After eleven weeks of bombing in the spring of 1999, the United States and NATO ultimately won the war in Kosovo. Serbian troops were forced to withdraw, enabling an international military and political presence to take charge in the region. But was this war inevitable or was it the product of failed western diplomacy prior to the conflict? And once it became necessary to use force, did NATO adopt a sound strategy to achieve its aims of stabilizing Kosovo? In this first in-depth study of the Kosovo crisis, Ivo Daalder and Michael O'Hanlon answer these and other questions about the causes, conduct, and consequences of the war. Based on interviews with many of the key participants, they conclude that notwithstanding important diplomatic mistakes before the conflict, it would have been difficult to avoid the Kosovo war. That being the case, U.S. and NATO conduct of the war left much to be desired. For more than four weeks, the Serbs succeeded where NATO failed, forcefully changing Kosovo's ethnic balance by forcing 1.5 million Albanians from their home and more than 800,000 from the country. Had they chosen to massacre more of their victims, NATO would have been powerless to stop them. In the end, NATO won the war by increasing the scope and intensity of bombing, making serious plans for a ground invasion, and moving diplomacy into full gear in order to convince Belgrade that this was a war Serbia would never win. The Kosovo crisis is a cautionary tale for those who believe force can be used easily and

in limited increments to stop genocide, mass killing, and the forceful expulsion of entire populations. Daalder and O'Hanlon conclude that the crisis holds important diplomatic and military lessons that must be learned so that others in the future might avoid the mistakes that were made in this case.

Decision-making is a process of choosing from possible courses of action in order to attain goals and objectives. Nobel laureate Herbert Simon wrote that the whole process of managerial decision-making is synonymous with the practice of management. Decision-making is at the core of all managerial functions. Planning, for example, involves the following decisions: What should be done? When? How? Where? By whom? Other managerial functions, such as organizing, implementing, and controlling, rely heavily on decision-making. Decision by Objectives is an invaluable book about the art and science of decision-making. It presents a very practical approach to decision-making that has a sound theoretical foundation, known as the analytic hierarchy process. Intended for both the student and the professional, the book includes approaches to prioritizing, evaluating alternative courses of action, forecasting, and

allocating resources. By focusing on objectives rather than alternatives alone, it shows the reader how to synthesize information from multiple sources, analyses, and perspectives. The methods presented have been gaining popularity throughout the world.

This book covers all aspects of implant dentistry, presenting up-to-date information that reflects the highest level of scientific evidence as presented in the specialized literature. Among the topics addressed by expert authors are the prognosis of natural tooth versus implant restorations, bone response to implant treatment, placement and loading time, implant design and length, platform design, implant abutments, prosthodontic treatment, reconstructive surgery, and periimplantitis. The amount of data available for the clinician working in the field of implantology is huge and constantly increasing. The task of remaining abreast of the latest evidence and applying it effectively in clinical practice is further hindered by the fact that many scientific papers make contradictory claims and contain methodological flaws and biases that generate confusion and lack of reliability. Against this background, Evidence-Based Implant Dentistry will serve the reader as a dependable and scientifically supported guide to current implant treatment and key issues in the field.

Former executive editor of The New York Times and one of our most eminent journalists Jill Abramson provides a “valuable and insightful” (The Boston Globe) report on the disruption of the news media over the last decade, as shown via two legacy (The New York Times and The Washington Post) and two upstart (BuzzFeed and VICE) companies as they plow through a revolution that pits old vs. new media. “A marvelous book” (The New York Times Book Review), Merchants of Truth is the groundbreaking and gripping story of the precarious state of the news business. The new digital reality nearly kills two venerable newspapers with an aging readership while creating two media behemoths with a ballooning and fickle audience of millennials. “Abramson provides this deeply reported insider account of an industry fighting for survival. With a keen eye for detail and a willingness to interrogate her own profession, Abramson takes readers into the newsrooms and boardrooms of the legacy newspapers and the

digital upstarts that seek to challenge their dominance” (Vanity Fair). We get to know the defenders of the legacy presses as well as the outsized characters who are creating the new speed-driven media competitors. The players include Jeff Bezos and Marty Baron (The Washington Post), Arthur Sulzberger and Dean Baquet (The New York Times), Jonah Peretti (BuzzFeed), and Shane Smith (VICE) as well as their reporters and anxious readers. Merchants of Truth raises crucial questions that concern the well-being of our society. We are facing a crisis in trust that threatens the free press. “One of the best takes yet on journalism’s changing fortunes” (Publishers Weekly, starred review), Abramson’s book points us to the future.

