Audits provide essential accountability and transparency over government programs. Given the current challenges facing governments and their programs, the oversight provided through auditing is more critical than ever. Government auditing provides the objective analysis and information needed to make the decisions necessary to help create a better future. The professional standards presented in this 2018 revision of Government Auditing Standards (known as the Yellow Book) provide a framework for performing high-quality audit work with competence, integrity, objectivity, and independence to provide accountability and to help improve government operations and services. These standards, commonly referred to as generally accepted government auditing standards (GAGAS), provide the foundation for government auditors to lead by example in the areas of independence, transparency, accountability, and quality through the audit process. This revision contains major changes from, and supersedes, the 2011 revision.

The vast majority of Canadians are blissfully unaware that everyman, woman and child in Canada now owes a \$35,000 share of government debt and must pay this back, with interest! Make no mistake, this debt will change our country and affect every single Canadian in the decades to come. You may think you have planned for your retirement and are safe, but the government must find a way to recover this borrowed money, and

they can only do that by raising your taxes and reducing your hard-earned benefits. How did this debt come about, and why can't we simply pay it off? Pension Ponzi lays the blame squarely at the feet of the politicians who refused to stand up to Canada's public sector unions. The fact is Canada's public sector, which accounts for 20% of the workforce, has been grossly overpaid relative to their counterparts in the private sector with cushy pensions paid for with your taxes and new debt. There is no denying that the country does not have the financial resources to ensure that the next generation of Canadians will have the same standard of living as the ones before it—or to support our growing seniors population. Meeting our public sector pension obligations will break the current social safety net that is a pillar of the Canadian way. Can you escape this bleak future? Can you afford to live longer? Nationally-recognized pension expert Bill Tufts and award-winning journalist Lee Fairbanks explore how this catastrophe came about and then suggest ways that government can fix what's broken, and how you as an individual can protect yourself from the financial calamity that is about to engulf Canada.
