*Pharmacology: A
Tribute to Norman
Bowery United Nations*
This book reviews the
progress made in

salivary diagnostics during the past two decades and identifies the likely direction of future endeavors. After an introductory section describing the histological and anatomical features of the salivary glands and salivary function, salivary collection devices and diagnostic platforms are reviewed. The field of “salivaomics” is then considered in detail, covering, for example, proteomics, the peptidome, DNA and RNA analysis, biomarkers, and methods for biomarker discovery. Salivary diagnostics for oral and systemic diseases are thoroughly discussed, and the role of salivary gland tissue engineering for future diagnostics is explored. The book closes by

considering legal issues and barriers to salivary diagnostic development.

Advances in Salivary Diagnostics will be an informative and stimulating reference for both practitioners and students.

This open access book provides insight into what it takes to actively involve teachers in the curriculum design process. It examines different aspects of teacher involvement in collaborative curriculum design, with specific attention to its implications for sustainable curriculum innovation and teacher learning. Divided into six sections, the book starts out by introducing the notion

of collaborative curriculum design and discusses its historical and theoretical foundations. It describes various approaches commonly adopted to actively involve teachers in the (co-)design of curriculum materials. Sections two and three provide examples of what key phases in the curriculum design process - such as needs analysis, design and development, and implementation - look like across various collaborative curriculum design projects. Section four reports on the impact of collaborative curriculum design on student learning, teacher practices, teacher professional growth, and institutional change. Building on the

research evidence about the outcomes of collaborative curriculum design, section five focuses on sustainability, scaling-up and curriculum leadership issues, which are key to the continuation and further evolution of curriculum innovations. Future perspectives are addressed in section six with emphasis on the infrastructure of a sustainable curriculum innovation. An exploration of the factors behind neoliberalism's resilience in developing economies and what this could mean for democracy's future
Since the 1980s, neoliberalism has withstood repeated economic shocks and financial crises to become the hegemonic

economic policy worldwide. Why has neoliberalism remained so resilient? What is the relationship between this resiliency and the backsliding of Western democracy? Can democracy survive an increasingly authoritarian neoliberal capitalism? Neoliberal Resilience answers these questions by bringing the developing world's recent history to the forefront of our thinking about democratic capitalism's future. Looking at four decades of change in four countries once considered to be leading examples of effective neoliberal policy in Latin America and Eastern Europe—Argentina, Chile, Estonia, and Poland—Aldo

Madariaga examines the domestic actors and institutions responsible for defending neoliberalism. Delving into neoliberalism's political power, Madariaga demonstrates that it is strongest in countries where traditional democratic principles have been slowly and purposefully weakened. He identifies three mechanisms through which coalitions of political, institutional, and financial forces have propagated neoliberalism's success: the privatization of state companies to create a supporting business class, the use of political institutions to block the representation of alternatives in

congress, and the constitutionalization of key economic policies to shield them from partisan influence. Madariaga reflects on today's most pressing issues, including the influence of increasing austerity measures and the rise of populism. A comparative exploration of political economics at the peripheries of global capitalism, *Neoliberal Resilience* investigates the tensions between neoliberalism's longevity and democracy's gradual decline.

Use Hypnosis and the Power of Your Mind to:
 * ATTRACT LOVE AND BETTER RELATIONSHIPS * LIVE IN A LEAN, SHAPELY

BODY * IMPROVE YOUR HEALTH * ACHIEVE GREATER SUCCESS * END THOSE STUBBORN BAD HABITS AND BEHAVIORS FOREVER WITH EASE The TurboCharged Mind: Eliminate Bad Habits with Hypnosis offers a rare, fascinating and potentially life-changing opportunity to harness the innate power already within your mind, heart and body. This dynamic energy force already exists within you and just needs to be directed to work for your ultimate benefit. This self-improvement and personal development method is based on specific hypnosis techniques that are safe, comfortable and proven effective for breaking through self-imposed barriers. The

TurboCharged Mind explains how you can:

* Use hypnosis to eliminate actions and thoughts that are preventing you from achieving success or happiness in any area.