“Martha Minow is a voice of moral clarity: a lawyer arguing for forgiveness, a scholar arguing for evidence, a person arguing for compassion.” —Jill Lepore, author of *These Truths* In an age increasingly defined by accusation and resentment, Martha Minow makes an eloquent, deeply-researched argument in favor of strengthening the role of forgiveness in the administration of law. Through three case studies, Minow addresses such foundational issues as: Who has the right to forgive? Who should be forgiven? And under what terms? The result is as lucid as it is compassionate: A compelling study of the mechanisms of justice by one of this country’s foremost legal experts.

In Central and Eastern European countries, inequalities for Roma families living in marginalized communities start early and are striking. Some of these inequalities reflect hard-wired family circumstances such as being born in poverty. Others reflect lack of opportunities such as limited access to those basic goods and

services that are necessary not only for realizing one's potential in life, but also for living with dignity. Gaps between Roma and non-Roma widen over the lifecycle in a way that reinforces and perpetuates disadvantage and translates into significantly unequal outcomes, despite the fact that Roma report having similar aspirations to those of their non-Roma neighbors. Promoting equal opportunities for disadvantaged Roma is not only an imperative for societies that want to call themselves fair, but it is also a smart economic choice, especially in those countries where populations are aging rapidly. Investing early, with a particular emphasis on supporting healthy and cognitive development for disadvantaged Roma children, is likely to go a long way in promoting fair chances. However, leveling the playing field in childhood is likely not enough: disadvantaged Roma continue being exposed to unequal opportunities at key nodes in their lives, such as when pursuing education or when looking for a job. Therefore, it is as important that a broader set of policies address some of the circumstances in which a large share of Roma children grow up, including access to employment and decent living conditions for their families. Implementing interventions that help overcome these interrelated barriers will require strong ownership at the national level, coordinated policies across different ministries and government levels, and an integrated delivery system that is grounded in approaches that are customized to local conditions and implemented in a participatory manner. Good practices in Europe and elsewhere show that inclusion of the most disadvantaged - including many Roma - is possible and the current programming cycle for European Funds represents a unique opportunity to fund such interventions.

*Constitution of the Republic of Kosovo* Routledge

A gripping behind-the-scenes account of the dramatic legal fight to hold leaders personally responsible for aggressive war. On July 17, 2018, starting an unjust war became a prosecutable international crime alongside genocide, crimes against humanity, and war crimes. Instead of collective state responsibility, our leaders are now personally subject to indictment for crimes of aggression, from invasions and preemptions to drone strikes and cyberattacks. The Crime of Aggression is Noah Weisbord's riveting insider's account of the high-stakes legal fight to enact this historic legislation and hold politicians accountable for the wars they start. Weisbord, a key drafter of the law for the

International Criminal Court, takes readers behind the scenes of one of the most consequential legal dramas in modern international diplomacy. Drawing on in-depth interviews and his own invaluable insights, he sheds critical light on the motivations of the prosecutors, diplomats, and military strategists who championed the fledgling prohibition on unjust war—and those who tried to sink it. He untangles the complex history behind the measure, tracing how the crime of aggression was born at the Nuremberg trials only to fall dormant during the Cold War, and he draws lessons from such pivotal events as the collapse of the League of Nations, the rise of the United Nations, September 11, and the war on terror. The power to try leaders for unjust war holds untold promise for the international order, but also great risk. In this incisive and vitally important book, Weisbord explains how judges in such cases can balance the imperatives of justice and peace, and how the fair prosecution of aggression can humanize modern statecraft.

This book comprehensively examines the entire legal process of the international sale of goods, beginning with the creation of the contract and continuing through to either the fulfilment of the sale, or the termination of the contract. Every day goods are globally traded between sellers and buyers in different countries and different jurisdictions. The distances between the parties involved in such transactions, and the relative risks related to that, are a key issue in international commercial sales. Sales of goods carried by sea, thus, differ quite drastically from domestic sales; the goods will be normally shipped at a port very distant from the buyer, preventing his physical presence at the port of loading. Further, the goods will travel in the custody of a carrier, a party normally quite independent from either trader. Finally, transactions concluded on shipment terms are normally irreversible, in the sense that shipping the goods back to the seller represents an unlikely option for the buyer. Traders around the world very frequently choose English law to govern their contracts, with disputes to be resolved through London arbitration or litigation. The basis of that law is to be found in the English Sale of Goods Act 1979, and the book consequently also includes an examination of the fundamental principles of that Act, as well as considering use of the Vienna Convention on the International Sale of Goods. This book will be an invaluable reference point for

legal practitioners specialising in the sale of goods, as well as postgraduate students and academic researchers working in sales of goods and the international trade sector.
