Anyone who has ever cursed a computer will benefit from Zen Computer, with its soothing approach to living calmly amid the constant upheavals of new technology. In a simple, easy-to-read style, Philip Toshio Sudo shows how the ancient principles of Zen philosophy apply to the modern science of bits and bytes, helping computer novices and the techno-savvy alike deal with everything from computer crashes to major life changes. Divided into short, concise chapters, the book includes a user's guide to mindful computing, and features "The Seven Rules of Zen Computer." Quotes from thinkers such as Blaise Pascal, Albert Einstein, and Bill Gates illustrate the links between Western science and Eastern philosophy, making Zen Computer accessible to all readers, regardless of their familiarity with Zen. Filled with Zen stories, samurai maxims, and beautiful artwork that combines Japanese brush painting with digital imagery, Zen Computer shows us how the interface between the traditional and technological can be found right here, right now.

Subjects covered include the analysis of influences on equine behaviour, the perceptual world of the horse, learning and training techniques including the latest developments in "join-up" and "imprint training".

The Death of Punishment "O'Reilly Media, Inc."

"Here in the dust and the sunshine is an epitome of the living East, and standing unnoticed in a doorway, you will admit that you have not travelled in vain. But as the procession of people files past you, you will realize what a gulf lies between you. The East looks to itself; it knows nothing of the greater world of which you are a citizen, asks nothing of you and your civilization." This brilliant, vivid and impressionistic series of sketches, formed during her 1892 stay in Persia, is Gertrude Bell's first published work. Infused with a distinctive orientalism, "Persian Pictures" is an evocative, virtuosic meditation, moving sinuously between Persia's heroic complex, mythical past and present decline; the public face of Tehran and the otherworldly "secret, mysterious life of the East;" the lives of its women; its enclosed, quasi-medieval gardens; from the bustling cities to the lonely wastelands

of Khorasan. Bell's documentation of Muharram - the month of mourning for Imam Hussein, the grandson of the Prophet Mohammed - and Ramadan, display a mind finely attuned to the differences and similarities between Islam and Christianity, East and West. "Persian Pictures" is both travelog and meditation, an elegaic and beautifully observed account of a spellbinding land. Scholar, historian, linguist, archaeologist, photographer, secret service agent and traveller, Gertrude Bell (1868-1926) was a hugely significant figure. Her early travels were made in Europe and Persia; she made two round-the-world trips (1897-8 and 1902-3), while her climbing exploits in the Alps from 1899-1904 earned her renown as a mountaineer. Like other British 'orientalists' of the early 20th century, she explored the Ottoman Empire during and after World War I and was hugely instrumental in the post-war reconfiguration of the Arab states in the Middle East. She was a prime mover in creating the new state of Iraq and establishing a constitutional monarchy there with a parliament, civil service and legal system; as Honorary Director of Antiquities in Iraq, she established the Iraq Museum in Baghdad.

Anyone interested in discovering their family genealogy should carry a copy of this book everywhere. Written by internationally recognized expert, George G. Morgan, this book is an irreplaceable resource for beginner to expert knowledge gatherers. Not only does Morgan explain how to get the search started - creating a family tree, locating and evaluating documents, selecting the appropriate hardware and software for the search - he goes steps further and dedicates an entire section to research methods and strategies where he discusses, among other topics, getting past "dead ends," and organizing possible research travel.

NeuroMuscular Taping: Treatment of Edemas, Hematomas, and Scars St. Martin's Press

A guide to the diagnosis and treatment of cosmetic and dermatological problems with practical instruction on how to perform treatment techniques. Thambirajah explains the energetic imbalances which cause skin diseases and the problems of early ageing, and describes how they can be treated successfully. Skin problems occur because the Blood, Qi, yin and yang of the body are not in balance and the book discusses how these can be balanced by acupuncture therapy. The therapy for a cosmetic problem has three steps: 1) to balance the body energies that cause the problem, 2) to treat the problem locally, 3) changing the diet and lifestyle of the patients with these problems. Concepts are accompanied with useful illustrations throughout, demonstrating the methods described. This second edition also contains new material on needling and massage techniques. This is a comprehensive and authoritative textbook on the topic for practising acupuncturists and

Chinese Medicine practitioners.

