"If you care about America's future, read this book."—Mark Levin "A must-read book that shows how the Green New Deal is dangerous, impractical, misguided, and guaranteed to fail with disastrous results for the American people."—Sean Hannity A New Lockdown to "Save" the Climate That's what's in store for us if Alexandria Ocasio-Cortez and the Democrats pass their radical climate plan—the Green New Deal. It is packed with guarantees so completely irrelevant to the problem it purports to "solve" (like "free college" and incomes for everyone "unable or unwilling to work") that even its boosters have admitted it's not really about the climate. The intrepid Marc Morano, author of the bestselling Politically Incorrect Guide to Climate Change, breaks down the science and the politics to expose the truth about the Green New Deal: • The science is settled: copious evidence—and prominent defections from the "climate consensus"—make clear we are not facing a man-made climate disaster • "Climate change" is the perfect Trojan horse for the socialist agenda of the Left • Fossil fuels lifted the West out of poverty—but our elites now want to deny them to the world's poor • The Green New Deal is on a collision course with self-government and our fundamental rights Climate change has already been "solved" multiple times over the past two decades—with highly touted international agreements—and yet it never goes away as an excuse for leftist policies that will cripple our economy, impoverish the world, and take away our freedoms. Packed with telling statistics, damning quotations, and real science, Green Fraud is your source for all the facts you need to understand—and resist—the threat.

Welding For Dummies Chicago Review Press

"I wrote this book because I love building robots. I want you to love building robots, too. It took me a while to learn about many of the tools and parts in amateur robotics. Perhaps by writing about my experiences, I can give you a head start." —David Cook Robot Building for Beginners, Second Edition is an update of David Cook's best-selling Robot Building for Beginners. This book continues its aim at

teenagers and adults who have an avid interest in science and dream of building household explorers. No formal engineering education is assumed. The robot described and built in this book is battery powered and about the size of a lunchbox. It is autonomous. That is, it isn't remote controlled. You'll begin with some tools of the trade, and then work your way through prototyping, robot bodybuilding, and eventually soldering your own circuit boards. By the book's end, you will have a solid amateur base of understanding so that you can begin creating your own robots to vacuum your house or maybe even rule the world!

In for a Penny Independently Published

A New York Times bestseller—a brilliantly funny exploration of the Sunshine State from the man who knows it best: Pulitzer Prize winner Dave Barry. We never know what will happen next in Florida. We know only that, any minute now, something will. Every few months, Dave Barry gets a call from some media person wanting to know, "What the hell is wrong with Florida?" Somehow, the state's acquired an image as a subtropical festival of stupid, and as a loyal Floridian, Dave begs to differ. Join him as he goes in hunt of the legendary Skunk Ape; hobnobs with the mermaids of Weeki Wachee Springs; and visits Cassadaga, the psychic capital of the world, to have his dog's aura read (apparently, she's "very spiritual"). Hitch a ride for the non-stop thrills of alligator-wrestling ("the gators display the same fighting spirit as a Barcalounger"), the hair-raising spectacle of a clothing-optional bar in Key West, and the manly manliness of the Machine Gun Experience in Miami. It's the most hilarious book yet from "the funniest damn writer in the whole country" (Carl Hiaasen, and he should know). By the end, you'll have to admit that whatever else you might think about Florida—you can never say it's boring.

Mr Grunt's a man with a mission. He has to get a Person of Great Importance (or POGI) to someone called Mrs Bayliss by the twenty-fifth. Alive and well. And he can't tell anyone more than that, not even his lovely wife, Mrs Grunt, because there will be people trying to snatch the POGI and so the POGI must be transported in secret. It's an exciting adventure, but what interests Mr Grunt most are the silver coins he's been promised at the end of it. The Grunts' stolen son, Sunny, has a few questions. Who is the big-eared cyclist? Why does the POGI have to wear a barrel all the time? Is Rodders Lasenby a lovely person or simply the rudest man on the planet? And how long will it be before they find themselves All At Sea?
