeland and tells stories of displacement, nostalgia, love, and pain. Is psychoanalysis possible in the Islamic Republic of Iran? This is the question that Gohar Homayounpour poses to herself, and to us, at the beginning of this memoir of displacement, nostalgia, love, and pain. Twenty years after leaving her country, Homayounpour, an Iranian, Western-trained psychoanalyst, returns to Tehran to establish a psychoanalytic practice. When an American colleague exclaims, "I do not think that Iranians can free-associate!" Homayounpour responds that in her opinion Iranians do nothing but. Iranian culture, she says, revolves around stories. Why wouldn't Freud's methods work, given Iranians' need to talk? Thus begins a fascinating narrative of interlocking stories that resembles—more than a little—a psychoanalytic session. Homayounpour recounts the pleasure and pain of returning to her motherland, her passion for the work of Milan Kundera, her complex relationship with Kundera's Iranian translator (her father), and her own and other Iranians' anxieties of influence and disobedience. Woven throughout the narrative are glimpses of her sometimes frustrating, always candid, sessions with patients. Ms. N, a famous artist, dreams of abandonment and sits in the analyst's chair rather than on the analyst's couch; a young chador-clad woman expresses shame because she has lost her virginity; an eloquently suicidal young man cannot kill himself. As a psychoanalyst, Homayounpour knows that behind every story told is another story that remains untold. Doing

Psychoanalysis in Tehran connects the stories, spoken and unspoken, that ordinary Iranians tell about their lives before their hour is up.

Howard Zehr is the father of Restorative Justice and is known worldwide for his pioneering work in transforming understandings of justice. Here he proposes workable principles and practices for making Restorative Justice possible in this revised and updated edition of his bestselling, seminal book on the movement. (The original edition has sold more than 110,000 copies.) Restorative Justice, with its emphasis on identifying the justice needs of everyone involved in a crime, is a worldwide movement of growing influence that is helping victims and communities heal, while holding criminals accountable for their actions. This is not soft-on-crime, feel-good philosophy, but rather a concrete effort to bring justice and healing to everyone involved in a crime. In *The Little Book of Restorative Justice*, Zehr first explores how restorative justice is different from criminal justice. Then, before

letting those appealing observations drift out of reach into theoretical space, Zehr presents Restorative Justice practices. Zehr undertakes a massive and complex subject and puts it in graspable form, without reducing or trivializing it. This resource is also suitable for academic classes and workshops, for conferences and trainings, as well as for the layperson interested in understanding this innovative and influential movement.
