PIERRE DAVILA

Running a Successful Construction Company Routledge
How to make dirty millions the clean way, was written as part of my life's goal to end world hunger and poverty. These subjects were discussed in more details in my new book, *The Movie/Dirty Millions The Clean Way*. Although these titles are similar, the contents in these books are as different as night and day. This how-to book is a no-nonsense easy to understand guide to changing your business career, as you make lots of money. Starting from this point forward I like to ask you to please hang in there and continue reading. To some, what I'm about to say moving forward is going to sound like another get rich sales pitch. Believe me it's not. What makes this book different from those get rich schemes, is that I've been there and done that. I have experience and lived through the true details of this book. I'm going to show you how you are missing out on lots of money making and good business opportunities every day. In one section of this book, I discuss how you can become a money making contractor almost overnight. Starting with little to no out of pocket money, I've seen poor people become wealthy. Example: If you work, drive, walk, or have access to any type of building, you can make major life-changing wealth, come into your life. The potential is there to triple your monthly income, or maybe even becoming a millionaire. With that being said, a quick description of a contractor is a, plumber, electrician, carpenter, etc., who contracts his skills out for money. Now I know you're wondering what does that have to do with me, I know nothing about those building trades. Again, I'm asking you to please continue to read as I clarify this here and in the book, details that may make you wealthy. Now I understand most of us do not have precise building trade skills, as this book will show you in detail how you could use other people skills, in these buildings to get rich. For instance there is a trade that most people in America have expert skills of doing, but have never use them to make money. If you clean your house, car, body, you already have a skill that some are using to make millions of dollars each month. One of the most overlooked building trades that is worth millions, is the professional building cleaning service trade. Most people look down on this particular trade, as it has become very lucrative business. Without further ado, I will give you a few more details of this particular book chapter. Take any size building you work in, visit, or do business in. A five-story building for example, with approximately 20,000 square feet per floor, is a monthly income goal mind. Like I mentioned before you have the skills to clean your home as well as this hundred thousand square foot building. Now with this hundreds thousand square foot building or other size buildings you pass by each week. You could change your financial status almost overnight. Feel free to approach a building property manager. Ask him when the next cleaning bid is due for renewal. Most cleaning contracts go out for re-bid once every four or five years, especially when it comes to government buildings. If the property manager give you a bid package, in my

book I will discuss the details on how to bid buildings from around the country, without leaving your home or office. For example this particular building, 100,000 square feet. You will take the total square footage x's .97 cent per square foot. This will give you a total of \$97,000 per year. Now divide this number into 12 months, to give your property manager's his monthly bid price/cost of, \$8,083. Now, keep in mind this particular type of daily cleaning Monday to Friday, will take a small crew and yourself about 3 to 4 hours per night to clean. Like I mentioned before you can also use other people skills to make you rich. For example you can subcontract this cleaning contract to a local building cleaning service. Pay them \$5000 per month, you keep the balance for doing nothing. Ten + buildings =

Commerce Business Daily John Wiley & Sons

A guide to the exciting and profitable field of construction cleanup?cleaning and preparing facilities after the builders leave and before the tenants move in. How to do it efficiently and professionally, for new construction or remodeling projects. Plus all the forms and checklists you need!

Engineering News and American Railway Journal Butterworth-Heinemann

Publisher description

International Commerce Don Aslett's Cleaning

The Teaching of Instrumental Music, Fifth Edition introduces music education majors to basic instrumental pedagogy for the instruments and ensembles commonly found in the elementary and secondary curricula. It focuses on the core competencies required for teacher certification in instrumental music, with the pervasive philosophy to assist teachers as they develop an instrumental music program based on understanding and respecting all types of music. Parts I and II focus on essential issues for a successful instrumental program, presenting first the history and foundations, followed by effective strategies in administrative tasks and classroom teaching. Parts III, IV, and V are devoted to the skills and techniques of woodwind, brass and percussion, and string instruments. In all, The Teaching of Instrumental Music is the complete reference for the beginning instrumental teacher, commonly retained in a student's professional library for its unique and comprehensive coverage. NEW TO THIS EDITION: Revision and updating of curriculum developments, such as coordinating State Department of Education student learning objectives with the recent Every

Student Succeeds Act (ESSA) New discussion of the NAFME National Standards as they relate to the teaching of instrumental music Revamping of rehearsing instrumental ensembles chapters, including new or expanded sections on programming, choosing quality music, and applying successful rehearsal techniques Updates on references, plus new discussion questions, and websites and internet links A chapter devoted to classroom guitar Updates on the use of technology for teaching and learning music More on healthy performance practice, marching band, and jazz band Online materials located in the eResources section on the Routledge website.