* Re-channel doubts and fears into constructive pathways and replace negativity with untapped potent mental energies. *

Attract love and better relationships, improve your appearance by losing weight and excess body fat, quit smoking permanently, enjoy restful sleep, experience greater overall health, reduce stress, improve success and prosperity-all while increasing your inner sense of comfort and relaxation throughout the day, no matter what challenges life throws your way. This

book is the ultimate companion to the acclaimed book, TurboCharged: Accelerate Your Fat Burning Metabolism, Get Lean Fast and Leave Diet and Exercise Rules in the Dust. The TurboCharged Mind expands "Step 8: Seeing the Prize." It explains in simple language how readers can learn to access personal power that is just waiting to be tapped to not only get lean and in awesome shape, fast and easy, but also accomplish any goal with much greater ease when natural self-hypnosis, which can be easily learned by anyone, is incorporated into the process. About the Authors: Dian Griesel, Ph.D. developed the TurboCharged(TM)

brand of hypnosis and has successfully utilized it for more than twenty-five years.

Serial entrepreneurs, Dian and Tom Griesel, are co-authors and co-producers of the TurboCharged(TM) series of books and hypnosis downloads. This sister/brother team has been called the "New First Family of Health." They have been written about extensively in media outlets worldwide and have been guests on numerous television shows and national radio programs.

Coal Gasification and Its Applications

Princeton University Press

This ambitious volume explores the politics of recent changes in corporate governance regulation and the transnational forces

driving the process. Corporate governance has in the 1990s become a catchphrase of the global business community. The Enron collapse and other recent corporate scandals, as well as growing worries in Europe about the rise of Anglo-Saxon finance, have made issues of corporate governance the subject of political controversies and of public debate. The contributors argue that the regulation of corporate governance is an inherently political affair. Given the context of the deepening globalization of the corporate world, it is also increasingly a transnational phenomenon. In terms of the content of regulation the book shows an increasing

reliance on the application of market mechanisms and a tendency for corporations themselves to become commodities. The emerging new mode of regulation is characterized by increasing informalization and by forms of private regulation. These changes in content and mode are driven by transnational actors, first of all the owners of internationally mobile financial capital and their functionaries such as coordination service firms, as well as by key public international agencies such as the European Commission. The Transnational Politics of Corporate Governance Regulation will be of interest to students and

researchers of international political economy, politics, economics and corporate governance.

This comprehensive and timely textbook covers all aspects of the evidence-based management of genitourinary cancers and explains the fundamental principles underlying the available diagnostic and treatment approaches, including chemotherapy, radiotherapy, immunotherapy, and surgery. For each type of cancer – prostate, bladder, renal, testicular, and penile, plus rare urologic malignancies – clinical presentation, diagnosis, and treatment strategies are described in detail

and information is provided on etiology, epidemiology, risk factors, and pathology, including TNM classification. Careful attention is also devoted to the complications that may be encountered when treating urologic malignancies and to the management of these complications. The text is complemented by the inclusion of numerous high-definition photographs and illustrations. Urologic Oncology will be a valuable reference and source of guidance for all oncologists, urologists and practitioners in related disciplines who treat patients with urologic cancers.

This monograph was

assembled to honor Professor Norman Bowery and his work on the 30th anniversary of his discovery of the GABAB receptor. In the present volume, leading neuroscientists from academia and industry provide a perspective of current research, both basic and translational, in the discovery of drugs acting at the GABAB receptor. The topics covered provide a comprehensive review of the field and the current state of research in this area. Included are chapters on the chemistry of GABAB agonists and antagonists, on the genetics and molecular composition of the site, its regulation and trafficking, and its role in controlling cellular, autonomic, and

behavioral function. There are also chapters describing the potential clinical utility of drugs regulating GABAB activity receptor in the areas of hypertension, gastroesophageal reflux disease, Down syndrome, depression, and substance abuse. The information contained in this text will be of particular interest to neuroscientists in general and to neuropharmacologists in particular. Articles written by leading investigators in the field informs and updates on all the latest developments

