Heterogeneous Catalytic Materials discusses experimental methods and the latest developments in three areas of research: heterogeneous catalysis; surface chemistry; and the chemistry of catalysts. Catalytic materials are those solids that allow the chemical reaction to occur efficiently and cost-effectively. This book provides you with all necessary information to synthesize, characterize, and relate the properties of a catalyst to its behavior, enabling you to select the appropriate catalyst for the process and reactor system. Oxides (used both as catalysts and as supports for catalysts), mixed and complex oxides and salts, halides, sulfides, carbides, and unsupported and supported metals are all considered. The book encompasses applications in industrial chemistry, refinery, petrochemistry, biomass conversion, energy production, and environmental protection technologies. Provides a systematic and clear approach of the synthesis, solid state chemistry and surface chemistry of all solid state catalysts Covers widely used instrumental techniques for catalyst characterization, such as x-ray photoelectron spectroscopy, scanning electron microscopy, and more Includes characterization methods and lists all catalytic behavior of the solid state catalysts Discusses new developments in nanocatalysts and their advantages over conventional catalysts

This is the SWEET ROMANCE version of a story by the same title and same authorNeither of them wanted to find love when they moved to St. Raphael - Fate & his Nonna had other plans. Mirella walked away from what was left of her life in Los Angeles. A cheating lover had thrown both her job and her heart under Hollywood's bus, turning her hopes of a long and successful career into smudge on Sunset Blvd. She found a new start in St. Raphael, with a house and friends that began to soothe her aching heart. After a year of hard work, everything is finally running smoothly. Then out of the blue, her match-making neighbor sends her gorgeous grandson over to borrow some garlic, no simple sugar in this town. None of her promises to put her heart on the shelf are going to save her from the way he turns her life upside down.Teodoro built a successful business with his brother in L.A. but when his grandmother's health took a downturn, he knew he had to move to St. Raphael to take of his Nonna. She has other plans, like making sure she would have some great-grandbabies to spoil. Mirella is the perfect candidate & before Teo knows it's happening, he finds himself falling for a woman whose heart has been scarred and stomped on. He knows that he is the right man to heal her heart. When her past shows up, threatening their relationship, instead of putting a wedge between them, they discover that coming to St. Raphael was more than just a change of locale, they were Finding Home.

Buku ini berusaha memenuhi kondisi ideal penggunaan statistik dalam penelitian secara menyeluruh, dimana seluruh alat uji statistik dan contoh kasus pengujian, sedapat mungkin disajikan secara lengkap dan menyeluruh. Hal inilah yang membuat buku ini memiliki kelebihan. Selain itu, buku ini juga meminimalisir penulisan rumus dan formula matematik sehingga statistik terlihat lebih mudah dan aplikatif.

Chemistry: The Molecular Nature of Matter and Change by Martin Silberberg has become a favorite among faculty and students. Silberberg's 4th edition contains features that make it the most comprehensive and relevant text for any student enrolled in General Chemistry. The text contains unprecedented macroscopic to microscopic molecular illustrations, consistent step-by-step worked exercises in every chapter, an extensive range of end-of-chapter problems which provide engaging applications covering a wide variety of freshman interests, including engineering, medicine, materials, and environmental studies. All of these qualities make Chemistry: The Molecular Nature of Matter and Change the centerpiece for any General Chemistry course.

A useful guide to the fundamentals and applications of deep eutectic solvents Deep Eutectic Solvents contains a comprehensive review of the use of deep eutectic solvents (DESs) as an environmentally benign alternative reaction media for chemical transformations and processes. The contributors cover a range of topics including synthesis, structure, properties, toxicity and biodegradability of DESs. The book also explores myriad applications in various disciplines, such as organic synthesis and (bio)catalysis, electrochemistry, extraction, analytical chemistry, polymerizations, (nano)materials preparation, biomass processing, and gas adsorption. The book is aimed at organic chemists, catalytic chemists, pharmaceutical chemists, biochemists, electrochemists, and others involved in the design of eco-friendly reactions and processes. This important book: -Explores the promise of DESs as an environmentally benign alternative to hazardous organic solvents -Covers the synthesis, structure, properties (incl. toxicity) as well as a wide range of applications -Offers a springboard for stimulating critical discussion and encouraging further advances in the field Deep Eutectic Solvents is an interdisciplinary resource for researchers in academia and industry interested in the many uses of DESs as an environmentally benign alternative reaction media.

Validation describes the procedures used to analyze pharmaceutical products so that the data generated will comply with the requirements of regulatory bodies of the US, Canada, Europe and Japan. Calibration of Instruments describes the process of fixing, checking or correcting the graduations of instruments so that they comply with those regulatory bodies. This book provides a thorough explanation of both the fundamental and practical aspects of biopharmaceutical and bioanalytical methods validation. It teaches the proper procedures for using the tools and analysis methods in a regulated lab setting. Readers will learn the appropriate procedures for calibration of laboratory instrumentation and validation of analytical methods of analysis. These procedures must be executed properly in all regulated laboratories, including pharmaceutical and biopharmaceutical laboratories, clinical testing laboratories (hospitals, medical offices) and in food and cosmetic testing laboratories.

