Magazine John Wiley & Sons Incorporated Legionnaires' disease, a pneumonia caused by the Legionella bacterium, is the leading cause of reported waterborne disease outbreaks in the United States. Legionella occur naturally in water from

many different environmental sources, but grow rapidly in the warm, stagnant conditions that can be found in engineered water systems such as cooling towers, building plumbing, and hot tubs. Humans are primarily exposed to Legionella through inhalation of contaminated aerosols into the respiratory system. Legionnaires' disease can be fatal, with between 3

and 33 percent of Legionella infections leading to death, and studies show the incidence of Legionnaires' disease in the United States increased five-fold from 2000 to 2017. Management of Legionella in Water Systems reviews the state of science on Legionella contamination of water systems, specifically the ecology and diagnosis. This report explores the process of

transmission via water systems, quantification, prevention and control, and policy and training issues that affect the incidence of Legionnaires' disease. It also analyzes existing knowledge gaps and recommends research priorities moving forward.

Written and designed for casual enthusiasts, as well as restorers who want to determine which parts, accessories

and colors will restore their cars to factory-original condition, every title in the Bay View Original Series provides a huge selection of color photography, comprehensive factory records, thorough specifications, detailed parts lists and nostalgic period literature. The brainchild of a young GM executive named John DeLorean, the Pontiac GTO that growled forth from the 1963 Tempest

LeMans sport package is the acknowledged granddaddy of American muscle cars. This guide features a huge selection of color photography depicting GTOs from 1964 through 1974, including Tripowers, Ram Air models, Royal Bobcats and the much-revered Judges in all their "Orbit Orange", "Limelight Green" and "Carousel Red" glory. *Motor Age* Now revised and updated,

this book tells the story of how the automobile transformed American life and how automotive design and technology have changed over time. It details cars' inception as a mechanical curiosity and later a plaything for the wealthy; racing and the promotion of the industry; Henry Ford and the advent of mass production; market competition during the 1920s; the development

of roads and accompanying highway culture; the effects of the Great Depression and World War II; the automotive Golden Age of the 1950s; oil crises and the turbulent 1970s; the decline and then resurgence of the Big Three; and how American car culture has been represented in film, music and literature. Updated notes and a select bibliography serve as valuable resources to

those interested in automotive history.