Throughout India and Southeast Asia, ancient classical epics—the Mahabharata and the Ramayana—continue

to exert considerable cultural influence. Rethinking India's Oral and Classical Epics offers an unprecedented exploration into South Asia's regional epic traditions. Using his own fieldwork as a starting point, Alf Hiltebeitel analyzes how the oral tradition of the south Indian cult of the goddess Draupadi and five regional martial oral epics compare with one another and tie in with the Sanskrit epics. Drawing on literary theory and cultural studies, he reveals the shared subtexts of the Draupadi cult Mahabharata and the five oral epics, and shows how the traditional plots are twisted and classical characters reshaped to reflect local history and

religion. In doing so, Hildebeitel sheds new light on the intertwining oral traditions of medieval Rajput military culture, Dalits ("former Untouchables"), and Muslims. Breathtaking in scope, this work is indispensable for those seeking a deeper understanding of South Asia's Hindu and Muslim traditions. This work is the third volume in Hildebeitel's study of the Draupadi cult. Other volumes include *Mythologies: From Gingee to Kuruksetra* (Volume One), *On Hindu Ritual and the Goddess* (Volume Two), and *Rethinking the Mahabharata* (Volume Four).

This book aims to give

junior urologists in training an idea of how to assemble equipment required for core urology procedures on a global level. This includes what to do pre-operatively, surgical indications and techniques, what to do post operatively, and complications that may occur. It can be daunting taking up a post as a surgical trainee despite supervision of seniors. This book will help in instilling competence and confidence in the trainee with step by step descriptions of key specialty procedures and their variations. Important practical clinical anatomy will be illustrated as well as an emphasis on safety.

This book addresses knowledge gaps in RARP in 3 key sections: 1) Step-by-step approach including multiple technique options and innovations, 2) Patient selection, safety, outcomes, and 3) Preparing the patient for surgery. The order is more based upon knowledge priority rather than a chronologic sequence in which part 3 would go first. Part two allows more summary and commentary on evidence and part three allows some creative content that is otherwise hard to find in one place—medical evaluations, imaging, clinical trials, patient education, etc. This textbook emphasizes content for the advanced skills surgeon in that

multiple techniques are presented as well as state of the art evidence. The learning curve is addressed and the authors clarify how this text is useful for learners. The caveat is that they should be careful in patient selection and stick with what their mentors are showing them. With experience, they can then branch out into the many techniques presented here. Robot-Assisted Radical Prostatectomy: Beyond the Learning Curve will also have cross-over appeal for surgical assistants, physician assistants, nurses, and anyone else involved in the surgical care of prostate cancer. [International Classification of Non-Tariff Measures 2019](#) Springer Non-tariff measures

are generally defined as policy measures other than ordinary customs tariffs that can potentially have an economic effect on international trade in goods, changing quantities traded, or prices or both. Since this definition is broad, a detailed classification is of critical importance so as to better identify and distinguish among the various forms of non-tariff measures. The classification of non-tariff measures presented here is a taxonomy of all those measures considered relevant in international trade today. It builds on an old UNCTAD classification known as the Coding System of Trade Control Measures and was developed by several international

organizations forming what is called the MAST group (Multi-Agency Support Team) set up to support the Group of Eminent Persons on Non-tariff Barriers established by the Secretary General of UNCTAD in 2006. The MAST team discussed and proposed this classification, and is composed of: FAO, IMF, ITC, OECD, UNCTAD, UNIDO, World Bank and WTO. The classification is seen as evolving and should adapt to the reality of international trade and data collection needs. *Cholesterol* Springer Every day in the United States, over two million men, women, and children step onto an aircraft and place their lives in the hands of strangers. The National Wildfire

