Rights to develop Wild Cards for TV have been acquired by Universal Cable

Productions, the team that brought you The Magicians and Mr. Robot, with the co-editor of Wild Cards, Melinda Snodgrass as executive producer. Let the secret history of the world be told of the alien virus that struck Earth after World War II, and of the handful of the survivors who found they now possessed superhuman powers. Some were called Aces, endowed with powerful mental and physical

prowess. The others were Jokers, tormented by bizarre mind or body disfigurements. Some served humanity. Others caused terror. And now, forty years later, as a gang war between the Shadow Fists and the mafia rages out of control in the streets of Jokertown, Aces and Jokers go underground to wage their own war against the powers of the netherworld. Here, in the fifth volume of

the exciting series, ten of science fiction's most gifted writers take readers on a journey of wonder and excitement in an astounding alternate history. Featuring the talents of John J. Miller, Roger Zelazny, Leanne C. Harper, Arthur Byron Cover, Melina C. Snodgrass, Edward Bryant, Stephen Leigh, Pat Cadigan, Walter Jon Williams, and George R. R. Martin.  It's a vanished world, and Peter Hujar was right there in it. The Lower East Side between 1972 and 1985 - filled with artists, wannabe artists and hangers-on - was a community of the

<p>misbegotten gathered from every town in America and relocated in the mean streets between Broadway and the Bowery. Nothing but their talent, their flamboyance, their rank gender- bending mockery and their arch irony supported them. Some made their names. Many came to grief. A few made art. In those days, the gutted streets of the Lower East Side looked like a</p>	<p>war zone. Everyone lived and worked on the extreme outer margins of money and art, penniless and unknown. As a community, Downtown was a counterstatem ent to the rich New York of the banks, museums, media, corporations ... and the art world itself. That Downtown is forever gone. Time, gentrification, disease and death have taken their toll and turned this vibrant epoch into a</p>	<p>chapter of art history. But before it vanished, its extravagant cast sat for Peter Hujar's camera - and is now alive again in front of our eyes. Featured among others: Joe Brainard, William Burroughs, Remy Charlip, Edwin Denby, Divine, Ray Johnson, Fran Lebowitz, Charles Ludlum, Susan Sontag, Paul Thek, John Waters, Robert Wilson, David Wojnarowicz. <u>Marilyn</u> <u>Manson by</u> <u>Perou Reel Art</u></p>

This volume discusses the so-called Oneirocriticon of Achmet, the most important Byzantine work on dream interpretation which was written in Greek in the 10th century and has greatly influenced subsequent dreambooks in Byzantine Greek, Medieval Latin, and modern European languages. By comparing the Oneirocriticon with the 2nd-century A.D. dreambook of

Artemidoros (translated into Arabic in the 9th century) and five medieval Arabic dreambooks, this study demonstrates that the Oneirocriticon is a Christian Greek adaption of Islamic Arabic material and that the similarities between it and Artemidoros are due to the influence of Artemidoros on the Arabic sources of the Byzantine work. The Oneirocriticon's textual tradition, its

language, the identities of its author and patron, and its position among other Byzantine translations from Arabic are also investigated. *Civil Affairs Handbook* Columbia : University of Missouri Press This fascinating study reconstructs the tradition of the Legend of the True Cross in text and image, from its tentative beginnings in 4th-century Jerusalem to the

culminating expression of its multi-layered cosmic content in 14th and 15th-century monumental cycles in Germany and Italy.

This collection of essays examines medieval and early modern perceptions of the marvelous and the monstrous. The essays investigate the nature of those phenomena and how people of these periods

experienced them and how they recreated that experience for others. The essays trace the development of representations of marvels and explicate individual incarnations of monster and miracles. They analyze the importance of marvelous difference in defining ethnic, racial, religious, class, and gender identities to ask what legacy the medieval confrontations

with marvels left for the modern world. These excellent essays look at issues that have long perplexed readers, such as the meaning of marvels, and whether we can read them in earnest or whether they can be appreciated only as play. The different authors bring their expertise to the fore to discuss the development of thoughts on marvels from the classical tradition through the concept's

development in the medieval and early modern tradition. This collection is essential reading for any analysis of the marvelous in these periods and the state of scholarship surrounding them.

A Byzantine Book on Dream Interpretation

'I often get asked, 'Who was your favorite person to photograph?' or 'Who is the best person you've photographed?' says photographer

Perou. 'It's always 'Marilyn Manson.' Which is just as well, considering how many times I've photographed him.' Perou has been photographing Marilyn Manson since a 1998 magazine cover shoot. Twenty-one years of collaborating have resulted in this unique book, featuring over 350 photographs including previously unpublished work, conceptual

portraits, onstage and informal behind-the-scenes images, giving a rare insight into Manson's world.

Principles of Meteoritics examines the significance of meteorites in relation to cosmogony and to the origin of the planetary system. The book discusses the science of meteoritics and the sources of meteorites. Scientists

study the morphology of meteorites to determine their motion in the atmosphere. The scope of such study includes all forms of meteorites, the circumstances of their fall to earth, their motion in the atmosphere, and their orbits in space. Meteoric bodies vary in sizes; in calculating their motion in interplanetary space, astronomers apply the laws of Kepler. In the region of

retardation, the direction of motion of the meteoric body changes, and a break in the visible and real trajectories follows. The angle of fall of meteorites at a vertical line on the surface of the Earth measures between 20 degrees to 30 degrees. The text also discusses the Tunguska and Sikhote-alin meteorites, two gigantic meteorites that fell in the U.S.S.R. The text also discusses the chemistry, the mineralogy,