Jesus and Darwin do battle on car bumpers across America. Medallions of fish symbolizing Jesus are answered by ones of amphibians stamped "Darwin," and stickers proclaiming "Jesus Loves You" are countered by "Darwin Loves You." The bumper sticker debate might be trivial and the pronouncement that "Darwin Loves You" may seem merely ironic, but George Levine insists that the message contains an unintended truth. In fact, he argues, we can read it straight. Darwin, Levine shows, saw a world from which his theory had banished transcendence as still lovable and enchanted, and we can see it like that too--if we look at his writings and life in a new way. Although Darwin could find sublimity even in ants or worms, the word "Darwinian" has largely been taken to signify a disenchanting world driven by chance and heartless competition. Countering the pervasive view that the facts of Darwin's world must lead to a disenchanting vision of it, Levine shows that Darwin's ideas and the language of his books offer an alternative form of enchantment, a world rich with meaning and value, and more wonderful and beautiful than ever before. Without minimizing or sentimentalizing the harsh qualities of life governed by natural selection, and without deifying Darwin, Levine makes a moving case for an enchanted secularism--a commitment to the value of the natural world and the human striving to understand it.

Treatment of the Neurologically Impaired Adult With the present book, acclaimed international Bobath instructor and therapist Bente Gjelsvik offers an evidence-based practice-oriented road map to the assessment and treatment of patients with lesions of the central nervous system. Consisting of 238 pages of accessible text supported by 240 illustrations (mostly photographs of patients in therapy), this work is the ideal clinical guide for physical and occupational therapists, for students

and practitioners working with neurologically impaired adults, and for Bobath instructors as well as trainers in physiotherapy in general. Gjelsvik successfully bridges the gap between evidencebased clinical practice and theoretical assumptions, developing a clear understanding of the neuromusculoskeletal system, of motor control, of neural and muscle plasticity, and ultimately of the structure and function of the organism as a whole. The fine balance between theoretical information, clinical relevance, and practical examples make this an essential book for learning all about the interaction between the central nervous system, the musculoskeletal system, movement, and function. Bente Gjelsvik thus improves any Bobath therapist's competency in achieving the best possible assessment of the individual with neurological conditions, for best possible results of the treatment.

This high-quality atlas illustrates a didactic, technical approach in finding the different anatomical structures (bones, ligaments, tendons, muscles and nerves) in the lower extremities. The photos are unique in their presentation of the structures. Palpation is used as a diagnostic tool in clinical examination, and these photos are an important tool for the student and clinician. Line drawings indicating appropriate anatomy introduce each section, and serve as another learning tool. The atlas can be used as a textbook in gross anatomy courses and as a reference for beginning practitioners. It will be of interest to students and practitioners in physical therapy, occupational therapy, podiatry, as well as osteopaths and medical, nursing and physician assistants.

What is the material of the artifact? What are the characteristics of the substrates? Is it possible to adequately isolate the tooth? It is fundamental to answer these questions when performing the assessment before beginning the final and decisive phase of prosthetic restoration: cementation. Cementation is a complex procedure that requires good skills, and its outcome depends on the knowledge of the substrates involved and the choice of the most suitable cement for the specific situation. The materials and techniques used for cementation are described in this text, which is specifically dedicated to prosthetists and to those who practice conservative dentistry. This manual examines each substrate and defines the cementation protocols for all cases in daily practice.

In questo libro faremo un affascinante viaggio che permetterà di conoscere meglio te stesso e gli altri, attraverso la correlazione della scienza grafologica e delle proprietà psicologiche e terapeutiche dei colori. Il libro è suddiviso in tre parti: nella prima avrai modo di avvicinarti alla grafologia e capire molti aspetti della tua personalità; nella seconda potrai conoscere l'affascinante mondo del linguaggio dei colori e la loro raffinata influenza sulla psiche e sul corpo; nella terza ed ultima parte grafologia e colori sono messi in relazione, mostrandone lo stretto legame. Attraverso il test grafologico potrai rilevare quali sono i tuoi bisogni in un determinato momento, e come la conoscenza dell'influsso dei colori possa influire sul sentirti meglio e, di conseguenza, sollecitarti a scegliere il colore più congeniale per quel determinato frangente. Correlando questi due specifici linguaggi potrai capire meglio come stai e quali sono le tue esigenze e stati d'animo attraverso la grafologia e ricorrere ai colori per consolidare, migliorare o ripristinare l'equilibrio.
