Veronica's powers have taught her a lot—about her family, her friends, and how to be herself. They've also literally rained on her parade, turned her green with jealousy, and set her school on fire. You win some, you lose some. Now Veronica's finally figuring out how to control her superpowers. But then she discovers there might be a way to get rid of them forever—and to live a "normal" life. Featuring ten black-and-white illustrations by Simini Blocker, *All the Feels* raises the stakes for this middle-school girl who has to decide if being "normal" is as fun as going on a roller-coaster ride of superpowered emotion. An Imprint Book Praise for *My So-Called Superpowers*: "Heather Nuhfer has hilariously and achingly captured what it's like to be in middle school, trying to control the weird things that make you different but also super. The second book in the heartfelt, hilarious, and acclaimed series, where middle-school student Veronica's superpowers will ruin everything—if she doesn't beat them to it. Veronica has worked hard to get her feelings under control. Sure, sometimes a strong emotion turns into a superpower—giving her a personal raincloud on a bad day, or literally turning her green with envy. But it's happening a lot less these days! Then she finds out what she'll be doing at summer camp: directing her own movie with her best friend Charlie—and her best frenemy Becky. At first it seems fun, until Veronica's superpowers start affecting other people. When Veronica calls "Action!" everyone has to do what she says. But is that the best way to make her dream movie—or to treat her friends? *My So-Called Superpowers: Mixed Emotions* raises the stakes on Veronica's middle-school adventures, proving that her powers are both the best thing and the worst thing that's ever happened to her. An Imprint Book Praise for *My So-Called Superpowers*: "Heather Nuhfer has hilariously and achingly captured what it's like to be in middle school, trying to control the weird things that make you different but also super. Decades of Terror 2021: 2000s Horror Movies Tales of Terror
Hollywood screenwriter and television producer Craig Titley (Marvel's *Agents of S.H.I.E.L.D.*, *Scooby-Doo*, *Cheaper by the Dozen*, *Percy Jackson & the Olympians: The Lightning Thief*, *Star Wars: The Clone Wars*) has, for the first time, put together a collection of 24 essays written as part of his Phd program in Mythological Studies. These essays on pop culture and mythology contain his thought-provoking and often amusing reflections on topics such as: *The Matrix*, *Close Encounters of the Third Kind*, *Barton Fink* and writing for Hollywood, *Kung Fu* cinema, *Joseph Campbell*, farting tricksters, zombies, comedy, fairy tales, screenwriting... and a complete Jungian analysis of *Scooby-Doo*. If you're interested in diving into the deep end of pop culture and mythology then Titley's unique perspective as a Hollywood screenwriter, television producer, mythologist, and self-described Trickster may be just what the doctor ordered. "If you're interested in mythology or storytelling and, in particular, if you're involved in the movie storytelling business like I was, then [Joseph] Campbell is your guide... but not your savior. Ever since it was revealed that George Lucas used *The Hero With a Thousand Faces* as a guide while crafting the story for *Star Wars*,

screenwriters and executives thought they had discovered the Holy Grail, the key to turning every movie into a giant resonating hit. But it doesn't quite work that way. There's much more to storytelling than painting by numbers or plotting by Campbell. It's a skill and a craft born of hard work, sweat and tears. But there's also a magic ingredient involved that no one, not even Campbell, knows how to describe... or where it even comes from. Without it no story can resonate and endure the test of time. It has less to do with a secret structural formula and more to do with alchemy... and luck. But if there IS an answer, or even a hint at a glimpse of a notion of an answer, it probably lies somewhere in the field of Mythological Studies... I'm really proud of the work I did [in these essays] and even though they are academic papers, they feel like they still have my voice. While I was preparing them for publication I noticed that right out of the gate I was gravitating toward the Jungian Shadow and the Trickster. I was also being a bit of a trickster myself, writing academic papers about The Matrix and Gene Simmons and doing a full-on Jungian analysis of Scooby-Doo, Where Are You? My professor for that one, Dr. Glen Slater, wrote a note on the back: "I started reading this skeptically but ended somewhat of a convert... the Shaggy/Scooby 'fourth' thesis grew in strength as you went along." I was delighted. Not only did I convert him, I made him say "Shaggy/Scooby" academically and non-ironically! Score one for the trickster! All of the papers in this anthology were written for classes at Pacifica Graduate Institute between the fall of 2004 and the summer of 2007. I'm presenting them in order so that, hopefully, there's some kind of evolution detectable. At the end of the book you can see what paper was written for what class.

A clever illustrated ode to the breakout star of Scooby-Doo, exploring the life lessons this iconic nerd girl teaches us and why we should all aim to be the Velma of our friend group. From the moment Scooby-Doo, Where Are You! premiered in 1969 and through the many Scooby movies and shows since, it has cemented its place as one of the greatest cartoons of all time. But there is one character in particular who has risen to icon status: a smarty-pants who can't see without her glasses named Velma Dinkley. As the nerdiest member of the Mystery, Inc. gang, Velma might have been a wallflower or an underdog. Instead, she's become a fan favorite, a fashion legend, a standout role for Linda Cardellini in the live-action movies, the inspiration for countless Halloween costumes, and soon the star of her own animated series from Mindy Kaling. But why, exactly, do we love this brainiac so much? What Would Velma Do? explores the answers to that question, as well as the many inspiring takeaways we can learn from her, the history of the character, and enough fun facts and trivia to make you say Jinkies!

Story poems are poems that tell a story in rhythm and rhyme. It is a straightforward, folk-friendly kind of writing without vague allusions to some other writings or with fanciful language that leaves a person wondering what the whole thing was all about. This book contains four different sections: (1) the deeper and more serious poems, (2) just for the fun of it poems, (3) cowboy poetry, and (4) word painting. A student once wrote about the

trip from Oklahoma to California on Route 66, telling about, among other things, dirty diapers strewn along the road. The instructor advised her that it would be more poetic to describe it as bits of white cotton dotting the landscape. What? Did they not pick all the cotton in the field? No wonder people don't like poetry. I like a clever use of words, but I am not fond of obtuse and rambling descriptions of people or landscapes. I tell a story with what I fondly believe has a humorous twist or has interesting action. I write the kind of stuff that I enjoy reading and that I hope others will enjoy also.

Original book of photographs and text by the noted director/writer/producer Brian Levant, presenting his extraordinary collection of animated feature and comic toys, including hundreds of iconic characters represented in figures, banks, games, lunchboxes, puppets, comics, windups, vehicles and items at the bottom of cereal boxes. This comprehensive and one-of-a-kind collection and book/work, itself, is presented in varied chapters. There are chapters here that include the

author's Flintstones collection; others created while he produced features with Steven Spielberg; or those acquired while producing classic TV shows, like Mork & Mindy. And this is just a small sampling of what is in this exhaustive book, where the sum total has been acquired over the past 50 years. This is a book distinctive in its content; in both words and the hundreds of original photographs created exclusively for it. The author's acclaim and success as a producer of popular culture film and television features allows presentation here of a distinctly individual and personal yet universally interesting book for collectors and the general public alike, which has no comparison and could not be replicated even in a minor form, by anyone else other than this author.
