Education and Humanism Harper Collins		This text portrays America as dying from a refusal to engage a dialogue, a policy where everybody speaks but nobody listens. From this ailment the author provides a diagnosis which defends dialogue, negotiating conflict and keeping democracy alive.
Determinants of the Death Penalty seeks to explain the phenomenon of capital punishment - without recourse to value judgements - by identifying those characteristics common to countries that use the death penalty and those that mark countries which do not. This global study uses statistical analysis to relate the popularity of the death penalty to physical, cultural, social, economical, institutional, actor oriented and historical factors. Separate studies are conducted for democracies and non-democracies and within four regional contexts. The book also contains an in-depth investigation into determinants of the death penalty in the USA.		<i>Determinants of the Death Penalty</i> Random House of Canada
<i>Applying IFRS for SMEs</i> Oxford University Press, USA		Paul Horwich presents a bold new interpretation of Wittgenstein's later work. He argues that it is Wittgenstein's radically anti-theoretical metaphilosophy - and not his identification of the meaning of a word with its use - that underpins his discussions of specific issues concerning language, the mind, mathematics, knowledge, art, and religion.
"Stadium Games begins with the events leading to the arrival of the Twins and Vikings to the state in 1961 and traces subsequent controversies about professional sports in the region up to the present. Weiner discusses the factors that make Minnesota the poster child for the nation's stadium debates - the recent departure of the North Stars hockey team, the near departure of the Timberwolves, the strong opposition of taxpayers, and the apparent greed of team owners. Stadium Games reveals the behind-the-scenes deals and inside scoop on what went wrong in the recent unsuccessful campaign for a new ballpark, divulging how public relations experts failed and how government leaders conspired to fake out Minnesota's citizens."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Asian Godfathers Profile Books		Forests are extraordinary in their contribution to the basic human need for environmental stability and security, as well as in their contribution to the livelihood of many. The World Commission on Forests and Sustainable Development (WCFSD), through its unique makeup and independent nature, has been able to address the most significant issues surrounding the world's forests in a manner not possible for any other body or institution. By convening public hearings all over the world to give voice to those who depend on forests, and by engaging itself in the politics of the issues at the highest levels, the WCFSD has endeavored to address fundamental and serious concerns. This report, representing the culmination of these efforts, discusses forest practices, politics and policies, and the social situations which they create or perpetuate and presents the Commission's findings, conclusions and recommendations.
Patricia Crone's God's Rule is a fundamental reconstruction and analysis of Islamic political thought focusing on its intellectual development during the six centuries from the rise of Islam to the Mongol invasions. Based on a wide variety of primary sources--including some not previously considered from the point of view of political thought--this is the first book to examine the medieval Muslim answers to questions crucial to any Western understanding of Middle Eastern politics today, such as why states are necessary, what functions they are meant to fulfill, and whether or why they must be based on religious law. The character of Muslim political thought differs fundamentally from its counterpart in the West. The Christian West started with the conviction that truth (both cognitive and moral) and political power belonged to separate spheres. Ultimately, both power and truth originated with God, but they had distinct historical trajectories and regulated different aspects of life. The Muslims started with the opposite conviction: truth and power appeared at the same time in history and regulated the same aspects of life. In medieval Europe, the disagreement over the relationship between religious authority and political power took the form of a protracted controversy regarding the roles of church and state. In the medieval Middle East, religious authority and political power were embedded in a single, divinely sanctioned Islamic community--a congregation and state made one. The disagreement, therefore, took the form of a protracted controversy over the nature and function of the leadership of Islam itself. Crone makes Islamic political thought accessible by relating it to the contexts in which it was formulated, analyzing it in terms familiar to today's reader, and, where possible, comparing it with medieval European and modern political thought. By examining the ideological point of departure for medieval Islamic political thought, Crone provides an invaluable foundation for a better understanding of contemporary Middle Eastern politics and current world events.		<i>From Media Hype to Twitter Storm</i> Createspace Independent Publishing Platform
<i>A Technique for the Measurement of Attitudes</i> Oxford, Ohio : Miami University ; Glenview, Ill. : Scott, Foresman		40 or 50 families control the economies of Hong Kong, Singapore, Thailand, the Philippines and Indonesia. Their interests range from banking to property, from shipping to sugar, from vice to gambling. 13 of the 50 richest families in the world are in South East Asia yet they are largely unknown outside confined business circles. Often this is because they control the press and television as well as everything else. How do they do it? What are their secrets? And is it good news or bad for the places where they operate? Joe Studwell explosively lifts the lid on a world of staggering secrecy and shows that the little most people know is almost entirely wrong.

Law and Society in Transition Routledge		This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives--cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.
Human beings have the possibility to give meaning to their lives and to create coherence in experiences. Present-day humanism strongly focuses on personal development in relation to others. It is this tension between personal development and advancement of humanization, that is creating the opportunities for the personal development of every world citizen. Humanism is about personal autonomy, moral responsibility, and about solidarity with humanity. The tension between autonomy and social involvement is the core of humanism. Education can support persons in their moral and personal identity development. The authors brought together in this book all address issues of developing autonomy and humanity in educational practices. All the chapters try to link theory and practice. They either make theoretical ideas more practical or they use practical experiences and concerns to rethink theoretical notions. Together the chapters in the book give a broad overview of theoretical foundations, concrete research, and practices in education. The book shows a diversity that can inspire scholars and practitioners in further developing their perspectives. Creating meaning is an essential part of all education. Focusing on the linking of autonomy and humanity is the humanist perspective in it.		<i>The Dissent of the Governed</i> John Wiley & Sons

The Abolition of the Death Penalty in International Law John Wiley & Sons

From renowned educational psychologist, Robert Slavin, the Tenth Edition of this popular text translates theory into practices that teachers can use in their classrooms with deeper inquiry into the concept of intentionality and a thorough integration of standards. This new edition highlights the most current issues and emerging trends in the field of educational psychology, while continuing to have in-depth, practical coverage with a focus on the intentional teacher. An intentional teacher, according to Slavin, is one who constantly reflects on his or her practice and makes instructional decisions based on a clear conception of how these practices affect students. To help readers become intentional teachers, the author offers a set of questions to guide them and models best practices through classroom examples.

In *The Social Contract*, Rousseau wrote one of the most influential studies ever made. It is as relevant today as when it was first published more than 250 years ago. Political society, Rousseau argued, required each individual to submit their personal desires to the 'general will'. At the same time, there was no 'divine right' of the monarchy to allow them to act as they pleased. Therefore, there must be a social contract between governor and governed - the only truly legitimate form of government. Rousseau's ideas influenced both the French and American Revolutions and created the foundations of the liberal democratic societies we live in today.
