MCDOWELL HAILEY

Global Perspectives on Legal Challenges Posed by Ridesharing Companies Springer Nature

This is a lively collection of essays by an internationally distinguished group of the world's most respected administrative lawyers. Written in honor of eminent legal scholar Sir William Wade, this timely work takes into account a period of unprecedented expansion in the judicial review jurisdiction and the growing legal impact of membership of the European Community as well as a recent burgeoning of theoretical public law scholarship. The contributors reflect on the international dimension of administrative law issues and assess how public law doctrine and scholarship will progress into the new millennium.

Working Towards Sustainable Development Pluto Press (UK)

What do the Economic Freedom Fighters (EFF) stand for? How do they propose to nationalize mines, banks, and land? Is Julius Malema, the founder of the EFF, equipped to legislate or to lead? These tough questions are asked in *The Coming Revolution: Julius Malema and the Fight for Economic Freedom*. Malema is tackled on his tax woes and on the "tenderpreneur" label by Janet Smith, an executive editor of the Star. Smith asks Malema to explain, contextualize, and motivate his political agenda and the genesis of the new party. Hard-hitting and informative, *The Coming Revolution* disrupts the dominant South African political narrative.

Financial Mail Haymarket Books

A green economy is necessary if sustainable development is to be realised. However, as this report emphasizes, a green economy can also, if accompanied by the right policy mix, create more and better jobs, lift people out of poverty and promote social inclusion. In fact, the growth model of the past few decades has been inefficient, not only economically, but also from environmental, employment and social perspectives. It overuses natural resources, is environmentally unsustainable and has failed to meet the aspirations of a large proportion of society seeking productive, decent work and dignified lives. A new development model - one which puts people, fairness and the planet at the core of policy-making - is urgently needed, and is eminently achievable. More fundamentally, this report demonstrates that employment and social inclusion must be integral parts of any sustainable development strategy and must be included in policies that address climate change and ensure the preservation of the environment. In particular, the report assesses the sectoral, employment and income implications of the transition to a green economy. It highlights the necessary conditions, policy prescriptions and good practices required to ensure that the green economy is characterized by gains in job quality, reductions in poverty and improvements in social inclusion.

An Emerging Agenda for Trade Unions? Virago Press

Essays that address the question: how can people and class agency change this destructive course of history? Capitalism's addiction to fossil fuels is heating our planet at a pace and scale never before experienced. Extreme weather patterns, rising sea levels and accelerating feedback loops are a commonplace feature of our lives. The number of environmental refugees is increasing and several island states and low-lying countries are becoming vulnerable. Corporate-induced climate change has set us on an ecocidal path of species extinction. Governments and their international platforms such as the Paris Climate Agreement deliver too little, too late. Most states, including South Africa, continue on their carbon-intensive energy paths, with devastating results. Political leaders across the world are failing to provide systemic solutions to the climate crisis. This is the context in which we must ask ourselves: how can people and class agency change this destructive course of history? Volume three in the Democratic Marxism series, *The Climate Crisis* investigates eco-socialist alternatives that are emerging. It presents the thinking of leading climate justice activists, campaigners and social movements advancing systemic alternatives and developing bottom-up, just transitions to sustain life. Through a combination of theoretical and empirical work, the authors collectively examine the challenges and opportunities inherent in the current moment. This volume builds on the class-struggle focus of Volume 2 by placing ecological issues at the centre of democratic Marxism. Most importantly, it explores ways to renew historical socialism with democratic, eco-socialist alternatives to meet current challenges in South Africa and the world.

CCMA Rules International Labor Office

Collective Labour Law focuses on those aspects of labour law commonly designated 'collective', as opposed to 'individual' (dealt with in Dismissal, Discrimination and Unfair Labour Practices). The book sheds light on the forums, institutions and processes of collective bargaining and its ancillary, industrial action.

The Wiehahn Commission Springer Science & Business Media

This book deals with labour relations act, basic conditions of employment and employment equity acts, affirmative action, discrimination in employment, strikes and lock-outs, collective bargaining and many other issues.

Trade Unions of the World ILO South-E Eam

The ANC and negotiations, by Willie Esterhuysen

Business With a Conscience Routledge

In recent years, the postal sector has undergone radical changes, which have primarily been driven by operational and technological developments.

