Chip Block, the hero of Parts, is back, and still worried about falling apart based on the things he hears. This time he's made a list of all the strange, crazy things he's

heard people say: "I lost my head." "My nose is running." "I sang my heart out. . . ." It's scary stuff, but he has a plan for making sure he doesn't accidentally leave any of his parts behind. A hilarious sequel to the wildly popular Parts and More Parts. [Scooters Automatic Transmission 50 to 250cc Two-Wheel Carbureted Models](#) DK Publishing (Dorling Kindersley)

This important book, written by educational expert and urban school leader, Tom Payzant, offers a realistic understanding of what urban school leadership looks like from the inside. Payzant shares his first-hand knowledge of the unique managerial, instructional, and political tasks of this role. Effectively combining practical lessons and research, *Urban School Leadership* includes in-depth analysis of various leadership concerns. The book covers topics such as improving student achievement, working with unions, building community, and maintaining and developing resources. Most importantly, it offers stories of real school leaders whose successes and missteps reveal the inherent "messiness" of this difficult job. *Urban School Leadership* is part of the Jossey-Bass Leadership Library in

Education series. "This important book provides compelling examples of how effective leaders can have hope, see progress, and achieve success for all children in the schools and districts they lead."—Richard Riley, former United States Secretary of Education "Tom Payzant is one of the few people who could provide such a comprehensive, useful book for educational leaders at all levels. This very practical book is grounded in the important experiences and impressive judgment of one of our nation's most successful school superintendents"—Jon Schnur, co-founder and CEO, New Leaders for New Schools "Tom Payzant is one of the finest urban educators of our generation. *Urban School Leadership* is compelling, crisp, and wise—providing a clear path for those dedicated to improving the trajectory of children's lives."—Timothy F.C. Knowles, executive director, Center for Urban School Improvement, University of Chicago "Urban School Leadership is a must read for anyone interested in the landscape of urban public education in America."—Beverly Hall, superintendent, Atlanta Public Schools

This book is a most exciting and unusual study of cultural history. The idea of the pregnant man, redolent of bawdy jokes and sexual fantasy, has inspired European literature and folklore since ancient times. Traces of the theme, both comical and disturbing, are found not only in the wealth of tales from Italy, France, Germany, Russia, Finland and other European Countries, but also in the Hebrew and Islamic traditions.

 If you are lucky enough to find your place, you should never actually live in it, never make it your home. And never live with the man you think you cannot live without. Le Village is a small town at the southwestern-most tip of France. Here a young Englishwoman fell in love with France, the French and one Frenchman in particular. In her seductive, lyrical and witty memoir Helen Stevenson writes about life in Le Village, not as an expat, but as someone adopted by her neighbours as one of their own. By Stefan, the Maoist tennis fanatic, who lives off his lover in solidarity with the unemployed; by Gigi, the chic Parisian who dresses her ex-lovers' girlfriends from the stock of her exquisite boutique; and by Luc, the crumpled cowboy painter and part-time dentist, who, overcoming an aversion to blondes, takes the Englishwoman up to his

remote mas, shows her his paintings and teaches her to ride. Describing the colour and light of the landscape with lyrical intensity, and savouring the languid and sexy flavour of the Mediterranean lifestyle, Helen Stevenson lays bare a romantic but potentially disastrous love affair with the man 'who seems like the only man alive to me, the one with the halo round his head in a crowd, if I should ever see him in a crowd'. *INSTRUCTIONS FOR VISITORS* may start as an objective guide for tenants arriving at her village house, but it ends as a very personal revelation of how difficult it can be to transplant oneself into someone else's country, someone else's culture, someone else's heart.

 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The

first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

*Electric Field Analysis* is both a student-friendly textbook and a valuable tool for engineers and physicists engaged in the design work of high-voltage insulation systems. The text begins by introducing

the physical and mathematical fundamentals of electric fields, presenting problems from power and dielectric engineering to show how the theories are put into practice. The book then describes various techniques for electric field analysis and their significance in the validation of numerically computed results, as well as: Discusses finite difference, finite element, charge simulation, and surface charge simulation methods for the numerical computation of electric fields Provides case studies for electric field distribution in a cable termination, around a post insulator, in a condenser bushing, and around a gas-insulated substation (GIS) spacer Explores numerical field calculation for electric field optimization, demonstrating contour correction and examining the application of artificial neural networks Explains how high-voltage field optimization studies are carried out to meet the desired engineering needs Electric Field Analysis is accompanied by an easy-to-use yet comprehensive software for electric field computation. The software, along with a wealth of supporting content, is available for download with qualifying course

adoption.

Lambretta D/LD 125/150 tells the

industrial and technical history of the Lambretta D/LD series, the classic Lambretta par excellence, the model that has represented the purest essence of the scooter "made in Italy," as told through invaluable archive materials. The book includes previously unpublished photos and official documents discovered in the Innocenti archives along with accurate texts by Vittorio Tessera, the leading expert on the historic scooter in Italy and the world. With this model, Innocenti proved capable of conquering the national and international markets; exported throughout the world, the D/LD was a great success, loved and appreciated by thousands of users. Chapters dedicated to advertising, to the famous people who fell in love with it and to the marketing of the D and DL series around the world complete this latest title in the series that also includes the volumes Lambretta LUI, Lambretta TV/LI Series I and Lambretta TV/LI Scooterstyle Series III.

The 1970s was a great decade for British racing drivers, but it was also the era in which the nation lost a generation of brilliant young drivers – Roger Williamson, Tony Brise and Tom Pryce – in tragic accidents. All had the potential to be World Champions. With access to their families, friends and race colleagues, David Tremayne tells their full stories in this superb book, now available in paperback. It makes for poignant but uplifting reading.
