## MAYA KIMBERLY

---

Western American Literature UNM Press  
In New Mexico—once a Spanish colony, then part of Mexico—Pueblo Indians and descendants of Spanish- and Mexican-era settlers still think of themselves as distinct peoples, each with a dynamic history. At the core of these persistent cultural identities is each group's historical relationship to the others and to the land, a connection that changed dramatically when the United States wrested control of the region from Mexico in 1848.

**Book Talk** U of Nebraska Press

A discussion of the

emergence of Hispano identity among the Spanish-speaking people of New Mexico during the 19th and 20th centuries. We Have All Gone Away Trinity University Press  
The "Rio Oscuro" begins as snowmelt in the Sangre de Cristo Mountains and makes its way through wandering but determined tributaries, watering pueblos, pastures, fields, and orchards in the chain of narrow valleys that lead to the Rio Grande. In Cidermaster of Rio Oscuro, one of these orchards is the setting for fourteen seasons of growth and harvest and for one man's meditations on the natural cycles of life and death. Harvey Frauenglass, the current steward of this orchard, walks us through his days

of incessant, humbling work as he prunes the trees and floods the orchards, presses cider, hauls boxes to the farmers' market, tends geese and chickens, and repairs gates and joists. "Almost everything on this farm", he writes, "is susceptible to improvement". But as Frauenglass comes to realize, this shamble of property offers, in reality, a kind of salvation. A Bibliography of Grape and Wine Resources at the Paul Evans Library of Fruit Science, Southwest Missouri State University, Mountain Grove Campus UNM Press  
List of charter members of the society: v. 1, p. 98-99. **Brown-eyed Children of the Sun** UNM Press  
A collection of short personal essays on the

life of a writer, life in a small town, and the natural and human world of a river and its surroundings in New Mexico.

### **The Nuclear**

**Borderlands** University of Arizona Press  
A broad study of the Chicano/a movement in the Viet Nam War era. *This Sovereign Land* Duke University Press  
In *Songs of the Fluteplayer*, the charm and challenge of the spectacularly beautiful American Southwest are irresistibly captured by a woman who risked much to discover a new life and greater meaning there. Sharman Apt Russell and her husband moved to the Mimbres Valley in southwestern New Mexico in order to lead a simpler yet more substantial life. Their efforts to be self-sufficient—building an adobe house, giving birth at home, growing their own food—shattered many ideals and forced compromises but also renewed their ties to each other and kindled their respect for the land and its people. The American Southwest that Russell fell in love with comes to life vividly in her writing. From Navajo weavers to illegal Mexican workers, trading posts to

prehistoric pottery, water rights disputes to the omnipresent fluteplayer Kokopelli—the energy and wonder of the Southwest is celebrated in this enchanting book. *ø River of Traps* UNM Press  
An important investigation of the sociocultural fallout of America's work on the atomic bomb. In *The Nuclear Borderlands*, Joseph Masco offers an in-depth look at the long-term consequences of the Manhattan Project. Masco examines how diverse groups in and around Los Alamos, New Mexico understood and responded to the U.S. nuclear weapons project in the post-Cold War period. He shows that the American focus on potential nuclear apocalypse during the Cold War obscured the broader effects of the nuclear complex on society, and that the atomic bomb produced a new cognitive orientation toward daily life, reconfiguring concepts of time, nature, race, and citizenship. This updated edition includes a brand-new preface by the author discussing current developments in nuclear politics and the scientific impact of the nuclear age on the present epoch of a human-altered climate.

### **The Georgia Review**

UNM Press  
An essential resource for understanding the complex history of Mexican Americans and racial classification in the United States. *Manifest Destinies* tells the story of the original Mexican Americans—the people living in northern Mexico in 1846 during the onset of the Mexican American War. The war abruptly came to an end two years later, and 115,000 Mexicans became American citizens overnight. Yet their status as full-fledged Americans was tenuous at best. Due to a variety of legal and political maneuvers, Mexican Americans were largely confined to a second class status. How did this categorization occur, and what are the implications for modern Mexican Americans? *Manifest Destinies* fills a gap in American racial history by linking westward expansion to slavery and the Civil War. In so doing, Laura E Gómez demonstrates how white supremacy structured a racial hierarchy in which Mexican Americans were situated relative to Native Americans and African Americans alike. Steeped in conversations and

debates surrounding the social construction of race, this book reveals how certain groups become racialized, and how racial categories can not only change instantly, but also the ways in which they change over time. This new edition is updated to reflect the most recent evidence regarding the ways in which Mexican Americans and other Latinos were racialized in both the twentieth and early twenty-first centuries. The book ultimately concludes that it is problematic to continue to speak in terms Hispanic "ethnicity" rather than consider Latinos qua Latinos alongside the United States' other major racial groupings. A must read for anyone concerned with racial injustice and classification today. Listen to Laura Gómez's interviews on The Brian Lehrer Show, Wisconsin Public Radio, Texas Public Radio, and KRWG. *Manifest Destinies, Second Edition* University of Iowa Press

A look into the life and passion of David D. Rust (1874-1963), a pioneer in adventurous backcountry guided tours of the Colorado Plateau province of Utah and Arizona, who led month-long pack trips

through a mind-boggling variety of cliffs, mesas, mountaintop overlooks, and hidden desert canyons.

