Now a Netflix film starring and directed by Chiwetel Ejiofor, this is a gripping memoir of survival and perseverance about the heroic young inventor who brought electricity to his Malawian village. When a terrible drought struck William Kamkwamba's tiny village in Malawi, his family lost all of the season's crops, leaving them with nothing to eat and nothing to sell. William began to explore science books in his village library, looking for a solution. There, he came up with the idea that would change his family's life forever: he could build a windmill. Made out of scrap metal and old bicycle parts, William's windmill brought electricity to his home and helped his family pump the water they needed to farm the land. Retold for a younger audience, this exciting memoir shows how, even in a desperate situation, one boy's brilliant idea can light up the world. Complete with photographs, illustrations, and an epilogue that will bring readers up to date on William's story, this is the perfect edition to read and share with the whole family.

Fandom and first love collide in this joyful, feminist contemporary romance from acclaimed author Cory McCarthy—perfect for fans of Rainbow Rowell and Ashley Poston Iris Thorne wants to blaze her own path. That's easier said than done when you're the granddaughter of M. E. Thorne, famous author of the Elementia series, hailed as the feminist response to J. R. R. Tolkien's Lord of the Rings. And with a major motion picture adaptation of her grandmother's books in the works, Iris can say goodbye to her dream of making her own way in the music industry. When Iris and her brother get invited to the film set in Ireland, she's pretty sure the trip will be a nightmare. Except Iris can't deny the rugged beauty of the Irish countryside. And brushing shoulders with the hot, young cast isn't awful, especially the infuriatingly charming lead actor, Eamon O'Brien. Iris even finds the impassioned female director inspiring. But when the filming falls into jeopardy, everything Iris thought she knew about Elementia—and herself—is in question. Will making a film for the big screen help Iris to see the big picture?

"Every James Rollins delivers mach-speed mayhem; throat-clutching suspense; high-style adventure; and a terrific story told terrifically. He makes the rest of us look bad." —Steve Berry, author of The Emperor's Tomb "This guy doesn't write novels—he builds roller coasters." —Booklist New York Times bestselling thrill-master James Rollins is back with The Devil Colony, another electrifying combination of suspense, history, science, action, and ingenious speculation. In The Devil Colony, Sigma Force stalwarts Painter Crowe and Commander Grayson Pierce must investigate a gruesome massacre in the Rocky Mountains and root out a secret cabal that has been manipulating momentous events since the time of the original thirteen colonies. Once again, Rollins delivers a spine-tingler that will leave fans of Michael Crichton, The Da Vinci Code, and Indiana Jones breathless—as he exposes the dark truth behind the founding of America.

From Michael Klare, the renowned expert on natural resource issues, an invaluable account of a new and dangerous global competition The world is facing an unprecedented crisis of resource depletion—a crisis that goes beyond "peak oil" to encompass shortages of coal and uranium, copper and lithium, water and arable land. With all of the planet's easily accessible resource deposits rapidly approaching exhaustion, the desperate hunt for supplies has become a frenzy of extreme exploration, as governments and corporations rush to stake their claim in areas previously considered too dangerous and remote. The Race for What's Left takes us from the Arctic to war zones to deep ocean floors, from a Russian submarine planting the country's flag on the North Pole seabed to the large-scale buying up of African farmland by Saudi Arabia, China, and other food-importing nations. As Klare explains, this invasion of the final frontiers carries grave consequences. With resource extraction growing more complex, the environmental risks are becoming increasingly severe; the Deepwater Horizon disaster is only a preview of the dangers to come. At the same time, the intense search for dwindling supplies is igniting new border disputes, raising the likelihood of military confrontation. Inevitably, if the scouring of the globe continues on its present path, many key resources that modern industry relies upon will disappear completely. The only way out, Klare argues, is to alter our consumption patterns altogether—a crucial task that will be the greatest challenge of the coming century.

A NEW YORK TIMES NOTABLE BOOK It is 1901 and Buffalo, New York, stands at the center of the nation's attention as a place of immense wealth and sophistication. The massive hydroelectric power development at nearby Niagara Falls and the grand Pan-American Exposition promise to bring the Great Lakes "city of light" even more repute. Against this rich historical backdrop lives Louisa Barrett, the attractive, articulate headmistress of the Macaulay School for Girls. Protected by its powerful all-male board, "Miss Barrett" is treated as an equal by the men who control the life of the city. Lulled by her unique relationship with these titans of business, Louisa feels secure in her position, until a mysterious death at the power plant triggers a sequence of events that forces her to return to a past she has struggled to conceal, and to question everything and everyone she holds dear. Both observer and participant, Louisa Barrett guides the reader through the culture and conflicts of a time and place where immigrant factory workers and nature conservationists protest violently against industrialists, where presidents broker politics, where wealthy "Negroes" fight for recognition and equality, and where women struggle to thrive in a system that allows them little freedom. Wrought with remarkable depth and intelligence, City of Light remains a work completely of its own era, and of ours as well. A stirring literary accomplishment, Lauren Beker's first novel marks the debut of a fresh voice for the new millennium and heralds a major publishing event.

