 "This book presents an alternation of illustrations, texts and synopses whose images and imaginative concepts all refer to one

other. It is open to a multiplicity of interpretations, inviting confrontations and the discovery of similarities, relationships and analogies between works of art and various subjects of thought." "Denis Gielen compiles facts, stories, art works and intentions, abiding by laws which, although they may not be universal, are nevertheless able to serve as our guide as we - author and reader - roam together along the meandering paths of creation, following the

trails which unite the works and visions of our contemporaries."--BOOK JACKET.
Georg Buchner Books that Change
 "Prodependence," a new psychological term created by Robert Weiss to describe healthy interdependence in the modern world, turns this around. Rather than preaching detachment and distance over continued bonding and assistance, as so many therapists, self-help books, and 12-step groups currently do,

prodependence celebrates the human need for and pursuit of intimate connection, viewing this as a positive force for change. Simply stated, prodependence occurs when attachment relationships are mutually beneficial--with one person's strengths filling in the weak points of the other, and vice versa. And this can occur even when an addiction is present

The digital revolution has enabled a generation of entrepreneurs to innovate at low cost and low risk, and this has encouraged more and more young graduates to head down the digital route. While - from a legal point of view - creating a start-up is within anyone's reach, making a business sustainable is more complex, and depends on many different factors. These factors are covered in detail within the pages of this book. Whether you are a student or a

professional, there are many questions you need to ask when you embark on the adventure that is entrepreneurship. When and how should you get started? Which training or which support system should you choose? What are the pitfalls you need to avoid? What habits should you get into to make sure your start-up heads along the right path? How do you go about buying or selling a business? This book sheds light on the various tracks you can take from school to start-up, so you can

bridge the gap between your university course and your career as an entrepreneur. There is plenty of advice and tips for both students and professionals. The book also covers the changes that have been brought about by digital technology and globalisation. It explores success factors such as governance, the commercial and marketing sides of a business, and shares the keys for optimising a business sale or takeover. Business and

management schools are in tough competition with one another. They all want to attract the leaders of tomorrow who will be able to create and change the business world to tackle the challenges of modern society. The book contains material for teachers to guide them as they reflect on how to forge tighter bonds between training and entrepreneurship and get their students on the right path (raising awareness, providing support tools, identifying incubators). The authors

have covered both initial training and continuing education. By combining insight from professionals and researchers, From school to start-up comprehensively unpicks the challenges of entrepreneurship with great skills and clarity.

The Paris Pages highlight Sainte-Chapelle, a small Gothic chapel in Paris in France. The French King Louis IX built the chapel in the 1240s to house relics from the Holy Land believed to be the Crown

of Thorns and part of the True Cross. The chapel is famous for its stained glass windows. Images with descriptions of the chapel are available.

This volume examines the ways that sovereign rulers have employed well-defined symbols, attributes, and stereotypes to convey their power to their subjects and rivals, as well as to leave a legacy for subsequent generations to admire.

Legendary rulers from antiquity such as Alexander the Great, Julius Caesar, and Constantine have been looked to as models for their display of imperial power by the rulers of later eras. From medieval sovereigns such as Charlemagne and France's Louis IX to the tsars of Russia and the great European royal dynasties of the Hapsburgs, the Bourbons, and the Tudors, the rulers of each period have appropriated and often embellished the emblems

of power employed by their predecessors. Even the second-tier lords who ruled parts of France and Italy during the Renaissance, such as the dukes of Burgundy, the Gonzaga of Mantua, and the Medici of Florence became adept at manipulating this imagery. The final chapter is reserved for Napoleon I, perhaps the ultimate master of symbolic display, who assumed the attributes of Roman emperors to project an image of eternal and immutable authority. The

author examines not only regal paraphernalia such as crowns, scepters, thrones, and orbs, but also the painted portraits, sculptures, tapestries, carved ivories, jewelry, coins, armor, and, eventually, photographs created to display their owner's sovereign power, a vast collection of works that now forms a significant portion of the cultural heritage of Western civilization. *From School to Start-up* Grinder, DeLozier & Associates. BELIEFS are the

foundation of everyone's personal outcomes. This second edition of *Beliefs: Pathways to Health & Well-Being* includes new and updated material and offers leading edge technologies that rapidly and effectively identify and remodel limiting beliefs. It teaches you powerful processes for change and demonstrates how to identify and change beliefs using scripts from personal change work undertaken with individuals in workshops. These processes include

reimprinting, conflict integration, belief/reality strategies, visualization and criteria identification. You will learn the latest methods to change beliefs which support unhealthy habits such as smoking, overeating and drug use; change the thinking processes that create phobias and unreasonable fears; retrain your immune system to eliminate allergies and deal optimally with cancer, AIDS and other diseases; and learn strategies to transform

"unhealthy" beliefs into lifelong constructs of wellness.

The Stones of Venice

"Windows, write the authors, "separate viewer from view, inside from outside, public from

private." It's in this spirit that windows, and their frequent companion, the shutter, are given weighty consideration by the husband and wife team who wrote Colors of the World and Doors of the World. A designer/colorist who founded a company that specializes in color in architecture, Jean-Philippe's expertise is obvious in choosing the more than 100 color photos that make up what is essentially a picture book showcasing windows-bay, rose, lancet and half-fan-and wood,

metal and louvered shutters. Very little text complements with the photos, and that which is included offers a brief history and analysis of shutters found in Europe and the Middle East. The authors' knowledge of and focus on window minutiae (casement proportion, paint color, woodwork form), while undoubtedly the result of much research, is spread too thinly to truly enhance the photographs. Design aficionados and architects may be satisfied by this book, but those with less

enthusiasm for those fields may find this, even as a companion to *Doors of the World*, feels like a piece of a larger work." - product description.
