**Journalism and Media
Convergence** Longhorn
Kenya
This volume proposes a

wholesale adoption of
African Indigenous
Knowledge Systems
(AIKS) as a paradigm for
Africa's renewal and
freedom from the whims
of foreign interests. These
systems, as argued here,

involve balancing short-
term thinking and
immediate gratification
with longer-term planning
for future generations of
Africans and the
continent's diaspora. The
book will be of interest to

anyone concerned with development studies in Africa and its diaspora, as it offers plausible solutions to Africa's chronic developmental problems that can only be provided from within Africa, rather than through the intervention of external third parties. As such, it provides vital contributions to the ongoing search for viable answers to the challenges that Africa faces today.

The History and Evolution of Human Resource Development (HRD) in Kenya as it Relates to

Technical and Vocational Education and Training (TVET) Bloomsbury Publishing
Offers advice to parents on providing children with a financial headstart without giving them money, encouraging parents to focus less on their children's letter grades and more on helping them cultivate their passions.

Digital classrooms have become a common addition to curriculums in higher education; however, such learning systems are only successful if students are

properly motivated to learn. *Optimizing Student Engagement in Online Learning Environments* is a critical scholarly resource that examines the importance of motivation in digital classrooms and outlines methods to reengage learners. Featuring coverage on a broad range of topics such as motivational strategies, learning assessment, and student involvement, this book is geared toward academicians, researchers, and students seeking current research

on the importance of maintaining ambition among learners in digital classrooms.

Fundamentals of Investment World Bank Publications

The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of

secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on 'Technical and

Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany
Motor Vehicle Technology for Mechanics Walter de Gruyter
 The Grammar and Language Workbook

offers sequential language instruction along with extensive drill and practice in grammar, usage, and mechanics. This important tool includes a handbook as well as vocabulary, spelling, and composition lessons.
Research Anthology on Vocational Education and Preparing Future Workers McGraw-Hill/Glencoe
 Journalism is under ever-increasing pressure, due in large part to the phenomenon of media convergence. Not only does media convergence

redefine the tasks of journalists and newsrooms, it also re-shapes the business environments of media companies. In this book, international media practitioners and researchers describe and analyze the relationships between media convergence and advertising, public relations, social media and other areas of communication posing a challenge to journalism.
Implementing Deeper Learning and 21st Century Education

Reforms Motivate S. Betrayal in the City, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: "It was

better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."-- Page 4 of cover
Blossoms of the Savannah CODESRIA
The graduates from Technology education institutions (Technical Training Institutes and national Polytechnics) have contributed a lot to the industrial growth and the 'Jua kali' sectors. The diploma and certificates which are awarded by Kenya National Examinations Council

(KNEC) have increased the number of graduates who have acquired skills and knowledge that is in high demand in the world of work, both in informal and formal sectors. But many of these young men and women who have desired to join others in developing this nation have been stopped on the way or discouraged or delayed in acquiring their diploma in Mechanical Engineering based areas. Many candidates don't pass Mechanical Technology subject. Therefore this study set to

investigate the poor performance of candidates in mechanical technology subject in Technical training institutions.

The role of higher education in establishing structures and procedures in society and industry is clearly articulated in scholarly discussions. The narrative has recently taken a new momentum in Kenya with acknowledgement of the

creative industry involves many youth, as an area that impacts on the economy. In unravelling the link between higher education and industry, the authors focus on leadership and governance in higher education and its expected and perceived contribution to the shaping of the creative industry. Through analysis of cases, the authors interrogate the processes and structures that govern the teaching and practice of the creative subjects, noting how

these affect the creative industry in Kenya. This book approaches the creative disciplines from the perspectives of the students, lecturers and university administrators. The three voices provide a balanced view of what higher creative arts education in Kenya is. The multiple authorship of the book further provides a balanced account of the development of these disciplines in higher education, and their growth in industry. The key concepts here are the development of the

creative industry and how higher education should contribute to the same. Inheritance Routledge Blossoms of the Savannah is the story of two sisters, Taiyo and Resian, who are on the verge of womanhood and torn between their personal ambitions and the humiliating duty to the Nasila tradition. Relocation to their rural home heralds a cultural alienation born of their refusal to succumb to female genital mutilation and early marriages. In pursuit of the delicate and

