United States Civil Aircraft Register Crown Archetype Volume 54 presents six chapters on the changing face of software engineering-the process by which we build reliable software systems. We are constantly building faster and less expensive processors, which allow us to use different processes to try and conquer the "bug" problem facing all developments-how to build reliable systems with few errors at low or at least manageable cost. The first three chapters of this volume emphasize components and the impact that object-oriented design is having on the program development process (a current "hot topic"). The final three chapters present additional aspects

of the software development process, including maintenance, purchasing strategies, and secure outsourcing of scientific computations.

The world's largest and most technically advanced air force is the U.S. Air Force, which became its own branch of the military in 1947. It's staffed by men and women who have dedicated their lives to protecting our country. This text employs a narrator whose uncle serves in the U.S. Air Force to teach readers what it's like to be from a military family. Age-appropriate language is used to cover topics such as the branch's past and present, its specialized tools and technology, and the unique career opportunities it offers. Readers gain a sensitivity to the sacrifice military families around the country make for our safety. Fact boxes and photographs help engage readers' attention.

Military Construction Appropriations for 1988: Justification of the budget estimates, Air Force

This book looks at several troop categories based on primary function and analyzes the ratio between these categories to develop a general historical ratio. This ratio is called the Tooth-to-Tail Ratio. McGrath's study finds that this ratio, among types of deployed US forces, has steadily declined since World War II, just as the nature of warfare itself has changed. At the same time, the percentage of deployed forces devoted to logistics functions and to base and life support functions have increased, especially with the advent of the large-scale use of civilian contractors. This work provides a unique analysis of the size and composition of military forces as found in historical patterns. Extensively illustrated with charts, diagrams, and tables. NEW YORK TIMES BESTSELLER • Impeccably researched, this riveting journalistic investigation separates fact from fiction, and documents the existence of—and government reactions to—actual UFOs. “A treasure trove of insightful and eye-opening information.”—Michio Kaku, PH.D., bestselling author of *Physics of the Future* Leslie Kean, a veteran investigative reporter who has spent the past ten years studying the still-unexplained UFO phenomenon, reviewed hundreds of government documents, aviation reports, radar data, and case studies with corroborating physical evidence. She interviewed dozens of high-level officials and aviation witnesses from around the world. Among them, five Air Force generals and a host of high-level sources—including Fife Symington III, former governor of Arizona, and Nick Pope, former

head of the British Defence Ministry's UFO Investigative Unit—have written their own breathtaking, firsthand accounts about UFO encounters and investigations exclusively for this book. With the support of former White House chief of staff John Podesta, Kean lifts the veil on decades of U.S. government misinformation about this mysterious phenomenon and presents irrefutable evidence that unknown flying objects—metallic, luminous, and seemingly able to maneuver in ways that defy the laws of physics—actually exist. With a Foreword by John Podesta “The most important book on the phenomenon in a generation.”—*Journal of Scientific Exploration* “Written with penetrating depth and insight, the revelations in this book constitute a watershed event in lifting the taboo against rational discourse about this controversial subject.”—Harold E. Puthoff, PH.D., Director of the Institute for Advanced Studies at Austin

“Kean presents the most accurate, most credible reports on UFOs you will ever find. She may not have the final smoking gun, but I smell the gunpowder.”—Miles O’Brien, science correspondent for PBS’s NewsHour