Not only has the advent of Information and Communication Technology (ICT) added competition to the market, but it has also provided ample opportunity for the broadening and improvement of services and product range. This book deals with the challenges faced by the postal sector in the digital age, and with the vast opportunities that technological advancements offer postal operators with regard to developing new business solutions and services tailored to the needs of their customers. It provides an analysis of these opportunities and identifies the ways in which postal operators might benefit from the digital age and new market requirements. The book is divided into three main parts: various digital dimensions; e-commerce challenges; and opportunities for partnership with governments. A final chapter discusses the developments described in the book and the views and ideas of the authors. The book will be of interest to all those responsible for developing and running postal services, as well as to anyone affected by the changes which have already taken place or the possibilities opening up for new and improved services.

A Fighting Union Juta and Company Ltd

"This book is the most comprehensive exposition of practice and procedure in the various forums charged with resolving employment and labour disputes in South Africa. It provides an overview of the nature, powers and jurisdiction of the CCMA, bargaining councils, the Labour Court and private arbitrators, and guides the reader through the maze of rules and procedures that must be followed to process matters through these forums, while giving useful tips on how to avoid or surmount obstacles that might arise along the way. This book is more than a practice manual. It sets out the principles underlying the issues discussed and illustrates them with many examples from decided cases. Labour litigation and dispute resolution forms one volume of a quartet by the author, which together covers the entire field of labour law as it has developed in South Africa to date. It is also available in electronic form, which is updated quarterly."--Back cover.

Transport, Environment and Health Pritchett & Hull Associates, Incorporated

"Labour Relations: A southern African perspective is the seventh edition of a text first published in 1989 under the title *Labour Relations in South Africa*. At that time, it was the first comprehensive textbook of its kind and was hailed as having reached the finishing line when others were still at the starting block. Since then continuous social, political and legislative developments, and the ever-changing labour relations scenario, have necessitated regular updates, as well as the more recent change to its title. Like its predecessors, this edition uses the labour 'relationship' as its starting point, guiding readers through the establishment of labour relations systems, the key participants and interactions involved and the legislation governing these interactions. It does this by using detailed practical examples, explanations and real-life cases where applicable. In various parts of this latest edition, the text touches on the Fourth Industrial Revolution, the nature of changes to come and the implications for the world of work."--Publisher's description.

Labour Dispute Resolution WHO Regional Office Europe

This book examines how regulators and policymakers from nine different countries have dealt with Uber, and initiates a legal dialogue between different jurisdictions that could potentially pave the way to a harmonized approach in regulating Uber. The case studies, conducted in Brazil, Germany, Italy, Mexico, Spain, South Africa, Turkey, the UK and the US reveal the case law and regulatory responses that have been adopted in various areas of law. Legal issues relevant to Uber include market regulation, labor law, civil liability, consumer protection, unfair competition and antitrust law. The book thus compares and contrasts the regulatory policy implications of the disruptive innovation created by Uber in the area of transport services. The book starts with a conceptual overview of the legal challenges posed by Uber and concludes with comparative findings based on the individual case studies. In addition to introducing academics and legal practitioners to the theoretical and practical legal problems they may encounter in connection with Uber, the book will especially appeal to policymakers, who can benefit from and compare the experiences of other jurisdictions.

The ANC and Its Leaders Juta and Company Ltd

This book brings together the scientific evidence on the main effects of transport on human health and the environment. It sets the conceptual framework for future analyses of the health burden and health gains from transport policies. It outlines how these health concerns have been reflected in policy tools such as impact assessment, regulation and economic analysis, and identifies the areas where action is most needed. Discussions of the environment and health effects of transport need to be communicated in a way that is relevant for policy-makers and easily understood by nonscientists. That is the aim of this book, which summarizes the results of extensive reviews of the issues prepared by groups of prominent international experts. It is also planned to release the reviews themselves, to give a more detailed account of the scientific evidence. [Foreword]

