Industrial production in high-wage countries like Germany is still at risk. Yet, there are many counter-examples in which producing companies dominate their competitors by not only compensating for their specific disadvantages in terms of factor costs (e.g. wages, energy, duties and taxes) but rather by minimising waste using synchronising integrativity as well as by obtaining superior adaptivity on alternating conditions. In order to respond to the issue of economic sustainability of industrial production in high-wage countries, the leading production engineering and material research scientists of RWTH Aachen University together with renowned companies have established the Cluster of Excellence "Integrative Production Technology for High-Wage Countries". This compendium comprises the cluster's scientific results as well as a selection of business and technology cases, in which these results have been successfully implemented into industrial practice in close cooperation with more than 30 companies of the industrial production sector.

The 'Black Queen' is what Billy calls his shadowy next-door neighbour. She always wears a black cloak and a wide-brimmed black hat. She lurks about her garden, alone except for her black cat. Scarily for Billy, the Black Queen befriends him and asks him to look after her cat while she's away. Billy can't resist the opportunity to peek inside her house. There are chessboards scattered everywhere. Who is the Black Queen and what sort of game is she playing? Billy thinks he knows...

The ultrasound examination of the bovine musculoskeletal system is established as a routine examination in veterinary clinics worldwide. Practical veterinarians use their existing ultrasound equipment not only for gynaecological but increasingly also for orthopaedic examinations of calves and adult cattle. This book provides specific instructions for the ultrasonographic examination of individual joints and describes particular anatomical landmarks of each region as a guide. In over 300 illustrations, international specialists present normal sonoanatomical findings and sonopathological findings of common diseases. A must have for modern cattle practitioners who want to broaden their diagnostic horizon! Ultraschall neu interpretiert Die Ultraschalluntersuchung am Bewegungsapparat des Rindes ist an veterinärmedizinischen Kliniken weltweit als Routine-Untersuchung etabliert. Insbesondere in der Milchviehhaltung führen Lahmheiten bei Kühen schnell zu finanziellen Verlusten. Praktisch tätige Tierärzte können ihre vorhandenen Ultraschallgeräte problemlos nicht nur für gynäkologische, sondern auch für orthopädische Untersuchungen adulter Rinder und Kälber nutzen. Dieses Praxisbuch gibt konkrete Anleitungen für die korrekte sonografische Untersuchung einzelner Gelenke. Als Orientierungshilfe für die Erstuntersuchung dient eine Beschreibung der jeweiligen anatomischen Leitstrukturen jeder Region. International tätige Spezialisten stellen in über 300 Abbildungen sonoanatomische Normalbefunde und sonopathologische Befunde häufiger Erkrankungen gegenüber. Ein Muss für moderne Rinderpraktiker, die ihren diagnostischen Horizont erweitern möchten!

Doing Good Better Routledge

Most of us want to make a difference. We donate our time and money to charities and causes we deem worthy, choose careers we consider meaningful, and patronize businesses and buy products we believe make the world a better place. Unfortunately, we often base these decisions on assumptions and emotions rather than facts. As a result, even our best intentions often lead to ineffective—and sometimes downright harmful—outcomes. How can we do better? While a researcher at Oxford, trying to figure out which career would allow him to have the greatest impact, William MacAskill confronted this problem head on. He discovered that much of the potential for change was being squandered by lack of information, bad data, and our own prejudice. As an antidote, he and his colleagues developed effective altruism, a practical, data-driven approach that allows each of us to make a tremendous difference regardless of our resources. Effective altruists believe that it's not enough to simply do good; we must do good better. At the core of this philosophy are five key questions that help guide our altruistic decisions: How many people benefit, and by how much? Is this the most effective thing I can do? Is this area neglected? What would have happened otherwise? What are the chances of

success, and how good would success be? By applying these questions to real-life scenarios, MacAskill shows how many of our assumptions about doing good are misguided. For instance, he argues one can potentially save more lives by becoming a plastic surgeon rather than a heart surgeon; measuring overhead costs is an inaccurate gauge of a charity's effectiveness; and, it generally doesn't make sense for individuals to donate to disaster relief. MacAskill urges us to think differently, set aside biases, and use evidence and careful reasoning rather than act on impulse. When we do this—when we apply the head and the heart to each of our altruistic endeavors—we find that each of us has the power to do an astonishing amount of good.

The Test of Courage Education at a Glance

Twenty-four years after his death, the Kunstsammlung Nordrhein-Westfalen is paying homage to the artist, educator and political activist Joseph Beuys (1921-1986) in Düsseldorf, the city with which he is primarily associated. Often the object of intense debate and much hostility during his lifetime, today Beuys ranks among the 20th century's most important and most innovative figures of the artistic avant-garde and is often mentioned in the same breath as Marcel Duchamp and Andy Warhol. This companion book shares the exhibition's goal of displaying "the complete Beuys" by presenting selected works from all phases and artistic media of his multifaceted oeuvre.

Global Think Tanks Prentice Hall

The capability to innovate in an on-going manner is emerging as a decisive key factor in today's world of business and work. The ability to stay competitive is becoming identical with the ability to innovate. This book originated from the research and development project "International Monitoring" and outlines the topic of innovative capability from a practice-oriented angle. Contributions of German and international experts offer an enlightening glimpse behind the scenes of innovations. The central issue is not the description of features of successful innovation processes or how innovations can be efficiently controlled and managed, but under which conditions they can emerge in the first place. In what way can individuals, organizations, networks and societies be enabled to continuously induce innovations?

Special interest tourism is one of the fastest growing segments within the tourism industry. A more mature travelling public is increasingly seeking experiences which satisfy a whole spectrum of interests. Accordingly, there is a need for new tourism products, services and experiences that cater to these markets. Special interest tourism incorporates various sectors such as regional, urban, community, environmental, cruise, heritage, cultural, sex and educational tourism, all of which are discussed in this new text. Special interest tourism products operate within a broad industry framework affecting the social, political, environmental and economic context of the tourism region and tourist market. The authors discuss special interest tourism strategies, policies and initiatives introduced in Australia and internationally. The text combines theory and industry applications to illustrate the diversity of tourism product and development as it relates to special interest tourism.