The third edition of this successful book, which applies the science of psychology to problems of religion. Dr Thouless explores such questions as: why do people believe? Why are their beliefs often held with irrational strength? How are changes in belief systems related to mental health? What are reasonable attitudes towards alternative belief systems? This edition includes samples of the experimental and statistical studies of religious problems, including the author's own study of the strength of religious beliefs. This edition also pays more attention to the problems of non-Christian religious systems, with special consideration given to the problems of mutual toleration. Finally Dr Thouless considers whether it is reasonable for modern man to adhere to any religious belief system. This is an excellent textbook for students of the social sciences, particularly psychology and theology, and will also interest the general reader who has an intellectual curiosity about religion.

**Clay-containing Polymeric Nanocomposites** McGraw-Hill Science, Engineering & Mathematics Buku versi cetak dapat diperoleh di <http://store.egasing.com> Penyusunan buku ini dibuat dalam format yang berbeda dari buku-buku pada umumnya, yaitu dalam format dialog. Dengan format dialog ini diharapkan siswa lebih mudah memahami dan menyerap ilmu yang disampaikan. Selain itu, format dialog membuat siswa tidak lagi terjebak dalam kalimat-kalimat yang membosankan tetapi justru akan menemukan keasyikan dalam belajar Kimia. Keunggulan lain dari buku ini adalah adanya berbagai fitur dalam setiap bab, misalnya: Profil Tokoh, Diskusi Yuk, Ayo Bereksperimen, Ayo Berlatih, dan lain sebagainya. Fiturfitur tersebut memberi kesempatan kepada siswa untuk belajar dengan cara yang lebih variatif. Di akhir bab, diberikan fitur Ayo Menguji Pemahaman Kita yang berisi soal-soal esai dan pilihan ganda. Dengan adanya fitur tersebut, diharapkan siswa dapat menguji kompetensi masing-masing tentang materi yang telah dipelajari.

In a marketplace fueled by intangible assets, anything less than optimal workforce success can threaten a firm's survival. Yet, in most organizations, employee performance is both poorly managed and underutilized. The Workforce Scorecard argues that current management and human resources practices hinder employees' ability to contribute to strategic goals. To maximize the power of their workforce, organizations must meet three challenges: view their workforce in terms of contribution rather than cost; replace benchmarking metrics with measures that differentiate levels of strategic impact; and make line managers and HR professionals jointly responsible for executing workforce initiatives. Building on the proven model outlined in their best-selling book The HR Scorecard, Mark Huselid, Brian Becker, and co-author Richard Beatty show how to create a Workforce Scorecard that identifies and measures the behaviors, competencies, mind-set, and culture required for workforce success and reveals how each dimension impacts the bottom line. Practical and timely, The Workforce Scorecard offers crucial lessons for leveraging human capital to achieve strategic success.

Technologies for Biochemical Conversion of Biomass introduces biomass biochemical conversion technology, including the pretreatment platform, enzyme platform, cell refining platform, sugar

platform, fermentation platform, and post-treatment platform. Readers will find a systematic treatment, not only of the basics of biomass biochemical conversion and the introduction of each strategy, but also of the current advances of research in this area. Researchers will find the key problems in each technology platform for biomass biochemical conversion identified and solutions offered. This valuable reference book features new scientific research and the related industrial application of biomass biochemical conversion technology as the main content, and then systematically introduces the basic principles and applications of biomass biochemical conversion technology. Combines descriptions of these technologies to provide strategies and a platform for biochemical conversion in terms of basic knowledge, research advances, and key problems Summarizes models of biomass biochemical conversion for multiple products Presents products of biomass biochemical conversion from C1 to C10

Divided into five parts, it begins with the chemistry and properties of food lipids covering nomenclature and classification, extraction and analysis, and chemistry and function. Part II addresses processing and food applications including modification technologies, microbial production of lipids, crystallization behavior, chemical interesterification, purification, and encapsulation technologies. The third part covers oxidation, measurements, and antioxidants. Part IV explores the myriad interactions of lipids in nutrition and health with information on heart disease, obesity, and cancer, with a new chapter dedicated to brain lipids. Part V continues with contributions on biotechnology and biochemistry including a chapter on the metabolic engineering of edible oils. *Biokimia Produk Perikanan* CRC Press

Kimia Analisis Bahan Pangan Newnes

Over the last decades several researchers discovered that children, pupils and even young adults develop their own understanding of "how nature really works". These pre-concepts concerning combustion, gases or conservation of mass are brought into lectures and teachers have to diagnose and to reflect on them for better instruction. In addition, there are 'school-made misconceptions' concerning equilibrium, acid-base or redox reactions which originate from inappropriate curriculum and instruction materials. The primary goal of this monograph is to help teachers at universities, colleges and schools to diagnose and 'cure' the pre-concepts. In case of the school-made misconceptions it will help to prevent them from the very beginning through reflective teaching. The volume includes detailed descriptions of class-room experiments and structural models to cure and to prevent these misconceptions.

Anderson and Whitcomb pick up where they left off in *DOE Simplified* with *RSM Simplified* -- a practical tool for design of experiments that anyone with a minimum of technical training can understand and appreciate. Their approach is simple and fun for those who desire knowledge on response surface methods but are put off by the academic nature of other books on the topic. *RSM Simplified* keeps formulas to a minimum and makes liberal use of figures, charts, graphs, and checklists. It offers many relevant examples with amusing sidebars and do-it-yourself exercises that will lead readers to the peak potential for their product quality and process efficiency.