**Chicano Culture, Ecology, Politics** UNM Press

In *We Have All Gone Away*, his emotionally moving memoir, Curtis Harnack tells of growing up during the Great Depression on an Iowa farm among six siblings and an extended family of relatives. With a directness and a beauty that recall Thoreau, Harnack balances a child's impressions with the knowledge of an adult looking back to produce what Publishers Weekly called "a country plum of a book, written with genuine affection and vivid recall." In a community related by blood and harvest, rural life could be bountiful even when hard economic times threatened. The adults urged children to become educated and to keep an eye on tomorrow. "We were all taught to lean enthusiastically into the future," Harnack recalls, which would likely be elsewhere, in distant cities. At the same time, the children were cultivating a resiliency that would serve them well in the unknown world

of the second half of the twentieth century. Inevitably, the Midwest's small, diversified family farm gave way to large-scale agriculture, which soon changed the former intimate way of life. "Our generation, using the mulched dead matter of agrarian life like projectile fuel for our thrust into the future, became part of that enormous vitality springing out of rural America," notes Harnack. Both funny and elegiac, *We Have All Gone Away* is a masterful memoir of the joys and sorrows of Iowa farm life at mid-century, a world now gone "by way of learning, wars, and marriage" but still a lasting part of America's heritage.

*American Book Publishing Record* University of Oklahoma Press

Drawing on five detailed case studies from the American West, the authors explore and clarify how to expedite a transition toward adaptive governance and break the gridlock in natural resource policymaking. Unlike scientific management, which relies on science as the foundation for policies made through a central bureaucratic authority, adaptive governance integrates various types

of knowledge and organizations. Adaptive governance relies on open decision-making processes recognizing multiple interests, community-based initiatives, and an integrative science in addition to traditional science. Case studies discussed include a program to protect endangered fish in the Colorado River with the active participation of water developers and environmentalists; a district ranger's innovative plan to manage national forestland in northern New Mexico; and how community-based forestry groups are affecting legislative change in Washington, D.C.

- Simply revolutionary: Utahns confront the Second World War -- Conclusion.

### Historic New Mexico Churches

NYU Press  
New Mexico's Sangre de Cristo mountains are a place where two cultures — Hispanic and Anglo — meet. They're also the place where three men meet: William deBuys, a young writer; Alex Harris, a young photographer; and Jacobo Romero, an old farmer. When Harris and deBuys move to New Mexico in the 1970s, Romero is the neighbor who befriends them and becomes their teacher. With the tools of simple labor — shovel and axe, irony and humor — he shows them how to survive, even flourish, in their isolated village. A remarkable look at modern life in the mountains, River of Traps also magically evokes the now-vanished world in which Romero tended

flocks on frontier ranges and absorbed the values of a society untouched by cash or Anglo America. His memories and wisdom, shared without sentimentality, permeate this absorbing story of three men and the place that forever shaped their lives.

### **Songs of the**

### **Fluteplayer**

Columbia University Press

First published in 1985,

William deBuys's

Enchantment and

Exploitation has become a

New Mexico classic. It

offers a complete account

of the relationship

between society and

environment in the

Sangre de Cristo

Mountains of northern

New Mexico, a region

unique in its rich

combination of ecological

and cultural diversity.

Now, more than thirty

years later, this revised

traveled in that time—and

continues to travel. In a

new final chapter deBuys

examines ongoing

transformations in the

mountains' natural

systems—including, most

notably, developments

related to wildfires—with

significant implications for

both the land and the people who depend on it. As the climate absorbs the effects of an industrial society, deBuys argues, we can no longer expect the environmental future to be a reiteration of the environmental past.

*Understories* UNM Press  
Studies territorial and rural New Mexico in the nineteenth century, the struggle for statehood, Nuevomexicano politics, immigration, urban issues in the twentieth century, the role of Spanish in education, ethnic identity, and the Chicano movement.

*Roots of Resistance* Gibbs Smith

The West is popularly perceived as America's last outpost of unfettered opportunity, but twentieth-century corporate tourism has transformed it into America's "land of opportunism." From Sun Valley to Santa Fe, towns throughout the West have been turned over to outsiders—and not just to those who visit and move on, but to those who stay and control. Although tourism has been a blessing for many, bringing economic and cultural prosperity to communities without obvious means of support or allowing towns on the

brink of extinction to renew themselves; the costs on more intangible levels may be said to outweigh the benefits and be a devil's bargain in the making. Hal Rothman examines the effect of twentieth-century tourism on the West and exposes that industry's darker side. He tells how tourism evolved from Grand Canyon rail trips to Sun Valley ski weekends and Disneyland vacations, and how the post-World War II boom in air travel and luxury hotels capitalized on a surge in discretionary income for many Americans, combined with newfound leisure time. From major destinations like Las Vegas to revitalized towns like Aspen and Moab, Rothman reveals how the introduction of tourism into a community may seem innocuous, but residents gradually realize, as they seek to preserve the authenticity of their communities, that decision-making power has subtly shifted from the community itself to the newly arrived corporate financiers. And because tourism often results in a redistribution of wealth and power to "outsiders," observes Rothman, it represents a new form of colonialism

for the region. By depicting the nature of tourism in the American West through true stories of places and individuals that have felt its grasp, Rothman doesn't just document the effects of tourism but provides us with an enlightened explanation of the shape these changes take.

Deftly balancing historical perspective with an eye for what's happening in the region right now, his book sets new standards for the study of tourism and is one that no citizen of the West whose life is touched by that industry can afford to ignore.

*We Fed Them Cactus*  
Development of Western Resourc

Documents the daily activities of Hispanic pioneers--buffalo hunting, horse breaking, sheep herding, preparing and preserving food, sewing, tending the sick, and educating children are included in this rich recuerdo, as well as stories of Comancheros, Tejanos, Americanos, and outlaws.

*The Awkward State of Utah* Princeton University Press

Article abstracts and citations of reviews and dissertations covering the United States and Canada.
