The presentation of the

historical development and the scientific elaboration of the international law regulating non-navigational uses of international watercourses exemplifies the richness of this branch of international law. The role of general international law in this field of international relations, the acceptance thereof by the international community, its legal nature, functions, contents, and codification, are all examined. Finally, an outline of the institutions of international cooperation is given.

 Canadian
 Multiculturalism and
 the Far Right examines

a neglected aspect of the history of 20th century Canadian multiculturalism and the far right to illuminate the ideological foundations of the concept of 'third force'. Focusing on the particular thought of ultra-conservative Ukrainian Canadian Walter J. Bossy during his time in Montreal (1931-1970s), this book demonstrates that the idea that Canada was composed of three equally important groups emerged from a context defined by reactionary ideas on ethnic diversity and integration. Two broad questions shape this research: first, what the meaning originally attached to the idea of a 'third force' was, and what the intentions behind the

conceptualization of a trichotomic Canada were; and second, whether Bossy's understanding of the 'third force' precedes, or is related in any way to, postwar debates on liberal multiculturalism at the core of which was the existence of a 'third force'. This book will be of interest to students and researchers of multiculturalism, radical-right ideology and the far right, and Canadian history and politics.

Taylor & Francis

This collection contains a selection of papers presented at the very first All-European Canadian Studies Conference that took place in The Hague, October 24-27, 1990.

This unique meeting took place for the first time in the history of Canadian Studies. The focus of the papers is on the future rather than the past and it took place at a moment in time when Canada went through major crises that raised serious doubts about the country's future. The papers of this volume explore the main issues and problems that Canada faces. The volume

contains sections on demography, environmental problems, economic transformations, Canadian identity, political power structure, aboriginal issues and Canada's international relations. As a whole the book takes stock where Canada stands and where it is going.

Treaty Series; Publication of Treaties and International Engagements Registered with the Secretariat of the League

Graduate Institute Publications

Le Droit congolais des hydrocarbures est encore en gestation. Il n'existe pas un droit congolais special pour les hydrocarbures des lacs internationaux meme si le regime de droit commun s'applique mutatis

mutandis aux hydrocarbures frontaliers. En fait, depuis le decret du 13 mars 1959, la gestion congolaise des hydrocarbures a ete melangee avec celle des mines sur le plan des principes, alors qu'en realite elle decampe totalement a la mainmise de l'Etat congolais. La mise en place du code minier de 2002 a manifestement rendu autonome le secteur d'hydrocarbures qui doit avoir une nouvelle legislation pouvant succeder a celle de 1981 jugee obsolete mais restant toujours en vigueur. Cette etude specifique sur le petrole du lac Albert vient soutenir d'autres analyses en matiere de droit des hydrocarbures decrivant la carence d'une

legislation congolaise
competitive dans le
secteur du petrole. Ce
manuel apporte
quelques solutions
relatives a l'absence
d'un droit regional
devant regir les
hydrocarbures des lacs
internationaux qui
laisse des inquietudes
enormes pour les
chercheurs.

This book
comprehensively
describes the history of
Gatineau Park, from
the first proposals for a
“national park” in the
early 1900s to the
governance issues in
the present period, and

it highlights the issues concerning the planning and governance of this unique near-urban ecological area. The 34,500-hectare Gatineau Park is an ecologically diverse wilderness area near the cities of Ottawa (Canada's national capital) and Gatineau. Gatineau Park is planned and managed as the "Capital's Conservation Park" by the federal government, specifically the National Capital Commission (NCC). This monograph examines numerous governmental and non-governmental actors that are engaged in the governance of a near-urban wilderness area. Unlike Canada's national parks, Gatineau Park's

administration involves all three levels of government (federal, provincial, and four municipalities). This book is the first to document the relations among the public and private entities, and is one of only a handful of studies concerning the governance of Canada's National Capital Region (NCR), which is relatively unique in the literature on federal capitals. Of particular interest to students of governance will be the examination of federal-provincial relations, as the Governments of Canada and Quebec have had a notoriously strained relationship. As the first governance study of Gatineau Park, the monograph will provide readers with insight into the significance of non-

state actors, showing the range of competencies that public and private groups deploy in their negotiations with NCC planners, policymakers, park managers, local and federal politicians.

Canada on the Threshold of the 21st Century UBC

Press

First signed in 1886, the Berne Convention for the Protection of Literary and Artistic Works is still the cornerstone of international copyright law. Set against the backdrop of Canada's development from a British colony into a middle power, this book reveals the deep roots of conflict in the international copyright system and argues that Canada's signing of the convention can

be viewed in the context of a former British colony's efforts to find a place on the world stage. In this groundbreaking book, Sara Bannerman examines Canada's struggle for copyright sovereignty and explores some of the problems rooted in imperial and international copyright that affect Canadians to this day.

This book synthesizes the relationship between Brazil and Canada to uncover a neglected history. Relying mostly on primary sources, this study is the first synthetic treatment of this relationship; it builds on the limited historiography that does exist and opens up new interpretive channels that can be explored in the future.

Depuis la découverte des hydrocarbures dans les lacs internationaux, plusieurs enjeux s'imposent aux Etats. Nous remarquons que la géopolitique des

hydrocarbures incite aujourd'hui les Etats à se faire la guerre pour maintenir leur puissance dans la gestion de ces ressources naturelles. L'analyse du Droit Congolais des hydrocarbures des Lacs internationaux a déterminé notre sens de recherche et de compréhension de la politique des Etats dans la région des Grands Lacs africains. En effet, nous avons voulu montrer dans ce manuel que la question de la gestion des ressources naturelles intéresse l'Etat car c'est lui qui décide dans son programme gouvernemental la pensée de sa politique nationale et de sa politique internationale. De ce fait, nous présentons que la gestion du gaz

méthane suscite beaucoup d'intérêts pour la RDC car cette ressource naturelle permet de fournir de l'électricité à quantité suffisante aux Etats voisins du Lac Kivu. Cependant, avec estime, nous croyons que la RDC doit faire montre d'un esprit de dynamisme et d'implication juridique efficace en cette matière. D'où, l'adaptation et la revalorisation des textes juridique sont des grands défis.