Coordinating Group provides national leadership to enable interoperable wildland fire operations among federal, state, local, tribal, and territorial partners. Primary objectives include: Establish national interagency wildland fire operations standards. Recognize that the decision to adopt standards is made independently by the NWCG members and communicated through their respective directives systems; Establish wildland fire position standards, qualifications requirements, and performance support capabilities (e.g. training courses, job aids) that enable implementation of NWCG standards; Support the National

Cohesive Wildland Fire Management Strategy goals: to restore and maintain resilient landscapes; create fire adapted communities; and respond to wildfires safely and effectively; Establish information technology (IT) capability requirements for wildland fire; and Ensure that all NWCG activities contribute to safe, effective, and coordinated national interagency wildland fire operations. The objectives of the "Interagency Helicopter Operations Guide" (IHOG) are to: Promote safe, cost-efficient and effective aviation services in support of agency and interagency goals and objectives; Define and standardize national, interagency helicopter management and

operational procedures for helicopter users from participating agencies; Through standardization, facilitate the ability of personnel from different agencies to work cooperatively on incidents or projects; and Provide a framework within which areas, regions, states, and local units can provide supplemental, site-specific guidance. The procedures contained in this guide apply to helicopter operations conducted by providers and users of helicopters from participating agencies. This guide addresses both incident and resource helicopter operations.

Plants produce a vast number of bioactive compounds with different chemical scaffolds, which modulate a diverse range of molecular targets and are used as drugs for treating numerous diseases. Most present-day medicines are derived either from plant compounds or their derivatives, and plant compounds continue to offer limitless reserves for the discovery of new medicines. While different classes of plant compounds, like phenolics, flavonoids, saponins and alkaloids, and their potential pharmacological applications are currently being explored, their curative mechanisms are yet to be understood in detail. This book is divided into 2 volumes

and offers detailed information on plant-derived bioactive compounds, including recent research findings. Volume 1, "Plant-derived Bioactives: Chemistry and Mode of Action" discusses the chemistry of highly valued plant bioactive compounds and their mode of actions at the molecular level. Volume 2, "Plant-derived Bioactives: Production, Properties and Therapeutic Applications" explores the sources, biosynthesis, production, biological properties and therapeutic applications of plant bioactives. Given their scope, these books are valuable resources for members of the scientific community wishing to further

explore various medicinal plants and the therapeutic applications of their bioactive compounds. They appeal to scholars, teachers and scientists involved in plant product research, and facilitate the development of new drugs.

Practical Tips in Urology is a compact, illustrated reference which provides the reader with practical tips and advice in managing day-to-day urological issues encountered in a clinical setting. This book draws on practical experience and offers useful information that is often lacking in didactic textbooks of urology and in journal articles. Practical Tips in Urology provides tips in dealing with urological emergencies, elective surgery and common outpatient consultation problems, among other

things. Written by experts in the field, Practical Tips in Urology is key reading for all practicing urologists and residents in training. From Tracking Code to Analysis Independently Published

This issue of Clinics in Geriatric Medicine is devoted to Geriatric Urology. Guest Editor Tomas L. Griebling, MD, MPH has assembled a group of expert authors to review the following topics: Non-Surgical Treatment of Urinary Incontinence in Elderly Women; Outcomes of Surgery for Stress Urinary Incontinence in Older Women; Evaluation and Management of Pelvic Organ Prolapse in Elderly Women; Underactive Bladder in Older Adults;

Translational Research and Voiding Dysfunction in Older Adults; Functional Brain Imaging and Voiding Dysfunction in Older Adults; The Role of Urodynamics in Elderly Patients; Associations Between Voiding Symptoms and Sexual Health in Older Adults; Asymptomatic Bacteriuria and Urinary Tract Infections in Older Adults; Comorbidity and Surgical Risk in Older Urologic Patients; Small Renal Masses in Older Adults; Prostate Cancer in Elderly Men: Active Surveillance and Other Considerations; Late Onset Hypogonadism and Testosterone Replacement in Elderly Men; and Contemporary Chemotherapy for Urologic Malignancies
