Papers for each conference issued in several volumes. Volumes distributed to conference registrants have title "Conference papers"; other volumes of papers published after the conference are identified as "Late papers", "Invited papers", or other similar titles. Most conferences also have a general index volume.

Armor Edizioni Nuova Cultura

Australia has some of the world's largest and most labor-efficient farms, and tractors are an essential part of their operations. The average Australian farm has three or more tractors. In this historical overview, the author documents the development of the indigenous tractor industry, from the McDonald Imperial of 1909 to more recent cane, olive, and grape harvesters. Australian Tractors puts the industry in an economic and social history context.

Annali della Facoltà di Agraria Stanford University Press

By the end of the twentieth century there were some half-million tractors on British farms - more machines than people to drive them. Brian Bell's encyclopaedic book traces the evolution of the farm tractor from the days of starting handle and pan seat to current 4-wheel drive machines with air-conditioned cabs and computer management systems. He deals in particular with developments of the classic period from the 1950s to the 1990s. The book is arranged alphabetically by manufacturer from Allis-Chalmers to Zetor, one hundred marques in total. These are all machines to be found on British farms irrespective of their country of manufacture. Brian runs concisely through the histories of the companies and their major models, illustrated with a wealth of photographs and extracts from sales literature. He adds some special features on items such as hydraulic systems and cold-starting aids. He includes a glossary and full index. This book replaces the author's earlier, successful, Fifty Years of Farm Tractors. Many of the photographs are new and the text has been brought up to date to include developments of the early twenty-first century.

The National Union Catalog, Pre-1956 Imprints Bloomsbury Publishing

The first of two volumes on the Axis campaigns in the Balkans, exploring Mussolini's fateful decision to move against Greece in October 1940. The Greek President Metaxas rejected the Italian ultimatum with a famous 'Oxi' ('No'), and what followed was Italy's first debacle in World War II. In the wake of Italy's rapid annexation of Albania in April 1940, Mussolini's decision to attack Greece in

October that year is widely acknowledged as a fatal mistake, leading to a domestic crisis and to the collapse of Italy's reputation as a military power (re-emphasized by the Italian defeat in North Africa in December 1940). The Italian assault on Greece came to a stalemate in less than a fortnight, and was followed a week later by a Greek counter-offensive that broke through the Italian defences before advancing into Albania, forcing the Italian forces to withdraw north before grinding to a halt in January 1941 due to logistical issues. Eventually, the Italians took advantage of this brief hiatus to reorganize and prepare a counteroffensive, the failure of which marked the end of the first stage of the Axis Balkan campaign. The first of two volumes examining the Axis campaigns in the Balkans, this book offers a detailed overview of the Italian and Greek armies, their fighting power, and the terrain in which they fought. Complimented by rarely seen images and full colour illustrations, it shows how expectations of an easy Italian victory quickly turned into one of Mussolini's greatest blunders.

Information technology (IT) has had, and will continue to have, a deep impact on the defence sector. The most advanced countries, not only the U.S. but also France, Great Britain and Italy, over the past few years have undergone a transormation of their armed forces aimed at exploiting the strategic advantages of IT. The goal pursued in Europe, and also promoted by NATO, is Network Enabled Capability (NEC). That is combining equipment and soldiers, as well as different doctrinal, procedural, technical and organizational elements, into a single network to obtain their interaction in order to achieve substantial strategic superiority. In practice, this also occurs with a strong, efficient and secure telecommunications network, and through netcentric modernization of armed forces' capability and systems aimed at connecting them to the net. This research paper analyzes the military netcentric modernization and transformation programs - still in progress - in France, Britain and Italy, with special focus on the joint program led by the Italian army called "Forza NEC". Opportunities and challenges of "Forza NEC" have been considered according to the Italian armed force's requirements, developed during two decades of experience in international military operations, as well as in the light of the evolution of strategic doctrine at a European and transatlantic level. Particular attention has been devoted to the interaction between industry and the armed forces, and to the involvement of many Italian companies in different "Forza NEC" activities, as it represents one of the pillars of the procurement program.