The Boy Who Harnessed the Wind Penguin

"Never before have so many Americans been more frustrated with our economic system, more fearful that it is failing, or more open to fresh ideas about a new one. The seeds of a new economy--and, if we act upon it, a new system--are forming. What is that next system? It's not corporate capitalism, not state socialism, but something else--something entirely American. In What Then Must We Do?, Gar Alperovitz speaks directly to the reader about why the time is right for a revolutionary new economy movement, what it means to democratize the ownership of wealth, what it will take to build a new system to replace the decaying one--and how to strengthen our communities through cooperatives, worker-owned companies, neighborhood corporations, small and medium-size independent businesses, and publicly owned enterprises. For the growing group of Americans pacing at the edge of confidence in the old system, or already among its detractors, What Then Must We Do? offers an evolutionary, common-sense solution for moving from despair and anger to strategy and action."--Publisher's website.

"The best new book I've read."—Richard Dawkins, New York Times Book Review Over a storied career, Daniel C. Dennett has engaged questions about science and the workings of the mind. His answers have combined rigorous argument with strong empirical grounding. And a lot of fun. Intuition Pumps and Other Tools for Thinking offers seventy-seven of Dennett's most successful "imagination-extenders and focus-holders" meant to guide you through some of life's most treacherous subject matter: evolution, meaning, mind, and free will. With patience and wit, Dennett deftly deploys his thinking tools to gain traction on these thorny issues while offering readers insight into how and why each tool was built. Alongside well-known favorites like Occam's Razor and reductio ad absurdum lie thrilling descriptions of Dennett's own creations: Trapped in the Robot Control Room, Beware of the Prime Mammal, and The Wandering Two-Bitser. Ranging across disciplines as diverse as psychology, biology, computer science, and physics, Dennett's tools embrace in equal measure light-heartedness and accessibility as they welcome uninitiated and seasoned readers alike. As always, his goal remains to teach you how to "think reliably and even gracefully about really hard questions." A sweeping work of intellectual seriousness that's also studded with impish delights, Intuition Pumps offers intrepid thinkers—in all walks of life—delicious opportunities to explore their pet ideas with new powers.

Do you cringe when a linebacker flattens a quarterback? Hold your breath when a field goal sails toward the goalpost? Watch in amazement as a touchdown pass spirals down the field? Behind those big hits, long kicks, and sensational throws is a science that will give you a whole new perspective on the game of football. A combination of Stephen Hawking and Mike Ditka, physicist and football fan Timothy Gay breaks down the fundamental laws of physics that govern America's most exciting spectator sport. To illustrate the science behind the game, he highlights some of football's recent memorable moments, along with legendary feats from the likes of Franco Harris and Joe Montana. Did you know? Newton's Second Law of Physics proves that Dick Butkus hit running backs with the force of a small killer whale. The average force with which a football must be kicked during kickoff is 450 lbs. But for an instant, the force may be as much as a ton. Shaun Rogers, firing off the line of scrimmage, can develop as much as four horsepower by himself.

The Art of Simple Food II Harper Collins

An unconventional war requires unconventional men—the Special Forces. Green Berets • Navy SEALs • Rangers • Air Force Special Operations • PsyOps • Civil Affairs • and other special-mission units The first two Commanders books, Every Man a Tiger and Into the Storm, provided masterly blends of history, biography, you-are-there narrative, insight into the practice of leadership, and plain old-fashioned storytelling. Shadow Warriors is all of that and more, a book of uncommon timeliness, for, in the words of Lieutenant General Bill Yarborough, "there are itches that only Special Forces can scratch." Now, Carl Stiner—the second commander of SOCOM, the U.S. Special Operations Command—and Tom Clancy trace the transformation of the Special Forces from the small core of outsiders of the 1950s, through the cauldron of Vietnam, to the rebirth of the SF in the late 1980s and 1990s, and on into the new century as the bearer of the largest, most mixed, and most complex set of missions in the U.S. military. These are the first-hand accounts of soldiers fighting outside the lines: counterterrorism, raids, hostage rescues, reconnaissance, counterinsurgency, and psychological operations—from Vietnam and Laos to Lebanon to Panama, to Saudi Arabia, Kuwait, and Iraq, to the new wars of today...

Birds Without Wings traces the fortunes of one small community in southwest Turkey (Anatolia) in the early part of the last century—a quirky community in which Christian and Muslim lives and traditions have co-existed peacefully over the centuries and where friendship, even love, has transcended religious differences. But with the disintegration of the Ottoman Empire and the onset of the Great War, the sweep of history has a cataclysmic effect on this peaceful place: The great love of Philothei, a Christian girl of legendary beauty, and Ibrahim, a Muslim shepherd who courts her from near infancy, culminates in tragedy and madness; Two inseparable childhood friends who grow up playing in the hills above the town suddenly find themselves on opposite sides of the bloody struggle; and Rustem Bey, a wealthy landlord, who has an enchanting mistress who is not what she seems. Far away from these small lives, a man of destiny who will come to be known as Mustafa Kemal Atatürk is emerging to create a country from the ruins of an empire. Victory at Gallipoli fails to save the Ottomans from ultimate defeat and, as a new conflict arises, Muslims and Christians struggle to survive, let alone understand, their part in the great tragedy that will reshape the whole region forever.