The South African Law of Unfair Dismissal Oxford University Press

Aviation is one of the most widely talked about industries in the global economy and yet airlines continue to present an enigma. Between 2010 and 2018 the global airline industry experienced its longest period of sustained profitability; however, huge global profits hid a darker side. Many airlines made inadequate profits or serious losses while others collapsed entirely. This fifth edition of *Flying Off Course* explains why. Written by leading industry expert, Rigas Doganis, this book is an indispensable guide to the inner workings of this exciting industry. Providing a complete, practical introduction to the fundamentals of airline economics and marketing, it explores the structure of the market, the nature of airline costs, issues around pricing and demand, and the latest developments in e-commerce. Vibrant examples are drawn from passenger, charter and freight airlines to provide

a dynamic view of the entire industry. This completely updated edition also explores the sweeping changes that have affected airlines in recent years. It includes much new material on airline alliances, long-haul low-cost airlines, new pricing policies and ancillary revenues in order to present a compelling account of the current state of the airline industry. Offering a practical approach and peppered with real examples, this book will be valuable to anyone new to the airline industry as well as those wishing to gain a wider insight into its operations and economics. For undergraduate or postgraduate students in transport studies, tourism and business the book provides a unique insider's view into the workings of this exciting industry.

Labour Relations Verity Publishers

Practicing business with a conscience leaves no sector untouched. It trickles into how we treat our employees, approach our work in general, address stakeholders, engage in accounting, financial, and production management practices, implement and manage information technology, communicate on a direct and indirect basis, and market what we stand for. Business has encountered an interesting evolution in the first two decades of the twenty-first century, with social media as a catalyst toward greater understanding regarding the critical value of soft skills, workplace diversity, change readiness, moral responsibility, sustainable awareness, and a general socially responsible mind-set. This amalgamate spirit of business as we envision it in the near and far future has found its way in all segments of business education, research, and practice. Adhering to the global trend of increased responsibility and evoking a constructive change in the narrative of business, this Research Companion serves as a critical reference work to business scholars and practitioners in various settings. It brings together contributing scholars from multiple business areas, from a variety of cultures and locations of the world, in order to achieve a reference work that will find expansive appeal. Including insights from the broad business spectrum ranging from internal managerial practices to strategic applications, including international sensitivity, this volume highlights the urgency for increased awareness in business decision-making on all fronts. It will be of great value to researchers, academics, practitioners, and students in the fields of corporate social responsibility, business ethics, leadership, organizational studies, and entrepreneurship.

Policy Reforms and Employment Relations in Zambia Routledge

Adopting the International Labour Organization categories of termination of employment for misconduct, incapacity and operational requirements, this book records the developments of the law, provides a current perspective on dismissal and comments on likely future development.

Global Corruption Barometer Africa 2019 Trade Union Library & Education Centre

This second edition contains a new section on dispute resolution in the public sector.

South Africa's Economic Crisis IOS Press

Why does one country take the lead over others in the development and introduction of environmental innovations? This book analyzes lead markets for innovations such as fuel cells and photovoltaics, and offers insight into why this is. The authors use case studies to illustrate the policy framework that favors environmental innovation, and offer recommendations for research and development, environmental and industrial policies.

The Golden Metwand and the Crooked Cord NYU Press

Successfully Implementing Turnaround Strategies in State-Owned Companies is based on comprehensive research into the implementation of turnaround strategies at South African Airways and Kenya Airways, and into the strategic restructuring which saw Ethiopian Airlines emerging as the most successful African airline. It is based on almost 50 interviews which the author, turnaround strategy scholar Kaizer Nyatumba, had with a wide variety of stakeholders especially in South Africa and Kenya, among them Senior Executives, Board Members, Cabinet Ministers (among them Barbara Hogan, Malusi Gigaba and Nhlanhla Nene) and Labour Representatives. Informed by in-depth research, this book is a must-read for anybody interested in the subject of turnaround strategies and, especially, how the fortunes of ailing State-owned companies in South Africa, Kenya and elsewhere on the continent can be turned around successfully.

Trade Unions and Their Members Saldru Division of Research S

Illuminates key connections between the social justice movements of the last fifty years and today's most innovative labor organizing.

The Quantum Leap Strategy Juta and Company Ltd

A comprehensive examination of the contemporary mineworkers' movement in South Africa, in a vivid ethnographic narrative.