Teodoro Petkoff and the other members of the Movimiento al Socialismo (MAS) in Venezuela had aroused the ire of the orthodox communist leaders by claiming to be both authentic communists and true nationalists, not bound by the dictates of either the Moscow or Maoist/Beijing wings of the party. To infuriate the traditionalists even further, Petkoff and his associates succeeded in being more than isolated critics, as MAS quickly eclipsed the traditional Venezuelan Communist Party and became that country's leading leftist group. The author places MAS in its international, national, and historical contexts in order to determine the extent to which it is a unique communist party, as it claims to be. He traces the theory of "national democratic revolution," which MAS rejects, back to Lenin, and discusses the Latin American left's reevaluation of that thesis. Ellner examines the guerrilla movement in Venezuela, the student movement of the late 1960s, and the emergence of the "New Left" in other countries, especially noting their influence on the formation of MAS. He also discusses the group's role in Venezuelan elections and its relations with the other parties.

The Complete Book of Moto Guzzi Janes Information Group

A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1,144 of the world's leading arts and humanities journals, and it indexes individually selected, relevant items from over 6,800 major science and social science journals.

The Balkans 1940-41 (1) Praeger

Tony Seed, Gilbert Thompson, Jackie Downs and John MacDermot at the book's launch in London This book brings together in one volume fifteen Nobel Prize-winning discoveries that have had the greatest impact upon medical science and the practice of medicine during the 20th century and up to the present time. Its overall aim is to enlighten, entertain and stimulate. This is especially so for those who are involved in or contemplating a career in medical research. Anyone interested in the particulars of a specific award or Laureate can obtain detailed information on the topic by accessing the Nobel Foundation's website. In contrast, this book aims to provide a less formal and more personal view of the science and scientists involved, by having prominent academics write a chapter each about a Nobel Prize-winning discovery in their own areas of interest and expertise./a

The Complete Book of Moto Guzzi: 100th Anniversary Edition, Every Model Since 1921, written by respected motorcycle expert Ian Falloon, offers enthusiasts a thorough review of Guzzi's storied 100-year history via all of its production models. The oldest European motorcycle manufacturer in continuous production, Italy's Moto Guzzi has built some of the most iconic motorcycles ever produced. Established in 1921, the company is one of the most traditional motorcycle makers and also one of the most innovative. Carlo Guzzi's first engine design, a horizontal single, defined Moto Guzzi's road-going motorcycles for the company's first 45 years. In the 1950s, Moto Guzzi experienced tremendous success in Grand Prix motorcycle racing. Today, Moto Guzzi has a higher profile than ever, thanks to its popularity among enthusiast celebrities like Ewan McGregor. This new edition of The Complete Book of Moto Guzzi includes a 100th anniversary introduction, new

photography, and additional pages to cover the newest models from 2018 to 2020. All of Moto Guzzi's production models are covered in detail, including the groundbreaking Falcone, the V-8 Grand Prix racers, the V7 Sport, the Ambassador, the Eldorado, the Le Mans, the Daytona, right up to today's the complete range of modern bikes including the V7, Griso, Stelvio, and V9. Celebrate a century of iconic Moto Guzzi machines, model by stunning model.

The work of contemporary Italian thinkers, what Roberto Esposito refers to as Italian Theory, is attracting increasing attention around the world. This book explores the reasons for its growing popularity, its distinguishing traits, and why people are turning to these authors for answers to real-world issues and problems. The approach he takes, in line with the keen historical consciousness of Italian thinkers themselves, is a historical one. He offers insights into the great "unphilosophical" philosophers of life—poets, painters, politicians and revolutionaries, film-makers and literary critics—who have made Italian thought, from its beginnings, an "impure" thought. People like Machiavelli, Croce, Gentile, and Gramsci were all compelled to fulfill important political roles in the societies of their times. No wonder they felt that the abstract vocabulary and concepts of pure philosophy were inadequate to express themselves. Similarly, artists such as Dante, Leonardo Da Vinci, Leopardi, or Pasolini all had to turn to other disciplines outside philosophy in order to discuss and grapple with the messy, constantly changing realities of their lives. For this very reason, says Esposito, because Italian thinkers have always been deeply engaged with the concrete reality of life (rather than closed up in the introspective pursuits of traditional continental philosophy) and because they have looked for the answers of today in the origins of their own historical roots, Italian theory is a "living thought." Hence the relevance or actuality that it holds for us today. Continuing in this tradition, the work of Roberto Esposito is distinguished by its interdisciplinary breadth. In this book, he passes effortlessly from literary criticism to art history, through political history and philosophy, in an expository style that welcomes non-philosophers to engage in the most pressing problems of our times. As in all his works, Esposito is inclusive rather than exclusive; in being so, he celebrates the affirmative potency of life.