elusive socio-economic cultural balance in Nasila, Ole. Kaelo, the girls' father is ensnared by a corrupt extortionist. To extricate himself he sends his daughters into a flat-spin labyrinth from which they have to struggle to escape. Abolishing School Fees in Africa IGI Global V.1: Physical and chemical properties of food products and handling materials. Mechanical harvesting of fruits and vegetables . Thermal processing.  Progress in literacy and learning, especially through universal primary education, has done more to advance human conditions than perhaps any other policy. Our generation has the possibility of becoming the first generation ever to offer all children access to good quality basic education. But it will only happen if we have the political commitment -- at the country as well as at

the international level -- to give priority to achieve this first in human history. And it will only happen if also those who cannot afford to pay school fees can benefit from a complete cycle of good quality primary education. Investment in good quality fee-free primary education should be a cornerstone in any government's poverty reduction strategy. *IFRS 1 First-time Adoption of International Financial Reporting Standards* Springer Science & Business Media

Here is one of the first books to address the problems of serials as they relate to the user, the reference librarian, and the library itself.

Opening a crucial dialogue, serials librarians and reference librarians explore ways in which they can work together to make serials more accessible to the user.

With this vital new book, public services librarians will gain a better understanding of the unique nature of serials, especially concerning their acquisition and

cataloguing, and technical services librarians will gain a clearer view of the problems involved in interpreting the record for the user. *Serials and Reference Services* provides a wealth of information that will help the cataloguer who must create a record out of a dizzying change of titles, volumes, and frequency; the reference librarian who must interpret the record for the user; the bibliographer who must select titles; the manager who will be viewing the new formats for serials;

and the administrator who needs an overview in order to pull disparate services together into a functioning whole.

Automation is also explored and finally, a look at the core collection--newspapers, comic books, and poetry magazines--gives an eclectic ending to the volume. Tillie Krieger, Peter Hernon, David C. Heisser, David C. Taylor, and Laura Peritore are among the well-known contributors to the book. *Grammar and Language Workbook* Springer Nature

For many scholars, the study of community and community development is at a crossroads. Previously dynamic theories appear not to have kept pace with the major social changes of our day. Given our constantly shifting social reality we need new ideas and research that pushes the boundaries of our extant community theories. Theory, Practice, and Community Development stretches the traditional boundaries and applications of well-established community

development theory, and establishes new theoretical approaches rooted in new disciplines and new perspectives on community development. Expanded from a special issue of the journal Community Development, Theory, Practice, and Community Development collects previously published and widely cited essays, as well as new theoretical and empirical research in community development. Compiled by the editors of Community Development, the essays feature topics

as varied as placemaking, democratic theory and rural organizing. Theory, Practice, and Community Development is vital for scholars and practitioners coming to grips with the rapidly changing definition of community. **IFRS 6** iSmithers Rapra Publishing Workshop Processes, Practices and Materials is an ideal introduction to workshop processes, practices and materials for entry-level engineers and workshop technicians. With detailed illustrations throughout and simple,

clear language, this is a practical introduction to what can be a very complex subject. It has been significantly updated and revised to include new material on adhesives, protective coatings, plastics and current Health and Safety legislation. It covers all the standard topics, including safe practices, measuring equipment, hand and machine tools, materials and joining methods, making it an indispensable handbook for use both in class and the workshop. Its broad

coverage makes it a useful reference book for many different courses worldwide.

Vocationalisation of Secondary Education Revisited Legare Street Press

The very best of the world's best researchers have discovered a way to develop Africa: Way Omega. Now Africa's heads of state are at a summit to approve it. If they do, it promises Africa will start developing immediately. Unknown to the summit are aggrieved conspirators plotting to

defeat Way Omega and replace it with a rival strategy: Path Alpha. Their path, they say, is the only way. Should the summit still follow Way Omega, or make a U-turn? Fathers of Nations is a satire on contemporary African politics. Introduction to Shipping Springer Science & Business Media
Technical and vocational education and training (TVET) research has become a recognized and well-defined area of interdisciplinary research. This is the first handbook

of its kind that specifically concentrates on research and research methods in TVET. The book's sections focus on particular aspects of the field, starting with a presentation of the genesis of TVET research. They further feature research in relation to policy, planning and practice. Various areas of TVET research are covered, including on the vocational disciplines and on TVET systems. Case studies illustrate different approaches to TVET research, and the final

section of the book presents research methods, including interview and observation methods, as well as of experimentation and development. This handbook provides a comprehensive coverage of TVET research in an international context, and, with special focus on research and research methods, it is a cutting-edge resource and reference.
