A collection of

notes on the
method of
purchase,
manufacture,
and inspection
of shoes and
shoe lasts in
the US army
during World
War I. This
book was

originally
commissioned
under the
auspices of
the
quartermaster
General of the
United States
Army for the
benefit of
officers and

the quartermaster corps. This fascinating volume will appeal to those with an interest in historical shoe and boot production, and particularly its importance from a military standpoint. Contents include: "Historical Sketch", "Scope of Subject", "Knowledge of Needs of the Army", "Tariff of Sizes", "Knowledge of Material", "Cost of Materials", "Opportune Time for

Purchasing", "Cost of Manufacture", "Overhead", "Advantages to Purchasing Officer of Above Knowledge", "Purchase of Lasts", "Knowledge of Factory Conditions", etc. Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this volume now in an affordable, modern, high-quality addition complete with a specially commissioned

new introduction on the history of shoemaking. *War Department Appropriation Bill, 1925. Military Activities* Walter de Gruyter How did ancient Greek men and women deal with the uncertainty and risk of everyday life? What did they fear most, and how did they manage their anxieties? Esther Eidinow sets side-by-side two collections of material usually

studied in isolation: binding curse tablets from across the ancient world, and the collection of published private questions from the oracle at Dodona in north-west Greece. Eidinow uses these texts to explore perceptions of risk and uncertainty in ancient society, challenging previous explanations. In these records we hear voices that are rarely, if ever,

heard in literary texts and history books. The questions and curses in these tablets comprise fervent, sometimes ferocious appeals to the gods. The stories they tell offer tantalizing glimpses of everyday life, carrying the reader through the teeming ancient city - both its physical setting and its social dynamics. Among these tablets we find prostitutes and publicans,

doctors and soldiers, netmakers and silver-workers, actors and seamstresses. Anxious litigants ask the gods to silence their opponents. Men inquire about the paternity of their children. Women beg the gods to help them keep their men. Business rivals try to corner the market. Slaves plead to escape their masters. This material takes us beyond the headlines of ancient

history, offering new insights into institutions, activities, and relationships. Above all, individually and together, these texts help us to understand some of the ways in which ancient Greek men and women understood the world. In turn, the beliefs and activities of an ancient culture may shed light on modern attitudes to risk.

Wittgenstein's Philosophical Investigations is arguably one of the most influential books of the 20th century. It threw a new light on the workings of language and mind, contributing significantly to the understanding of human knowledge. Featuring essays by internationally renowned scholars, this book explores the development of Wittgenstein's ideas in the

direction of the Investigations. It offers a comprehensive view of some of the most disputable issues in the study of Wittgenstein's masterpiece and reassesses its relevance within contemporary philosophical debate. *Congressional Record*
Routledge
Presented as a series of questions and answers, "Farriery" provides solutions to a variety of common

queries concerning the anatomy of the foot and leg, as well as shoemaking in general. Although old, the information contained within this volume is timeless and will be of considerable utility horse-owners and apprentice farriers. Contents include: "What Difference Would you find in the Bones of a Hind Limb, are they named Differently?", "Are all Bones Tubular?", "Why are

Horses Shod?", "How Often should a Horse be Shod?", "Describe Fully the Os Pedis", "What is the Periosteum and What are its Functions?", "Where do you find the Interossious Ligament", etc. Many vintage books such as this are becoming increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-

quality edition complete with a specially commissioned new introduction. Plato OUP Oxford Publishes in-depth articles on labor subjects, current labor statistics, information about current labor contracts, and book reviews. *Knowledge, Institutions and Evolution in Economics* Routledge First published in 2004. This five volume set collects together a series of writings on the role of

women in the late-Victorian Era. This final volume of the set, brings together the voices of female New Woman writers and late Victorian literary criticism. The contemporary debate on New Woman fiction formed part of a wider discourse on decadence, degeneration and the crises of gender and sexuality in culture, literature and political life. *Knowledge, Language and Mind* This volume explores how

the limitations of human knowledge creates opportunities as well as problems in the modern economy.

Shoe and Leather Reporter

In this volume, Brian J. Loasby explores how the limitations of human knowledge create opportunities as well as problems in the modern economy. Institutions emerge as a way of coping with the problems and helping to exploit the opportunities

in an evolutionary process. However, this evolutionary process does not necessarily produce optimal results, making many of the optimisation techniques of modern economics less than useful. The volume also explores how the biological foundation of human cognition helps us to understand both the role of institutions and the nature of capabilities or

performance skills, both individual and organisational. Transaction and governance costs alone are not an adequate basis for understanding economic organisation: this is to be explained by capabilities as well as transactions.
